<b>IRIN Comments on imagery:</b> Imagery was clear, good ortho-rectification		<b>Weather at time of flight:</b> Skies were clear. Marine layer to the West. Little to no smoke.	<b>Flight Objective:</b> Map perimeter and heat sources
<b>Date and Time Imagery Received by Interpreter:</b> 20210901 2330PDT		<b>Type of media for final product:</b> Shapefiles, KMZ files, maps, IRIN log	
<b>Date and Time Products Delivered to Incident:</b> 20210902 0045PDT		<b>Digital files sent to:</b> <a href="http://Ftp.wildfire.org">Ftp.wildfire.org</a>	
<b>Comments /notes on tonight's mission and this interpretation:</b> This fire is being flown early to avoid the marine layer moving inland and potentially obstructing the camera view. No growth was observed outside the perimeter and inside is comprised mostly of isolated heat sources.  Please contact me if you have questions or concerns-AJP
