# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 32	TYPE OF FIRE: Wildfire
FIRE NAME: KNP Complex	OPERATIONAL PERIOD: October 17, 2021 24hr

## INPUTS

### WEATHER SUMMARY:

\*\*\*Dry and Breezy\*\*\*

- Today: Temps. Upper 50-60 RH. 17-25%. Lower Temps. 60-70 RH. 15-20% Wind, SW 7-14mph Gusts 20mph..
- Tonight: Temps. Upper 28-38 RH 72-82% Lower Temps. 38-48 RH. 67-77 Wind S 2-8mph.

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** With the approach of the cold front, there is a potential for moderate to extreme fire behavior today. Most of the forward fire progression is expected on the east side of the fire in east west aligned drainages. Fire weakened trees will continue to fall. Expect active surface fire mainly in unburned interior islands. There is a potential of spot fires from torching trees. Expect to see open surface fire and occasional torching trees. One hour fuels are receptive to spot fires. This is a short term event and any active fire should abate by sundown or shortly after.

ERC: 73 Approaching the 90<sup>th</sup> percentile

POI: 70-80% in the afternoon.

### SPECIFIC:

#### Branch I:

**North:** Most of the fire is in a backing alignment. Rollout will continue to challenge containment. Fuels are more sparse east of the Generals Highway, which will help moderate forward progression. If fire were to become, established over containment lines, expect moderate rates of spread and minimal flame lengths. The highest probability for growth will be south of the Giant Forest, where the fire will continue to flank to the east above the middle fork.

**South:** The fire has the potential to cross over Cliff Creek and spread up the Middle Fork. Rollout will continue to challenge containment lines. If fire does get across containment lines, expect moderate rates of spread. Keep a heads up for any hold over heat in Div. C. If fire becomes, established along the east fork, expect short intense uphill runs towards Mineral King Rd. Also, in Div. C the fire will continue to challenge containment lines near and in the Atwell Grove. No forward progression expected in Divisions A and X.

**All Areas:** Spotting from rollout will continue to be problematic. Slope-reversals are probable from any fire burning in drainage bottoms. Mop-up will continue to be extensive.

**AIR OPERATIONS:** Smoke has the potential to limit air operations until around noon.

## SAFETY

- Make sure Lookouts are posted in places where they can see potential spotting.
- Fire weakened timber poses a threat to personnel working in timber areas.
- Unburned fuel between you and the fire.

# Suppression Rehabilitation Specifications

**Goal**—Overall line rehab goals are to reduce erosion and runoff potential and promote future plant growth. Walk through adjacent undisturbed area and take a look at your rehab efforts to determine your success at returning the area to as natural a state as possible.

**Rehabilitate dozer lines and handlines after ops approval**

- Pull back soil and cut vegetation. Remove berms. Restore slope contour.
- Install waterbars on slopes greater than 10%.

Fire line Gradient (% slope)	Distance Between Waterbars (feet)
0 to 10	no waterbars needed
10 to 20	100
21 to 40	75
41 to 60	50

- Dimensions: 6-18 inches tall. Steeper slopes require taller waterbars
- Angle: 30-45 degrees across fireline. Extend waterbar across entire fireline. Exit waterbar flow into the green.
- Block entrance of dozer lines with extra logs and vegetation to prevent access

**Rehabilitate Helispots, Drop Points, and Staging Areas**—rake back disturbed soil and scatter cut trees, shrubs, limbs, and logs over area. If called out by READs decompact soil as needed in the top 2-4”.

**Roads**—Chip or masticate vegetation piles cut during suppression. Unclog culverts of dirt or vegetation if impacted by suppression.

**Remove Trash**—remove unnecessary microtrash, flagging/equipment and tools from along handlines, spike camps, helispots, drop points, and staging areas.

**Work with Resource Advisors with questions, modifications to the specifications, and sign-off.**

## Human Resource Message

### Got Blisters?

The majority of us have had blisters and know, the longer the blister is allowed to fester, the worse it gets. However, with preventative measures – such as popping the blister and covering it with duct tape – we can mitigate the pain. Problems/Issues are like blisters – though we don't pop them or apply duct tape to our problems – if we are not proactive with taking steps to mitigate the problem and we let them fester, our problems turn into something we'd rather them not turn into.

Please be proactive and come visit your HRSP when a work-related problem/issue first arises, and I will gladly help you mitigate it, so it won't become a painful blister!
