INCIDENT OBJECTIVES (ICS 202)	KNP COMPLEX NORTH ZONE	10/8/2021	TIME: 1800
--------------------------------------	-------------------------------	------------------	-------------------

4. OPERATIONAL PERIOD (DATE/TIME): 10/9/2021 to 10/10/2021, Day 0700-1900 / Night 1900-0700

5. OBJECTIVES:

Strategic Framework

Implement a full suppression strategy on the KNP Complex Fire. Values at risk include human safety, communities, Sequoia Groves, critical infrastructure, associated improvements, and wilderness values. Apply tactics that offer the highest probability of success commensurate with resource availability.

Leaders Intent

Provide the highest level of customer service to all involved with or impacted by the KNP Complex. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct, and timely/effective communication.
- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by minimizing large group settings, social distancing, wearing face coverings, and handwashing.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate public information with KNP South Zone to provide timely and continuous information to affected agency partners, cooperators, and to the public.
- Coordinate suppression activities with assigned incident Resource Advisors and Tribal Advisors to minimize impacts to Sequoia Groves, wilderness, natural and cultural resources. Utilize Minimal Impact Suppression Tactics (MIST) where appropriate,

Control Objectives

To prevent the fire from spreading to private property, surrounding communities, Sequoia Groves, wilderness, and values at risk, keep the KNP Complex fire:

- West of Deadman Canyon
- South of the Kings River
- East of Dry Creek Road and Hwy 245
- North of the KNP Complex Zone break

Site Safety Plan Required <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No Approved Site Safety Plan Located at: N/A

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: Wildfire
FIRE NAME: North Zone KNP Complex	OPERATIONAL PERIOD: October 9, 2021 24hr
DATE ISSUED: 10/08/21	TIME ISSUED: 2000
UNIT: CA-KNP	SIGNED: _____ Typed/printed: Dennis Burns/s/

INPUTS

WEATHER SUMMARY: *****Warming with Clearing *****
- Today Temps 53-62 RH 37-47%. Wind, N-NE 8-12mph..
- Tonight Temps 30-40 RH 42-52% Wind N-NW 7-11mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL: With the recent precipitation, little to no forward fire progression is expected today and tonight. Main chances for forward progression will be from rollout. Expect mainly smoldering and creeping fire behavior. However, pockets of heavier fuel will continue to burn along with surface fuels under tight canopies. There is a minimal chance of spot fires from torching trees. The fire will begin to respond to warmer dryer conditions mainly in the heavier fuels, which will become more active.

ERC: 29 Below average.

POI: Less than 40% in the afternoon.

SPECIFIC:

Div P: Most of the fire is in a backing alignment, expect little to no growth on the Division. Rollout will continue. Fuels are becoming more sparse east of the Generals Highway.

Div U: No forward fire progression expected. Rollout will continue to challenge containment lines. If fire does get across containment lines, expect slow rates of spread.

Div S: Rollout will continue to be problematic. However, no forward fire progression is expected. Areas under the tight canopy have the potential to exhibit active surface fire.

Div L: Expect minimal forward fire progression. Pockets of heavy fuels will continue to burn out.

All Areas: Spotting from rollout will continue to be problematic. Slope-reversals are probable from any fire burning in drainage bottoms. Mop-up will continue to be extensive.

AIR OPERATIONS: Clouds/fog early becoming clear in the late morning/early afternoon.

SAFETY

- Make sure Lookouts are posted in places where they can see potential spotting.
- Fire weakened timber poses a threat to personnel working in timber areas.
- Unburned fuel between you and the fire.

KNP Complex Safety Message

October 09-10, 2021 0700-0700

Back to Basics

Fire Order #10: Fight fire aggressively, having provided for SAFETY FIRST

PPE/LCES/Fire Behavior/Hazard Trees/Weather/Driving

- Do you have the right PPE for the task and using it correctly?
- Is your LCES in place?
- Fire behavior: is the fire doing what was predicted?
- Is the weather changing?
- Driver safety cushion in place?

Some possible mitigation could include:

- Inspect **PPE** daily. Review JHA if in doubt about appropriate PPE. **PPE** must become second nature because failing to **compromises safety**.
- Validate:
 - Lookout is still in the best location for the assignment?
 - Communications are still good, or do I need to do a radio check?
 - Escape route is still valid, or do I need to reestablish a new escape route?
 - Can I survive in my current safety zone given the current weather conditions or should I reestablish another safety zone?
- **See attached Hazard Tree sheet**
- **At 1400, take a 10-minute break** and re-access your current situation against objectives. Remember, of 20 burnovers fatality incidents, 15 occurred between the hours of 1400 and 1630.
- Continue to take spot weather for updated local weather conditions. Share observations with the ITMET your input will help validate and update the forecast and fire behavior.
- Will your speed allow you to slow down or stop if you encounter another vehicle or animal around the next curve?

Stop, Think, Talk, Act

CIIMT2 Safety Officer: Ron Bertsch

Risk Management for Hazard Trees

Hazard trees, both dead (snags) and green trees, are one of the highest risks found in forests on the KNP Complex. Observe & share hazard tree intel with your crew and others on the fireline.

Ask yourself: How serious is the hazard & what is the probability that it will occur?

Environment:

- Steep slopes
- Burned area
- Changing forest health conditions – Diseased/bug-kill areas
- Number and height of hazard trees
- Potential for trees to domino into each other.
- Gusty winds from storm cells
- Water/ retardant drops or copter rotor wash
- Night operations

Tree Indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs
- Absence of needles, bark, or limbs – SNAGS!
- Leaning or hung-up

Hazard Control and Mitigation:

- Utilize qualified sawyers & Falling Bosses
- Establish a secure felling area, minimum of 2 ½ times tree height
- Post a lookout to keep personnel clear of the felling area
- Initiate road closure & traffic control if necessary
- Plan a quick & safe escape route if Plan A does not work
- All eyes on the tree being felled and trees in the falling layout
- Stay clear of the felling area until “All Clear” called by the sawyer
- Flag, sign & map “No Work Zones” in high risk areas.
- Keep clear of water/retardant drops near trees/snags
- Reposition to a safe area in response to high wind forecast

MAINTAIN SITUATIONAL AWARENESS – LOOK UP AND LIVE!

ASSIGNMENT LIST (ICS 204 WF)

CONTROLLED UNCLASSIFIED

MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:

- Patient Complaint, Condition and Location via Tactical or Command frequency. **Priority 1-Red & 2-Yellow Patients** trigger Incident within Incident (IWI).

- Division Supervisor/Operation contacts Communications/Dispatch:

- Division Supervisor or POC* will run "**Medical –Emergency**" on the Command frequency.
- Division Supervisor or POC* to use "**Medical Incident Report**" worksheet on back of this page or back of IRPG.
- Communication contacts Medical Unit Leader on the Command frequency or cell phone (562) 252-2168 (Medical Emergencies Only).

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:

- Patient Complaint, Condition and Location via Tactical or Command frequency. **Priority 3-Green, (Minor) Patients** **do not** trigger Incident within Incident (IWI).

- Division Supervisor to contact Communications/dispatch:

- Division Supervisor or POC* will run "**Non-Emergency Incident**" on the Command frequency.
- Division Supervisor or POC* will use "**Medical Incident Report**" worksheet on the back of this page or back of IRPG.
- Communications contacts Medical Unit Leader on the Command frequency or cell phone (562) 252-2168 (For medical related incidents only).

IN-CAMP – 24 HOUR MEDICAL

- Contact 911 and Medical Unit (562) 252-2168 with:

- Patient Complaint, Condition and Location

9. PREPARED BY Scott Mohlenbrok (MEDL) 	10. REVIEWED BY Safety Officer 
---	--

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Crew Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***

From your Fire Friendly Finance

2021.knp.finance@firenet.gov

Prior to your demob date, please contact Finance to expedite the demob process. Upon submittal of your final CTR/Shift tickets, Finance will email you copies for your pay documents for review and signature.

When emailing us:

OVERHEAD/FED:

In *subject line* of email: “**TIME**” [Resource #], [Resource Name], and items included.

(EXAMPLE: TIME O-1, Bunyan, Paul, CTR 06052021)

EQUIPMENT & COOPERATOR:

In *subject line* of email: “**EQTR**” [Resource #], [Resource Name], and items included.

(EXAMPLE: EQTR E-1, Big Red’s Trucking ST 06052021)

In *body* of email: Please provide a contact name and phone number.

Or call for assistance:

559-429-5722 - Personnel/Fed Crews

559-330-1870 - Equipment

For claims:

Training Specialist Message

An Incident Training Specialist is assigned to this incident and will be performing the duties "Remotely".

To assure proper documentation for your assignment:

1. Scan the QR Code
2. Complete the Trainee Registration Form

This is the link to sign up -

At the end of your assignment:

1. **Trainee:** Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form -

2. **Trainer:** Fill in the Position Task Book as completely as possible for this incident.
3. **Trainer:** Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's signed by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com

KNP Complex

Resource Advisor Message

- ❖ Employ Minimum Impact Suppression Tactics (MIST) when conducting operations within park boundaries.
- ❖ Limit snagging unless necessary for firefighter safety and the protection of critical values at risk; always low stump.
- ❖ Limit operations in meadows.
- ❖ Avoid cutting trees over 20" unless required for safety.

Consult with Fireline Resource Advisors (REAFs) before:

- ❖ Working in an area flagged off with sensitive resource flagging (Blue/black stripe + white; yellow/black stripe + white).
- ❖ Establishing new camps, staging areas, safety zones, helispots, etc.
- ❖ Park-approved dozer line construction should have a REAF on site during construction.

Please ensure all food and scented items are secured at all times in approved bear-resistant containers and please pack out all garbage.

Wash newly arrived vehicles and equipment at Woodlake weed wash before heading to fireline.

Always maintain 300' clearance of dozers around Sequoia groves.

Giant Sequoia Prep Standards

Goal: reduce fire impacts on lower tree, prevent fire from climbing into crown, and remove litter from catfaces.

1. Create a 3-foot scrape around the base of the tree down to mineral soil.
2. Create an approximately 25-foot (drip line of crown) saw line around a tree where brush, most small trees (<10 in. dbh), heavy coarse woody debris (1000 hr fuels), and snags are removed.
3. Remove litter/duff and woody debris from catfaces. Decide whether wrapping the catface would help keep it from igniting. If wrap is available and tree is a tree of special interest, consider wrapping if tree may be impacted by radiant heat from nearby fuels.
4. Thin thickets of trees surrounding large sequoias for about 25 feet.

Giant Sequoia Post Fire Assessment & Treatment

1. Gain access to groves according to priorities and where safe to do so. No heavy vehicles off roads
2. Use water to cool sequoia roots where there is heat.
 - ❖ Heat most likely to be concentrated in cat faces and uphill sides of trees. Minimize soil disturbance to avoid chopping live roots. Roots may extend up to drip line of tree.
 - ❖ Ask crews to walk 360 around trees and cold trail. If their 'hot lap' has heat, put some water on it.
 - ❖ Extinguish flames on all sides of trees.

10/09/2021

KNP COMPLEX CHECK-IN PROCESS

Virtual Check-In: Please complete online check-in with your smart phone or laptop.

1. SCAN THE QR CODE and COMPLETE the form in its entirety.
2. Use your Resource Order and Incident Qualification Card to complete the check-in information accurately. For CREWS, only the leader must check in online and then provide manifest by email.
3. Please ensure the name, cell phone number and e-mail address are accurate and will reach you on this assignment.
4. Email Resource Order, Manifest, and AD Hire Forms to: 2021.knp.checkin@firenet.gov

Check-in QR Code

KNP COMPLEX DEMOB PROCESS

Please scan the QR code for the directions to the DEMOB process. On this Incident we use a remote DEMOB process. E-mail or text the DEMOB unit leader with questions.

If you need to book a flight back to your home unit. Please contact DEMOB no less than 72 hours in advance of your DEMOB date. Call DEMOB at 818-724-7723.

The DEMOB process for the KNP Complex Fire is as follows:

1. Check DEMOB list for time (due to COVID Protocols do not attempt to DEMOB early)
2. Vehicle Inspection from Ground Support
3. Weed Wash for ALL EQUIPMENT!
4. Return supplies to Supply Unit
5. Return communications equipment to Communications
6. Turn in documentation (ex: unit log)
7. If a trainee, complete documentation using QR Code in the IAP
8. Complete timekeeping with Finance.
9. Complete this form (only after you finish with finance)

Demob QR Code

2021.knp.demob@firenet.gov
