Time From:	0700	Time To:	0700						

**3. Objective(s):**

**Leaders Intent:**  
 Utilize the best combination of point protection, direct and indirect tactics with mindful consideration of the values at risk and the probability of success of firefighting actions in order to meet incident objectives.

**Management Objectives**

- **SAFETY**  
 Provide for firefighter and public safety as the highest priority through sound risk management and Life First Principles. The safety of fire personnel, the public, and the employees is the highest priority during all phases of the incident.  
  
 Reduce the risk to public safety personnel from the potential hazards of COVID-19 through the implementation of CDC and agency guidance and coordination with Tulare County Health Department. Immediately report all possible exposures.
- **PROPERTY**  
 Minimize impacts and protect life and property (private residences and critical infrastructure) in the fire area.
- **NATURAL RESOURCES**  
 Make reasonable efforts to protect natural and cultural resources from high-intensity fire while minimizing fire suppression impacts. Consult with the READs to identify sensitive natural and cultural resources at risk and coordinate all tactical operations.
- **RELATIONSHIPS**  
 Maintain and develop relationships and partnerships with stakeholders, cooperators, community leaders/members, private landowners, and local agencies by coordinating incident management efforts through timely and accurate information sharing.
- **COST**  
 Effectively manage cost by selecting and implementing strategies and tactics that have a high probability of success in meeting incident objectives.

**Control Objectives**

- Keep the fire north of East Fork Kaweah River.
- Keep the fire south of Middle Fork Kaweah River.
- Keep the fire east of Ash Mountain, Burnt Point, and Eshom Valley.
- Keep the fire west of Silver City and the Paradise Ridge-Redwood Meadow Trail.

**WEATHER DISCUSSION**

In the wake of the cold weather system, high pressure will build over the fire area and the region this week. This will allow for a warming trend and much lighter winds. Terrain driven winds will again be dominant with normal slope and canyon conditions prevailing. Humidity will tend to reach minimum values over the higher elevations in the early morning hours and rise through the day. Over lower slopes minimum humidity values will be reached in the afternoon hours. Inversion conditions will prevail through late mornings with smoke trapped in lower drainages.

**.TUESDAY...**

Sky/weather.....Sunny with patchy smoke.  
Max temperature.....Lower Elevations 45-55. Upper Elevations 35-45.  
Min humidity.....Lower Elevations 18-22%.Upper Elevations 22-32%.  
Wind (20 ft).....  
Slope/valley.....Upslope 3-7 mph.  
Ridgetop.....North 3-6 mph.  
Mixing height.....Increasing to around 2500 ft AGL.  
Transport winds.....North around 6 mph.

**.TUESDAY NIGHT...**

Sky/weather.....Clear. Patchy smoke.  
Min temperature.....Lower Elevations 38-45. Upper Elevations 28-36.  
Max humidity.....Lower Elevations 22-32%. Upper Elevations 20-30%.  
Wind (20 ft).....  
Slope/valley.....Downslope/downcanyon 3-8 mph.  
Ridgetop.....Northwest 10-15 mph.  
Mixing height.....Lowering to near surface.  
Transport winds.....Northeast around 3 mph.

**.WEDNESDAY...**

Sky/weather.....Sunny. Patchy smoke.  
Max temperature.....Lower Elevations 52-59. Upper Elevations 41-51.  
Min humidity.....Lower Elevations 30-39%.Upper Elevations 40-45%.  
Wind (20 ft).....  
Slope/valley.....Upslope 3-7 mph.  
Ridgetop.....Northwest 9-14 mph.  
Mixing height.....Increasing to around 4000 ft AGL.  
Transport winds.....North around 12 mph.

**FIRE BEHAVIOR**

**GENERAL:**

- **Minimal fire activity overall due to cold front passage yesterday. Fuel moistures have risen with precipitation, increase in relative humidity (Rh) recovery at night and Rh during the day, there will be a decrease in fire activity overall the next couple days.** Smoldering/creeping to more moderate activity where fuels are available and sheltered from precipitation.
- **Fire activity will primarily be in hold-over heat in stump holes and roots, logs, and in deep organic matter in timber litter.** Large lower elevation fuels will consume more completely. Overall, all large diameter dead and down fuels will be highly resistant to extinguishment due to very low fuel moistures and long period of extreme to exceptional drought conditioning.

**SPECIFIC:**

**DIV X:** Minimal fire activity. Interior smoldering. Some interior smokes from heat in stump holes, logs and some snags may be visible.

**DIV A:** Minimal fire activity. Interior smoldering.

**DIV C:** Minimal fire activity. Hold-over heat in dirty burn along edge, where fire is backing down towards East Fork of Kaweah River may be visible. Watch out for heat holding-over in stump holes, logs and jackpots of fuels that can hold on to heat for a longtime without showing smoke. Especially after a short-duration wetting rain or snow.

**Night Ops:** Fire activity depends on area assigned. Cold front and precipitation has significantly reduced fire activity. Depending on amount of precipitation and the percent of nighttime humidity recovery, most activity will be stumps, stump holes and roots. Lower temperatures, moderate to great humidity recovery will continue to decrease fire activity overnight where pre-existing heat exists.

**AIR OPERATIONS:** Clear skies after inversion lifting in afternoon.  
 Sunrise: 7:00am, Sunset: 6:22pm      Day length: 11hr 22min

**SAFETY:** Fire has burned roots, logs and duff that holds many large and/or heavy objects, such as rocks or stumps, in place. Add rain on top of that and the chance of those objects breaking loose and rolling down hills becomes very high. Keep a close eye and ear out when working on steep slopes.

Secure the heat along the east fork of the Kaweah River to stop fire spread to the southeast. Utilize aircraft and crews to stop all fire spread. Coordinate with resource advisors.

**PURPOSE:** Protect the communities of Silver City, Mineral King and private holdings. Limit high intensity fire in the Atwell, East Fork, and Case Mountain groves.

**END STATE:** Stop fire spread to the west, south and east minimizing impacts to identified values at risk.

# ***SAFETY MESSAGE***

*Fire fighter safety comes first on every fire, every time*

## **Major Hazards and Risks:**

- ❖ **Medical Emergencies-** Do you know what to do in case of a medical emergency? Review Medical Plan (ICS 206) and become familiar with the “Line Emergencies” procedures checklist on the back of the IAP. Your actions may be what saves a life.
- ❖ **Hazardous Road Conditions:** The roads today will be even more hazardous than usual due to the overnight rain/snow. Evaluate the road before you travel on it because yesterday’s condition may not be the same as today’s. Expect to encounter another vehicle around every turn, so take it slow. Keep to the right and stay alert.

### **Hazardous Tree Indicators**

It’s important to identify the hazardous trees in your work area before engaging.

- Strong winds
- Night Operations
- Steep Slopes
- Disease or bug-kill timber
- Trees and duff have been burning for an extended period
- High-risk tree species
- Numerous down trees
- Dead or broken tops and limbs overhead
- Accumulation of downed limbs
- Leaning or hung-up trees
- Look up, Look Down, Look Around

After identifying the hazard trees: look for hazard control measures to mitigate your risks.  
IRPG pgs. 22 & 23

### **ROLLING MATERIAL**

Be prepared for snags, rocks and other fire weakened material to fall or roll downhill.

Post lookouts as needed and assure LCES is in place before engaging.

Look for indications such as down trees, rocks slides in fire area. No native vegetation to hold rolling rocks,

Avoid night operations in high risk areas if possible.

Have an escape plan.

## **Team Safety Officers:**

*Team Safety Officers:* John Nickey SOF1, Todd Mott SOF2.

*Field Safety Officers:* Eliot Pickett SOF2, David Hade SOF2, Ryan Romero SOF2(t).

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed. <b>Communications Unit Phone:</b>

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed. <b>Communications Unit Phone:</b>

# KNP Complex DMOB Process

Please scan the QR code for the directions to the DMOB process. On this Incident we use a remote DMOB process. E-mail or text the DMOB Unit Leader with questions.

**If you need to book a flight back to your home unit**, please contact DMOB no less than 72 hours in advance of your DMOB date. Call DMOB at 928-588-6745

The DMOB process for the KNP Complex Fire is as follows:

1. Check DMOB list for time (due to COVID Protocols do not attempt to DMOB early).
2. Vehicle Inspection from Ground Support.
3. Weed Wash for ALL EQUIPMENT!
4. Return supplies to Supply Unit.
5. Return communications equipment to Communications.
6. Turn in documentation (ex: unit log).
7. If a trainee, complete documentation using QR Code in the IAP.
8. Complete timekeeping with Finance. For single resources/agency crews and equipment, call 949-573-5394.
9. For contract crews, equipment, and cooperators, call 949-573-5355.
10. Complete this form (only after you finish with Finance).
