INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: KNP COMPLEX	2. Operational Period:	Date From: 10/21/2021	Date To: 10/22/2021
		Time From: 0700	Time To: 0700

3. Objective(s):

Strategic Framework
 Implement a full suppression strategy on the KNP Complex Fire. Values at risk include human safety, communities, Sequoia Groves, critical infrastructure, associated improvements, and wilderness values. Apply tactics that offer the highest probability of success commensurate with resource availability.

Leaders Intent
 Provide the highest level of customer service to all involved with or impacted by the KNP Complex. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct, and timely/effective communication.
- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by minimizing large group settings, social distancing, wearing face coverings, and handwashing.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Make risk-informed decisions to minimize fire impacts to Sequoia Groves.
- Coordinate suppression activities with assigned incident Resource Advisors and Tribal Advisors to minimize impacts to Sequoia Groves, wilderness, natural and cultural resources. Utilize Minimal Impact Suppression Tactics (MIST) where appropriate.
- Implement suppression repair activities in accordance with the suppression repair plans and Incident Resource Advisors.

Control Objectives
 To prevent the fire from spreading to private property, surrounding communities, Sequoia Groves, wilderness, and values at risk, keep the KNP Complex fire:

- North, South, and East of established containment lines.
- West of Redwood Meadow Grove confined to areas with natural barriers

WEATHER DISCUSSION

Slight warming today will result in high temperatures near normal for this time of the year. Scattered mid and high level clouds will prevail again and little change is expected in relative humidity. Winds will remain light and terrain driven with a continued west southwest flow at the ridgetops. A trough of low pressure will move in on Friday and bring a little cooling along with a bump up in humidity and winds. There is a slight chance of showers Friday afternoon with a few hundredths to a tenth of an inch of rainfall expected. Forecast models continue to bring an Atmospheric River into the California coast on Sunday but have slowed down the timing a little towards late Sunday night through Monday. It still has the potential to bring significant precipitation to the fire area with rainfall amounts possibly in excess of 2 inches.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 36	TYPE OF FIRE: Vegetation
FIRE NAME: KNP Complex	OPERATIONAL PERIOD: Oct 21 st 24 Hour
DATE ISSUED: October 20 th	TIME ISSUED: 2000
UNIT: Sequoia Kings National Park	SIGNED: Dan O'Connor Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

The most notable vegetation is forests of giant sequoia (*Sequoiadendron giganteum*). Oak woodland (blue oak, interior live oak) and chaparral with chamise and manzanita characterize the lower elevations. Mixed conifer forest with Colorado white fir, red fir, western yellow pine (ponderosa pine), sugar pine and lodgepole pine forests and montane meadows occupy the middle elevations. Subalpine forests with foxtail pine, whitebark pine and meadows, krummholz, and alpine ecosystems typify the higher elevations. A combination of prescribed and resource benefit fire patches exist throughout the Park. Tulare County is currently classified as 'Exceptional' by the US Drought Monitor mapping system impacting both live and dead fuels.

EXPECTED FIRE BEHAVIOR: *Based on the Warmest, Driest, Windiest Conditions Forecasted*

<u>Maximum Spotting Distance</u>	<u>Fuel Type/Model</u>	<u>Maximum Rate of Spread (chains/hour)</u>	<u>Maximum Flame Length (feet)</u>
0.1 mile or less <u>Probability of Ignition</u> 32 %	Timber understory (TU5-Overstocked and/or dense reprod)	Head 3-5 ch/hr Flank 1-2 ch/hr	Head 2-5 ft Flank 0-2 ft
	Timber litter (TL6-closed canopy, ground fuels)	Head 1-2 ch/hr Flank 0-1 ch/hr	Head 1-2 ft Flank 0-2 ft

General: There is still a fair amount of snow above the 6000' elevation mark, so minimal fire progression is expected today. Expect creeping under closed canopies and heavier fuels will continue to burn. Fire weakened trees will continue to fall. Spotting, if any will be from rollout and with the higher RH the potential for torching, will be reduced. One hour fuels are becoming more receptive to spotting on exposed south and west slopes.

SPECIFIC

Branch I:

North: No forward fire progression is expected. Most of the fire is in a backing alignment. Rollout will continue to challenge containment. Heavier fuels will continue to burn and some creeping should be expected under closed canopies.

South: Expect, decreased fire behavior in Division C. Rollout will continue to challenge containment lines. Some flanking runs are possible on the east flank Div. C. The fire is not expected to cross Cliff Creek. No forward progression in Divisions A and X.

AIR OPERATIONS:

Minimal smoke impacts to restrict air operations today

SAFETY:

As the fire moves into the ramp down stage, keep in mind fuels are very slow to recover and you may find pockets of active fire where slope, aspect, and fuels align.

Health & Safety Message

Incident: KNP Complex CA-KNP-000122	Date/Op Period: Day Shift 10/21/21

Hazards & Risks

Transfer of Command: As we make the transfer of command from CA Team 2 to CA Team 12; maintain your situational awareness as new faces take over the fire. Share information and local fire knowledge. Review your IAP closely and share all the intel you've gathered over the last several shifts (weeks) with the new folks. Identify all the hazards and mitigation measures and reevaluate your tactics each shift to reflect the changing conditions on the fire line.

Tactical Pause: The coming transition in leadership will be a good time to review some of the basic safety tenants of firefighting. **LCES:** Is there a new set of eyes on the fire? Has the comm plan been changed? Is the Div/Branch you're assigned to the same or have things changed? Is that safety zone you had in your back pocket the last few shifts now miles away? Just a few thoughts to discuss with your crews.

Public Interactions: Be aware of public contacts while you're out in the field. Folks may wander into the Park or Forest despite road and forest closures. Be firm but kind with your contacts and remind the public of the dangers that exist out in the fire area. A good time for some public education in fire suppression operations.

Driving Safety: Long drive times, narrow/winding roads, civilian traffic, reduced visibility, distracted drivers; all combine to make it a challenge just to get to the fire line safely! Slow down, focus on the road, pull off the road to check maps, phones, radios, etc.
