FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 37	TYPE OF FIRE: Vegetation
FIRE NAME: KNP Complex	OPERATIONAL PERIOD: Oct 22 st 24 Hour
DATE ISSUED: October 21 th	TIME ISSUED: 2000
UNIT: Sequoia Kings National Park	SIGNED: Greg White PSC2 for Dan O'Connor Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

The most notable vegetation is forests of giant sequoia (*Sequoiadendron giganteum*). Oak woodland (blue oak, interior live oak) and chaparral with chamise and manzanita characterize the lower elevations. Mixed conifer forest with Colorado white fir, red fir, western yellow pine (ponderosa pine), sugar pine and lodgepole pine forests and montane meadows occupy the middle elevations. Subalpine forests with foxtail pine, whitebark pine and meadows, krummholz, and alpine ecosystems typify the higher elevations. A combination of prescribed and resource benefit fire patches exist throughout the Park. Tulare County is currently classified as 'Exceptional' by the US Drought Monitor mapping system impacting both live and dead fuels.

EXPECTED FIRE BEHAVIOR: *Based on the Warmest, Driest, Windiest Conditions Forecasted*

<u>Maximum Spotting Distance</u>	<u>Fuel Type/Model</u>	<u>Maximum Rate of Spread (chains/hour)</u>	<u>Maximum Flame Length (feet)</u>
0.1 mile or less	Timber understory (TU5-Overstocked and/or dense reprod)	Head 3-5 ch/hr Flank 1-2 ch/hr	Head 2-5 ft Flank 0-2 ft
<u>Probability of Ignition</u> 32 %		Timber litter (TL6-closed canopy, ground fuels)	Head 1-2 ch/hr Flank 0-1 ch/hr

General: There is still a fair amount of snow above the 6000' elevation mark, so minimal fire progression is expected today. Expect an increase in smoldering of heavy dead and down with the lower RH and increased winds. Creeping under closed canopies and heavier fuels will continue to burn. Fire weakened trees will continue to fall. Spotting, if any will be from rollout One-hour fuels are becoming more receptive to spotting on exposed south and west slopes.

SPECIFIC

North: No forward fire progression is expected. Most of the fire is in a backing alignment. Rollout will continue to challenge containment. Heavier fuels will continue to burn and some creeping should be expected under closed canopies and an increase in smoldering of heavy fuels.

South: Expect, decreased fire behavior in Division C. Rollout will continue to challenge containment lines. Some flanking runs are possible on the east flank Div. C. The fire is not expected to cross Cliff Creek. No forward progression in Divisions A and X.

AIR OPERATIONS:

Minimal smoke impacts to restrict air operations today

SAFETY:

As the fire moves into the ramp down stage, keep in mind fuels are very slow to recover and you may find pockets of active fire where slope, aspect, and fuels align.

SAFETY MESSAGE

INCIDENT's: KNP Complex

DATE: October 22th, 2021.

Operational Period: Day

Hazard trees, both dead (snags) and green trees, are one of the highest risks found in forests on the KNP Complex. Observe & share hazard tree intel with your crew and others on the fireline.

Tree Indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs
- Absence of needles, bark, or limbs –
SNAGS!
- Leaning or hung-up

Hazard Control and Mitigation:

- Utilize qualified sawyers & Falling Bosses
- Establish a secure felling area, minimum of 2 ½ times tree height
- Post a lookout to keep personnel clear of the felling area
- Initiate road closure & traffic control if necessary
- Plan a quick & safe escape route if Plan A does not work
- All eyes on the tree being felled and trees in the felling layout
- Stay clear of the felling area until “All Clear” called by the sawyer
- Flag, sign & map “No Work Zones” in high risk areas.
- Keep clear of water/retardant drops near trees/snags
- Reposition to a safe area in response to high wind forecast

KNOW YOUR LIMITATIONS

- Employ your resources in accordance with their capabilities....set them up to succeed!
- Know yourself and your limitations..... seek feedback from peers and upper management if in doubt.

Incident Safety Officer: Paul Tompkins, Tim Sampson, and Mike Seymour.

Communication

Communication is a two way street. When communication becomes a one way, it becomes a traffic jam and turns into an issue. Some examples are:

- ❖ Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.
- ❖ A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.
- ❖ It can be like the telephone game. It starts with specific information and by the time it gets to the end it very different than what was first communicated.

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two way street!

"The single biggest problem in communication is the illusion that it has taken place"....by George Bernard Shaw

Riddle of the Day:

What can you break, even if you never pick it up or touch it?
