

INCIDENT ACTION PLAN KNP COMPLEX

CA-KNP-000122
PPN9UH (1522)

Monday

OPERATIONAL PERIOD

11/1/2021 0700
to
11/2/2021 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">KNP COMPLEX</p>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="border: none;">Date From:</td> <td style="border: none;">11/1/2021</td> <td style="border: none;">Date To:</td> <td style="border: none;">11/2/2021</td> </tr> <tr> <td style="border: none;">Time From:</td> <td style="border: none;">0700</td> <td style="border: none;">Time To:</td> <td style="border: none;">0700</td> </tr> </table>	Date From:	11/1/2021	Date To:	11/2/2021	Time From:	0700	Time To:	0700
Date From:	11/1/2021	Date To:	11/2/2021						
Time From:	0700	Time To:	0700						

3. Objective(s):

Strategic Framework

Implement a full suppression strategy on the KNP Complex. Values at risk include human safety, communities, Sequoia Groves, critical infrastructure, associated improvements, and wilderness values. Apply tactics that offer the highest probability of success commensurate with resource availability.

Leaders Intent

Provide the highest level of customer service to all involved with or impacted by the KNP Complex. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct, and timely/effective communication.
- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by minimizing large group settings, social distancing, wearing face coverings, and handwashing.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Make risk-informed decisions to minimize fire impacts to Sequoia Groves.
- Coordinate suppression activities with assigned incident Resource Advisors and Tribal Advisors to minimize impacts to Sequoia Groves, wilderness, natural and cultural resources. Utilize Minimal Impact Suppression Tactics (MIST) where appropriate.
- Implement suppression repair activities in accordance with the suppression repair plans and Incident Resource Advisors.

Control Objectives

To prevent the fire from spreading to private property, surrounding communities, Sequoia Groves, wilderness, and values at risk, keep the fire:

- North, South, and East of established containment lines.
- West of Redwood Meadow Grove confined to areas with natural barriers

KNP Complex Incident Weather Forecast

FORECAST NO: 46
PREDICTION FOR: 0700 Mon - 0700 Tue
SHIFT DATE: November 1-2, 2021
FORECAST ISSUED: 1800 Sunday October 31

NAME OF FIRE: KNP Complex
UNIT: CA-KNP
SIGNED: Chris Foltz - Incident Meteorologist

WEATHER DISCUSSION: Patchy fog and low clouds will persist through 1000 before giving way to partly to mostly cloudy conditions. An isolated shower is possible during the afternoon and evening hours but little, if any, accumulation is expected. Dry conditions are expected on Tuesday.

.MONDAY...

Sky/weather.....Partly to mostly cloudy with an isolated afternoon and evening shower possible.
 Max temperature....Lower Elevations 53-63. Upper Elevations 47-57.
 Min humidity.....Lower Elevations 50-60%. Upper Elevations 35-45%.
 Wind (20 ft).....
 Slope/valley.....Upslope/upcanyon 3-8 mph.
 Ridgetop.....West 3-7 mph with gusts to 15 mph in the afternoon.
 Mixing height.....Increasing to around 2000 ft AGL.
 Transport winds....Southwest around 8 mph.

.MONDAY NIGHT...

Sky/weather.....Mostly cloudy becoming partly cloudy overnight.
 Min temperature....Lower Elevations 44-54. Upper Elevations 33-43.
 Max humidity.....Lower Elevations 80-90%. Upper Elevations 80-90%.
 Wind (20 ft).....
 Slope/valley.....Downslope/downcanyon 2-5 mph.
 Ridgetop.....Northeast 3-7 mph.
 Mixing height.....Lowering to around 100 ft AGL.
 Transport winds....Northeast around 3 mph.

.TUESDAY...

Sky/weather.....Partly to mostly cloudy.
 Max temperature....Lower Elevations 57-67. Upper Elevations 49-59.
 Min humidity.....Lower Elevations 50-60%. Upper Elevations 35-45%.
 Wind (20 ft).....
 Slope/valley.....Upslope/upcanyon 3-8 mph.
 Ridgetop.....West 3-7 mph with gusts to 12 mph.
 Mixing height.....Increasing to around 3000 ft AGL.
 Transport winds....West around 8 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 44	TYPE OF FIRE: Vegetation
FIRE NAME: KNP Complex	OPERATIONAL PERIOD: Oct 30 th -Nov 3 rd
DATE ISSUED: October 29 th	TIME ISSUED: 1600
UNIT: Sequoia Kings National Park, Sequoia National Forest	SIGNED: Dan O'Connor Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

The most notable vegetation is forests of giant sequoia (*Sequoiadendron giganteum*). Oak woodland (blue oak, interior live oak) and chaparral with chamise and manzanita characterize the lower elevations. Mixed conifer forest with Colorado white fir, red fir, western yellow pine (ponderosa pine), sugar pine and lodgepole pine forests and montane meadows occupy the middle elevations. Subalpine forests with foxtail pine, whitebark pine and meadows, krummholz, and alpine ecosystems typify the higher elevations. A combination of prescribed and resource benefit fire patches exist throughout the Park and National Forest. Tulare County is currently classified as 'Exceptional' by the US Drought Monitor mapping system impacting both live and dead fuels.

EXPECTED FIRE BEHAVIOR: *Based on the Warmest, Driest, Windiest Conditions Forecasted*

<u>Maximum Spotting Distance</u> Minimal <u>Probability of Ignition</u> 10 % or less	Fuel Type/Model	Maximum Rate of Spread (chains/hour)	Maximum Flame Length (feet)
	Timber understory (TU5-Overstocked and/or dense reprod)	Head 1-2 ch/hr Flank 0-1 ch/hr	Head 0-2 ft Flank 0-1 ft
	Timber litter (TL6-closed canopy, ground fuels)	Head 0-1 ch/hr Flank 0-1 ch/hr	Head 0-1 ft Flank 0-1 ft

General: This week's moisture continues to impact the fire area, with north aspects and higher elevation areas still under snow and/or wet ground. Exceptions may be heavy dead and down logs that may continue to smolder, with potential for creeping late week on the driest, most sun exposed south aspects. Humidity values in the 50's and lower sun angles/shorter days should further limit potential for fire growth.

SPECIFIC

KNP Complex

North: No forward fire progression is expected. Heavier fuels will continue to burn and some creeping should be expected under closed canopies.

South: No forward fire progression is expected. Heavier fuels will continue to burn and some creeping should be expected under closed canopies.

AIR OPERATIONS:

Minimal impacts to air operations anticipated during the forecast period.

SAFETY:

As you reengage the fire area later in the week, look out for deep smoldering root systems that may still contain heat.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day Shift: 11/01/21 0700 – 0700

INCIDENT: **KNP Complex** Date Prepared: Oct. 31, 2021 TIME: 1300

Extended transition We have been planning and building a plan, for turn back to the unit level to complete the suppression repair. Things are changing, insure you are familiar with what the plan is, and what is changing.
IF YOU DON'T KNOW ASK

Good and Bad Communication

Poor communication can exact a cost on your productivity, opportunities, and success. The problem increases when bad communication becomes habitual. Richard Nixon said "People are persuaded by reason, but moved by emotion; the leader must both persuade them and move them." Follow the 7 C's Clear, Concise, Concrete, Correct, Coherent, Complete and Courteous.

Major Hazards and Risks: Chain saws, hazard trees, wet surfaces, steep rugged terrain and driving.

TEAM WORK

Our success is due to the teamwork in supporting each other to complete the mission.

Duty, Respect, Integrity

Your resume says, 'Only you can prevent forest fires.' Listen, pal... we work as a team here.

Communication 101

Communication Responsibilities

All firefighters have five communication responsibilities:

- Brief others as needed
- Debrief your actions
- Communicate hazards to others
- Acknowledge messages
- Ask if you don't know

Leader's Intent

In addition, all leaders of firefighters have the responsibility to provide complete briefings and ensure that their subordinates have a clear understanding of their intent for the assignment:

- Task = What is to be done
- Purpose = Why it is to be done
- End State = How it should look when done

Thanks, from your Safety Team!!
Safety Officers: *Mike Seymour SOF2*

MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication :

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead. .

8. ADDITIONAL INFORMATION: Updates/Changes, etc. .

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively. .

COVID-19 Briefing Checklist

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Nick Stepanian @ (909) 908-4778

MEDL(T) Ellis Johnston @ (208) 390-2326

KNP COMPLEX COVID CARE CLINICS

What to expect:

- Wear a mask at all times
- Provide patient information
- Estimated Time for Testing: 30 minutes
- Rapid anti-gen self-tests provided
- PCR Tests available and may be required in certain situations as a follow-up to a rapid.

KNP ICP

California Wildland Fire Coordinating Group

Framework for Mandatory COVID Testing on Federal Fire Incidents in California

Due to the risk of spread of COVID-19 to individual fire personnel and modules, as well as the overall impact on firefighting capacity, the federal leadership of the California Wildland Fire Coordinating Group (CWCG) have decided to move forward with the intent of mandatory testing on all federal fire incidents in California, specifically type 1 and 2 wildfire incidents when logistically possible (e.g. personnel to support, testing available). This intention applies to all federal employees and federal contractors regardless of vaccination status and will be voluntary for partners and cooperators involved in a federal fire incident.

To date, the Department of Agriculture, Forest Service, Pacific Southwest Region, COVID-19 Emergency Response Team (CERT) implemented two mandatory pilot testing programs in California. The first pilot program was during the McFarland Fire on the Shasta-Trinity National Forest. The testing service was provided through a contract. The second pilot program was on the French Fire during unified command between the Bureau of Land Management and the Sequoia National Forest. Cal OES provided the testing service. These pilot programs provided many lessons to assist with more effective implementation on other fire incidents.

To implement this intent the CERT and a Point of Contact (POC) from each of the following Department of the Interior (DOI) agencies: Bureau of Indian Affairs, Bureau of Land Management, Fish and Wildlife Service and the National Park Service will coordinate and collaborate.

It is recognized that testing in and of itself is not a silver bullet, but it is an important tool in the suite of COVID mitigations to protect fire personnel, modules, and their families and friends when personnel return home from fire incidents. With increasing COVID cases over the past few months, and continued fire activity expected in the weeks and months ahead, we have decided this is a necessary tool until vaccine requirements for the federal workforce are fully implemented.

Mandatory Testing Intent & Framework

- Applies to all federal employees and federal contractors on type 1 and 2 wildfire incidents in California, regardless of vaccination status.
- Testing will be provided for partners and cooperators that volunteer or request testing, if testing capacity is available.
- The requirement for testing will be included in the resource order for those resources identified as available to fill orders.
- Refusal of COVID testing on incidents will be handled on a case-by-case basis by the employee's agency or the hiring agency of the federal contractor with participation on the incident not occurring until a resolution is identified.
- If there are logistical challenges (e.g. personnel support, testing availability) the CERT and DOI POCs will attempt to implement this intent in the following priority order: (1) test individuals upon arrival to an incident, (2) test individuals upon demobilization from an incident, (3) test individuals that are already assigned to an ongoing incident at frequencies recommended by the Centers for Disease Control and Prevention (CDC).

Suppression Rehabilitation Specifications

Goal— Overall line rehab goals are to reduce erosion and runoff potential and promote future plant growth. Walk through adjacent undisturbed area and take a look at your rehab efforts to determine your success at returning the area to as natural a state as possible.

Rehabilitate dozer lines and handlines after ops approval

- Pull back soil and cut vegetation. Remove berms. Restore slope contour.
- Install waterbars on slopes greater than 10%.

Fire line Gradient (% slope)	Distance Between Waterbars (feet)
0 to 10	no waterbars needed
10 to 20	100
21 to 40	75
41 to 60	50

- Dimensions: 6-18 inches tall. Steeper slopes require taller waterbars
- Angle: 30-45 degrees across fireline. Extend waterbar across entire fireline. Exit waterbar flow into the green.
- Block entrance of dozer lines with extra logs and vegetation to prevent access

Rehabilitate Helispots, Drop Points, and Staging Areas—rake back disturbed soil and scatter cut trees, shrubs, limbs, and logs over area. If called out by READs decompact soil as needed in the top 2-4".

Roads-Chip or masticate vegetation piles cut during suppression. Unclog culverts of dirt or vegetation if impacted by suppression.

Remove Trash—remove unnecessary microtrash, flagging/equipment and tools from along handlines, spike camps, helispots, drop points, and staging areas.

Work with Resource Advisors with questions, modifications to the specifications, and sign-off.

Hotel Acquisition Protocol

This guideline is only for acquiring hotel accommodation. Meals are still provided by the KNP incident from caterer and off-site meals are **not** authorized for reimbursement. Resources will follow their Agency of Hire direction as identified in the *Standards for Interagency Incident Business Management Handbook*, (4/2021) page 10-62, www.nwccg.gov/sites/default/files/publications/pms902.pdf.

Lodging Per Diem Rate per Incident: Must stay within per diem rate.

KNP COMPLEX - \$110.00 per night

- **Resources will utilize double occupancy (when appropriate) when acquiring rooms.**
 - Example is Resource A – 5 personnel may acquire 3 rooms (2 rooms with two crew members, 1 room with one crew member).
- **Federal Resources (Including AD's)**
 - Will follow Lodging policy of their Agency.
- **Local Government**
 - Will follow the State Agreement from which they are from.
 - CA – Work with Finance Section for S# request.
- **Contracted Resources**
 - Will follow Lodging rules within Agreement.
 - Provide receipt(s) for reimbursement on Invoice.
 - Make sure receipts are Itemized (not from credit card machine) and show a zero balance due.

HUMAN RESOURCES MESSAGE

Goose Fact

Geese honk from behind to encourage those up front to keep up the speed.

When a goose is incapacitated and falls out of formation, two geese fall out with it to help and protect it. They stay together until the goose can fly again, launching out on their own to catch up with their

Goose Lesson

Encouragement from the ranks leads to greater efficiencies in leadership.

People with goose sense stand by each other in times of adversity and challenge, recognizing the point is to achieve the goal safely and understanding they are a part of a larger effort.

If the team wins, we all had a good year. If we don't win, it doesn't matter who had a good year.

-Paul O'Neill

David Legrand,
