# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> ALISAL FIRE	<b>2. Operational Period:</b>	Date From: 10/22/2021 Time From: 0700	Date To: 10/26/2021 Time To: 0700
---	-------------------------------	--	--------------------------------------

**3. Objective(s):**

Leaders Intent:  
Utilize the best combination of point protection, direct and indirect tactics with mindful consideration of the values at risk and the probability of success of firefighting actions in order to meet incident objectives.

**Management Objectives**

- **SAFETY**  
Provide for firefighter and public safety as the highest priority through sound risk management and Life First Principles. The safety of fire personnel, the public, and the employees is the highest priority during all phases of the incident.  
  
Reduce the risk to public safety personnel from the potential hazards of COVID-19 through the implementation of CDC and agency guidance and coordination with Santa Barbara County Health Department. Immediately report all possible exposures.
- **PROPERTY**  
Minimize impacts and protect life and property (private residences and critical infrastructure) in the fire area.
- **NATURAL RESOURCES**  
Make reasonable efforts to protect natural and cultural resources while minimizing fire suppression impacts. Consult with the READs to identify sensitive natural and cultural resources at risk and coordinate all tactical operations.
- **RELATIONSHIPS**  
Maintain and develop relationships and partnerships with stakeholders, cooperators, community leaders/members, private landowners, and local agencies by coordinating incident management efforts through timely and accurate information sharing.
- **COST**  
Effectively manage cost by selecting and implementing strategies and tactics that have a high probability of success in meeting incident objectives.

**Control Objectives**

- Keep the fire within the current footprint.

# INCIDENT Weather Forecast

FORECAST NO: 9  
 PREDICTION FOR: 4 Day  
 SHIFT DATE: 10/22/21 to 10/25/21  
 FORECAST ISSUED: 10/21/21 @ 1700

NAME OF FIRE: Alisal  
 UNIT: USFS (LPF)  
 SIGNED: Rich Thompson  
 Incident Meteorologist

**WEATHER DISCUSSION:** Partly cloudy and slightly cooler conditions will prevail through the operation period. Afternoon relative humidity will drop into the 35-55% range at higher elevations with slightly higher relative humidity at lower elevations. Northerly winds will prevail in the morning and evening hours with some upvalley winds in the afternoon hours.

### WEATHER FORECAST FOR TODAY:

**WEATHER:** Partly cloudy.

**MAX TEMPERATURES:** 64-72.

**MIN HUMIDITY:** Above 1000 feet: 35-55%.  
Below 1000 feet: 50-70%.

**20 FT WINDS:**

**RIDGETOP -**

0700-1100: Northwest to north 8-15 MPH Gust 20-25 MPH.  
 1100-1700: West to northwest 5-10 MPH Gust 12-18 MPH.  
 1700-1900: Northwest to north 10-18 MPH Gust 20-30 MPH.

**SLOPE/VALLEY -**

0700-0900: Northwest to north 8-15 MPH Gust 20-25 MPH.  
 0900-1700: Upvalley 6-12 MPH Gust 12-18 MPH.  
 1700-1900: Northwest to north 10-18 MPH Gust 20-30 MPH.

### WEATHER FORECAST FOR SATURDAY:

**WEATHER:** Partly cloudy.

**MAX TEMPERATURES:** 62-70.

**MIN HUMIDITY:** Above 1000 feet: 30-50%.  
Below 1000 feet: 40-60%.

**20 FT WINDS:**

**RIDGETOP -**

0700-1700: Northwest to north 10-18 MPH Gust 20-30 MPH.  
 1700-1900: Northwest to north 15-25 MPH Gust 30-40 MPH.

**SLOPE/VALLEY -**

0700-1700: Northwest to north 6-12 MPH Gust 15-25 MPH.  
 1700-1900: Northwest to north 10-20 MPH Gusts 25-35 MPH.

### EXTENDED OUTLOOK:

**SUNDAY:** Mostly cloudy. A chance of rain late in the afternoon. Highs 58-68. Min RH 50-70%. Northwest to north winds 6-12 MPH Gust 15-20 MPH becoming south to southwest 8-15 MPH Gust 20-25 MPH in the afternoon.

**MONDAY:** Cloudy with rain. Rain possibly heavy at times. Highs 56-66. Min RH: 60-80%. Southeast to south winds 10-20 MPH Gust 25-35 MPH.

## AuFIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 9 - 13	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Alisal	<b>OPERATIONAL PERIOD:</b> 10/21-25/21
<b>DATE &amp; TIME ISSUED:</b> October 19, 2021	<b>TIME ISSUED:</b> 1700
<b>UNIT:</b> Los Padres NF	<b>SIGNED:</b> <i>Isl Patrick Doyle, FBAN</i>

### INPUTS

**WEATHER SUMMARY:** \*\*\* See Fire Weather Forecast for Details (see previous page) \*\*\*

**Seasonal conditions** – extreme drought conditions, below average precipitation for the month (25-50% normal) and the calendar year (50-70%) add up to decreased fuel moisture conditions (live fuel moistures 50-60%). This condition will prevail with similar temperatures, moderate daytime humidity and nighttime recovery rates from Wednesday through Sunday over fire. Precipitation on Sunday-Monday will reduce fire risk for a short-period and improve dead fuel moistures.

**Fuels:** Lower slopes consist of grasses and coastal sage scrub, with riparian vegetation in the draws. Most of the ridges consist of chaparral (chamise, manzanita, etc), interspersed with riparian vegetation. Fuel consumption was spotty and incomplete in patches or islands in the burned area above 1000' feet on the southside of ridge, below that fuel consumption has mostly complete with minimal activity on lower slopes. On north aspect of ridge, cooler oak woodlands with some chaparral areas have slowed fire spread.

Refugio RAWs (45223) Trend:	10 / 21 (Thu)	10 / 22 (Fri)	10 / 23 (Sat)	10 / 24 (Sun)	10 / 25 (Mon.)
ERC	15	16	16	16	0
FM100 (1 to 3 inches diameter)	13	13	14	13	17
FM1000 (3 to 8 inches diameter)	12	12	12	13	14
Probability of Ignition - % (unshaded / shaded)	36/ 33	36/ 32	41/ 38	31/ 28	16 / 14

### OUTPUTS

**GENERAL:**

Overall, fire behavior will be minimal, except for interior pockets of residual heat spreading to available vegetation and duff that may smoke and flareup. This activity will primarily occur on the upper slopes of Burch Mt. - South Pk. where fire is burning in timber litter and some riparian vegetation. Any new ignitions outside in lower slopes/valley, expect rapid rates of spread where alignment of wind, slope, fuels, and aspect. This will also increase potential torching and crowning, and spotting where it could occur.

Fuel Type (13 & 40)	Max. Rate of Spread (ch/hr)	Max. Flame Length (ft)	Spotting Distance (mi)
Grass (GR2), Dry Climate Grass	68	Up to 6 ft.	<0.2
Shrub (SH5), High Load, Dry Climate Shrub	105	Up to 18 ft.	<0.5
Timber (TL9) Very High Load Broadleaf Litter	12	Up to 5 ft.	<0.2

**SPECIFIC FIRE BEHAVIOR:**

**Wednesday- Monday, October 21-25, 2021**

**Lower slopes and drainages:**

Little to no fire activity overall. Some isolated heat will continue to smolder, consume dead and down fuels with seasonally low fuel moistures in riparian vegetation in east flowing drainages on northern portion of fire. Watch out for any new activity near edge of fire that may threaten containment lines. Even though fire activity is greatly diminished, unseen small interior pockets of heat in lower slope drainages may flare up if available fuel is found but will diminish over the next 5-days as the very little heat and fuel available. What is left will become less available as heat goes out from suppression, consumption, or nighttime fuel moisture recovery.

**Upper slopes:**

Very little-to-minimal fire activity will occur on upper slopes of fire, most isolated heat and activity will be in the timber stands near the ridgetop or unburned/partially burned islands on the west-end of ridge near DP-40. Due to gradually drying conditions, below average precipitation and extreme drought conditions expect smoldering duff, dead & down fuels with heat in them, such as stump-holes and interior islands to continue burning without suppression. Most will be interior and will not have much, if any potential, but ... aggressively suppress any new heat found near fires edge to mitigate any potential threats to containment.

### AIR OPERATIONS

Gusty winds can potentially impair aerial support to ground resources, for fire activity support or if medivac is needed.

### SAFETY

As fire activity winds down, do not let your guard down. Make sure work area is assessed for fire weakened trees and potential rolling hazards (such as rocks & logs) when mopping up and repair work.

**6. Work Assignments:**  
**TASK:** Patrol, monitor, and mop up from DIV E break to DIV J break along Hwy 101. Cold trail fire's edge. Use direct line to stop fire where needed and tie heat sources back to cold black.  
**PURPOSE:** Extinguishment to stop any potential spread and eliminate all heat signatures.  
**END STATE:** Control of the Alisal Fire.

**7. Special Instructions:**  
 Avoid sensitive resource areas identified by ORA / WHI stripe "Special Treatment Zone" flagging. Talk to a READ for further guidance. Coordinate with READS for suppression repair.

**8. Communications**

# Alisal Fire Safety Message

10/21-26/2021

***“SEE IT....SAY IT!”***

*If you see a hazard or a dangerous situation developing,  
tell your supervisor and those around you.*

## Crew Safety Is Dependent Upon Competent And Confident Leadership

**Every Incident Supervisor Has The Responsibility To Confirm That Safe Practices Are Known  
And Observed**

- **TAKE CHARGE** of assigned resources
- **MOTIVATE** crew members with a “can do” safety attitude
- **DEMONSTRATE INITIATIVE** by taking action in the absence of orders
- **COMMUNICATE** by giving specific instructions and asking for feedback
- **SUPERVISE** at the scene of the action

### **Major Hazards and Risks:**

**ENVIRONMENTAL HAZARDS** – Be watchful for Bears, Mountain Lions, Rattlesnakes, Bees, and other insects that bite or sting. Don't leave food out and haul out your trash daily. Look before you step or place hands on the ground. Identify who on your crew is allergic to Bees and ensure medication is available. Don't touch any dead animals as they may have disease.

**DRIVING** – Defensive Driving techniques. Drive at posted or slower speed limits as conditions warrant. Be prepared for sudden, unexpected stops and expect the unexpected. Watch for sidewall damage from rocks. Night driving best to use low beams in smoke and or dust, with narrow roads pull to the right to let vehicles pass and use parking lights or daylight.

**HAZARD TREES** – Watch fire weaken trees such as Oaks, Sycamore and Eucalyptus trees. Remove hazard trees and or flag off area and inform crews working around your division. Don't take breaks around hazard tree areas, watch weather events around fire weakened trees.

## MEDICAL PLAN (ICS 206)

<b>1. Incident Name:</b> <p style="text-align: center;"><b>ALISAL FIRE</b></p>	<b>2. Operational Period:</b> Date From: 10/22/21 Date To: 10/26/21 Time From: 0700 Time To: 0700

Prepared By (Communications Unit Leader)  
**LPF Communications Center: (805) 961-5727**

Incident Location: SANTA BARBARA County, Santa Barbara State: CA  
 Forest / Unit / Jurisdiction: Los Padres NF  
 Latitude: " N Longitude: W

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

# COVID-19 Testing & Voluntary Vaccinations

Mandatory Federal Mobilization and Demobilization testing

COVID testing and voluntary vaccinations available to all personnel free of charge.

**WHEN:**

Monday, 10/18—Saturday, 10/23

**HOURS:**

Testing

Monday—Friday, 0730—1600

Saturday, 0730—1000

Vaccinations

Monday—Thursday, 0800—1100

Friday, 10/22, 1600—1900

**WHERE:**

El Capitán State Beach

34.46323, -120.0320

COVID testing & vaccination clinic

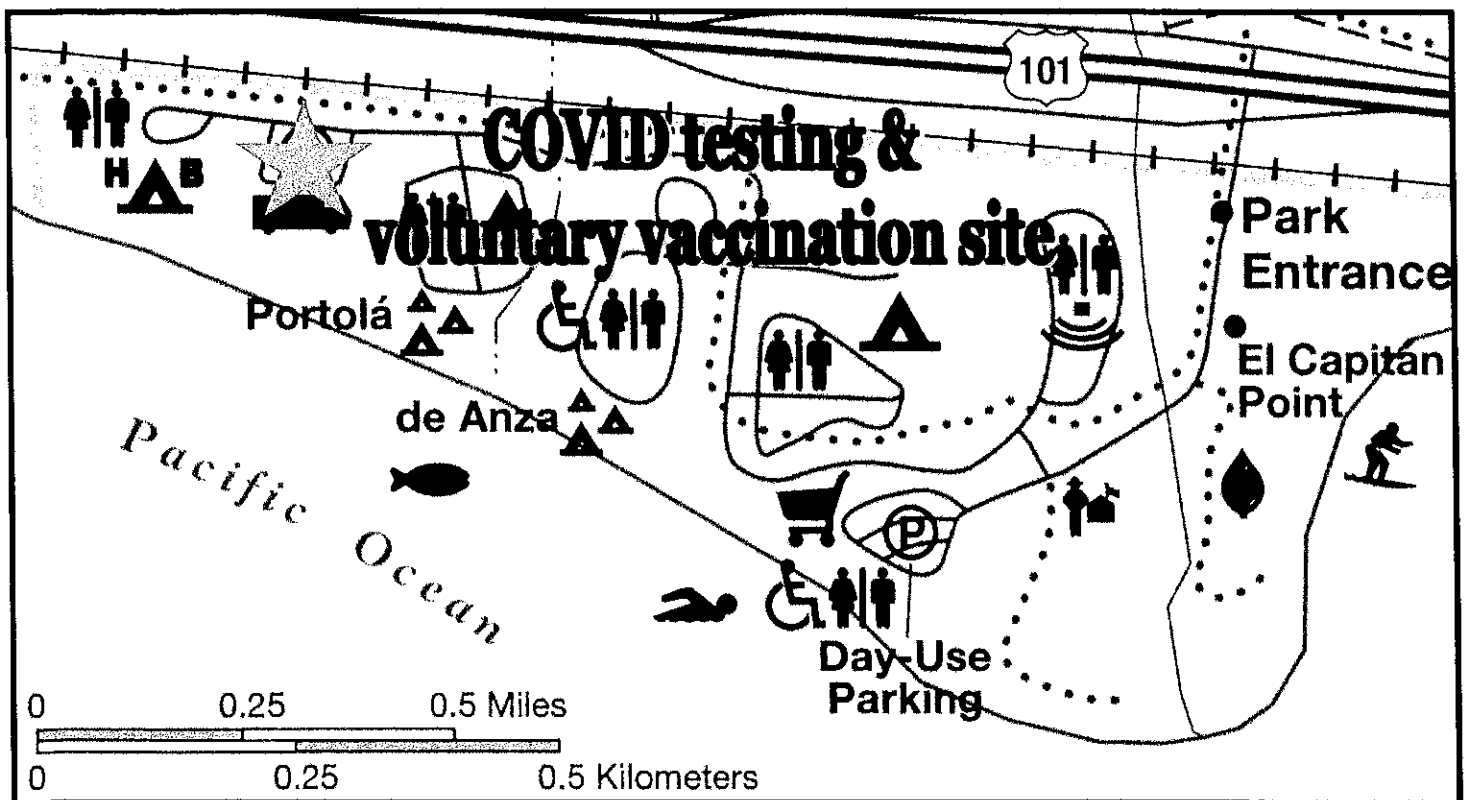

**DIRECTIONS:**

Upon arriving at the park follow signs for testing.

**VACCINES AVAILABLE:**

Pfizer

Johnson & Johnson
