

# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> ALISAL FIRE	<b>2. Operational Period:</b>	Date From: 10/15/2021	Date To: 10/16/2021
		Time From: 0700	Time To: 0700

**3. Objective(s):**

Leaders Intent:  
Utilize the best combination of point protection, direct and indirect tactics with mindful consideration of the values at risk and the probability of success of firefighting actions in order to meet incident objectives.

**Management Objectives**

- **SAFETY**  
Provide for firefighter and public safety as the highest priority through sound risk management and Life First Principles. The safety of fire personnel, the public, and the employees is the highest priority during all phases of the incident.  
  
Reduce the risk to public safety personnel from the potential hazards of COVID-19 through the implementation of CDC and agency guidance and coordination with Santa Barbara County Health Department. Immediately report all possible exposures.
- **PROPERTY**  
Minimize impacts and protect life and property (private residences and critical infrastructure) in the fire area.
- **NATURAL RESOURCES**  
Make reasonable efforts to protect natural and cultural resources from high-intensity fire while minimizing fire suppression impacts. Consult with the READs to identify sensitive natural and cultural resources at risk and coordinate all tactical operations.
- **RELATIONSHIPS**  
Maintain and develop relationships and partnerships with stakeholders, cooperators, community leaders/members, private landowners, and local agencies by coordinating incident management efforts through timely and accurate information sharing.
- **COST**  
Effectively manage cost by selecting and implementing strategies and tactics that have a high probability of success in meeting incident objectives.

**Control Objectives**

- Keep the fire North of Pacific Ocean
- Keep the fire South of Alisal Lake
- Keep the fire East of US Hwy 101
- Keep the fire West of DP Canyon

**5. Site Safety Plan Required?** Yes  No

### FIRE BEHAVIOR

- GENERAL:**
- Fire activity will be picking up as expected for a diurnal burn period, with increased activity indicator's showing between 11am-1pm, with torching and potential for spotting increasing significantly after 1-2pm. Southerly winds during this period will provide wind/slope/aspect alignment for activity on westside of Alisal fire.
  - Live fuel moistures from the Refugio sampling site are around 50%, well below critical levels
  - Watch out for multiple wind-switches today, with greater upslope diurnal influence today.

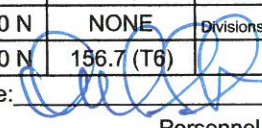

- SPECIFIC:**
- DIV L & T:** Fire spread will continue to look for opportunities to flank to the west. Particularly in midslope area where rock formations and less dense fuel composition is more receptive to surface spread. Watch out for this evening winds switching around sunset to E/NE with downslope winds below the ridge.
- DIV A:** Minimal to moderate activity depending on patches or islands of unburned fuel. Watch out for upslope activity near ridgetop with flareups, torching or running sending spots across the line. Extremely dry fuels. Expect with lower windspeed then yesterday, fire will be backing-flanking more actively especially in chaparral, midslope-to-ridgetop.
- DIV E & J:** Pockets of fuels and hold-over heat will continue to provide challenges today. Watch out for fire activity in hardwoods (Coastal Live oak) for fire-weakened trees and holding heat without showing.
- DIV 101 Group:** Minimal activity. Smoldering and creeping in isolated pockets of fuels and jackpots.

**AIR OPERATIONS:** Clear skies after inversion lifting in afternoon.  
 Sunrise: 7:04am, Sunset: 6:23pm      Day length: 11hr 19min

**SAFETY:** Standard Firefighting Order #3- "Base all actions on current and expected behavior of the fire." Don't base all of your actions on the current "smoldering and creeping", base your actions on the expectation that if there is spot, roll out or an escape, fire behavior will be "moderate to high".

## ***SAFETY MESSAGE***

*Fire fighter safety comes first on every fire, every time*

**QRF Night Heli Ops:** Three type-1 helicopter comprise this group of Quick Response Force aircraft. They are tanked helicopters with 2000–3000-gallon capacity and are retardant capable. The pilots utilize night vision goggles. They are able to determine where heat is and also differentiate between fire heat and a human form on the landscape during night operations. Keep an appropriately safe distance from all helicopter water drop whether day or night. The consequences of a direct hit to a human could be deadly. Post-drop areas will be wet and slippery and retardant areas even more so. Move away from being below these large drops to avoid being swept downhill.

### **Downhill Line Construction:**

Before accepting an assignment where downhill line construction will be used review the IRPG Checklist for Downhill Line Construction on Page 9.

#### **Consider these critical points below:**

Have a candid discussion with overhead and your crew before committing to the assignment.

Use experienced personnel to scout the project before committing. Be sure to utilize **LCES** for all personnel including your lookout.

Use direct line, one foot in the black, if possible and if indirect line is constructed complete all line before firing.

Avoid chutes or chimneys

Ground truth escape routes to safety zones before committing to the mission.

When in doubt find a different tactic that works.

**Hazmat Sites:** Within the Alisal fire foot print we have one known HazMat Site at the Recovery Facility. This area is off limits to everyone but the necessary personnel. **STAY AWAY!!!**

For other location keep these items in mind:

- Think safety first and foremost. Assess the situation and make that appropriate contacts.
- Attempt to identify substance using 2112 ERA, use binoculars to remain at a distance.
- Anticipate weather influences. Precipitation and wind could enlarge the scene.
- Establish command and assign a dedicated safety officer.
- Communicate changes and make special note of responder exposures.
- Use the “thumb” rule if unclear on safe distances to isolate.
- Position vehicles facing away from the scene to make an organized rapid exit if needed.
- Develop a plan of action for area security.
- Use Pages 36-37 of IRPG on HazMat Incident Operations for a more complete list of step-by-step best practices.

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.

**Medical Incident Report**

FOR **ANON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)  
*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.)  
 "This will be the Trout Meadow Medical Incident, IC is TFLDJones. EMT Smith is providing medical care."*

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> – 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> – 3<sup>o</sup> burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Crew Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES)                      Federal                      Contractor                      Local Government

Patient Assessment:                      Age:                      Weight:                      Chief Complaint:
