<b>Date and Time Products Delivered to Incident:</b> 20210903 0100PDT		<b>Digital files sent to:</b> <a href="http://Ftp.wildfire.org">Ftp.wildfire.org</a>	
<b>Comments /notes on tonight's mission and this interpretation:</b> The WFGIS perimeter from 31 August was used as a starting point for this interpretation. The fire area is comprised of many scattered heat sources with smaller areas of intense heat where the perimeter is growing. These areas are near where Div Y and Div R meet, Div M between H6 and Soda Dip, and in the southern half of Div Y.  Please contact me if you have questions or concerns-AJP
