3. Objective(s):

Strategic Framework

Implement a full suppression strategy on the KNP Complex and Windy Fire. Values at risk include human safety, communities, Sequoia Groves, critical infrastructure, associated improvements, and wilderness values. Apply tactics that offer the highest probability of success commensurate with resource availability.

Leaders Intent

Provide the highest level of customer service to all involved with or impacted by the KNP Complex and Windy Fire. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct, and timely/effective communication.
- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by minimizing large group settings, social distancing, wearing face coverings, and handwashing.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Make risk-informed decisions to minimize fire impacts to Sequoia Groves.
- Coordinate suppression activities with assigned incident Resource Advisors and Tribal Advisors to minimize impacts to Sequoia Groves, wilderness, natural and cultural resources. Utilize Minimal Impact Suppression Tactics (MIST) where appropriate.
- Implement suppression repair activities in accordance with the suppression repair plans and Incident Resource Advisors.

Control Objectives

Branch I KNP Complex
 To prevent the fire from spreading to private property, surrounding communities, Sequoia Groves, wilderness, and values at risk, keep the fire:

- North, South, and East of established containment lines.
- West of Redwood Meadow Grove confined to areas with natural barriers

Branch III Windy Fire
 To prevent the fire from spreading to public and private property on the Tule River Reservation, surrounding communities, Sequoia Groves, natural and cultural values at risk, keep the fire:

- North, South, and West of established containment lines.
- East of established containment lines and within its currently identified perimeter.

STABILITY/INVERSION: Valley inversion including the San Joaquin Valley remains in place throughout the day.

WEDNESDAY:

WEATHER: Dry conditions are expected with a mostly clear sky.

MAX TEMPERATURES: 65-70 below 5 kft including the Kern River Valley. 55-60 at higher elevations.

MIN HUMIDITY: 50-55% across most of the fire; 35-40% along the eastern slopes/Kern River Valley.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 39	TYPE OF FIRE: Vegetation
FIRE NAME: KNP Complex	OPERATIONAL PERIOD: Oct 25 th -Oct 29 th
DATE ISSUED: October 24 th	TIME ISSUED: 1700
UNIT: Sequoia Kings National Park, Tule River Indian Reservation, Sequoia National Forest	SIGNED: Dan O'Connor Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

The most notable vegetation is forests of giant sequoia (*Sequoiadendron giganteum*). Oak woodland (blue oak, interior live oak) and chaparral with chamise and manzanita characterize the lower elevations. Mixed conifer forest with Colorado white fir, red fir, western yellow pine (ponderosa pine), sugar pine and lodgepole pine forests and montane meadows occupy the middle elevations. Subalpine forests with foxtail pine, whitebark pine and meadows, krummholz, and alpine ecosystems typify the higher elevations. A combination of prescribed and resource benefit fire patches exist throughout the Park and National Forest. Tulare County is currently classified as 'Exceptional' by the US Drought Monitor mapping system impacting both live and dead fuels.

EXPECTED FIRE BEHAVIOR: *Based on the Warmest, Driest, Windiest Conditions Forecasted*

<u>Maximum Spotting Distance</u> Minimal <u>Probability of Ignition</u> 10 % or less	Fuel Type/Model	Maximum Rate of Spread (chains/hour)	Maximum Flame Length (feet)
	Timber understory (TU5-Overstocked and/or dense reprod)	Head 0-1 ch/hr Flank 1-2 ch/hr	Head 0-1 ft Flank 0-2 ft
	Timber litter (TL6-closed canopy, ground fuels)	Head 0-1 ch/hr Flank 0-1 ch/hr	Head 0-1 ft Flank 0-1 ft

General: Today's rain will have a substantial impact on fire growth across the fire area for the week. Higher elevation areas may become inaccessible due to snow and lower elevations will receive adequate moisture to stop or slow fire spread for the foreseeable future. Exceptions may be heavy dead and down logs that may continue to smolder, with potential for creeping late week on the driest, most sun exposed south aspects.

SPECIFIC

KNP Complex

North: No forward fire progression is expected. Heavier fuels will continue to burn and some creeping should be expected under closed canopies.

South: No forward fire progression is expected. Heavier fuels will continue to burn and some creeping should be expected under closed canopies.

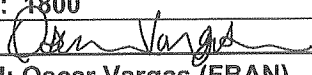

AIR OPERATIONS:

Active storm conditions will limit air operations today, with less impacts as the storm moves out later into the week.

SAFETY:

As you reengage the fire area later in the week, look out for deep smoldering root systems that may still contain heat.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 40 Extended	TYPE OF FIRE: Wildfire
FIRE NAME: Windy Fire	OPERATIONAL PERIOD: 10/26-28, DAY-NIGHT Shift
DATE ISSUED: October 25, 2021	TIME ISSUED: 1800
UNIT: CA-TIA & CA-SQF	SIGNED: 
	Typed/printed: Oscar Vargas (FBAN)

INPUTS

WEATHER SUMMARY:

- Sunny weather for 10/26, 10/27, 10/28
- Warming and drying trend over the next 3 days
- Afternoon gusts around 20-25 mph possible in some areas

See Fire Weather Forecast for daily weather details

FUELS SUMMARY: Dense mixed conifer, old-growth timber, heavy down/dead, mixed ground fuels

TOPGRAPHY SUMMARY: Steep to very steep

OUTPUTS

GENERAL FIRE BEHAVIOR:

Fire behavior in most areas will be minimal due to rain and snow in the past few days however there will still be areas that are smoldering in heavy dead fuels that have been sheltered or burning on the inside. Smoldering is expected to increase as conditions warm and dry out.

- Slight fire behavior potential increase over the next few days as fuels begin to dry but will remain low due to recent rain and snow
- Low intensity burning in heavy down/dead
- Rates of spread will be none or minimal depending on alignment of wind, slope & available fuels
- ERCs between Low and Average conditions during this period with highest ERCs around 41
- Probability of ignition around 50% or less but will slightly increase by 10/28
- Smoldering could remain active at night in areas that are holding heat in heavy fuels, especially in areas exposed to winds.

Spotting distances potential: spotting potential is minimal to none

Min. Fine Dead Fuel Moistures ranges: 1 hr.= 6-8-%, 10 hr.= 7-10%, 100hr= 12+% 1000hr.= 13+%

** Rain has dramatically increased dead fuel moistures.

Ground and Air resources continue to have a dramatic influence over fire behavior & growth potential. Containment lines are continuing to hold the fire in place.

AIR OPERATIONS:

Smoke or Inversions are not a factor or limitation

Fire weakened trees are still a high hazard and rain/snow has made it worse in some trees so HEADS UP!
Logs and other heavy fuels could be very unstable on hillsides due to fire & rain impacts so HEADS UP!

Hazards & Risks

Post Weather Event Considerations: Following the “atmospheric river” rain event. It will be necessary to carefully survey road conditions and the fire area for new hazards that may be present. Establishing a scouting group prior to releasing line resources back into their divisions may be an option to consider. Rock & mud slides, downed trees, flooded roads, SNOW & ICE are just a few hazards to look out for.....

Is your truck S.E.C.U.R.E.?

Set parking bra

Environmental hazards mitigated

Chock the wheels

Under carriage inspected

Roll up windows

Ensure equipment is safe to leave

What do you look for in a fireline parking spot? Look up, look down, look all around.

- Look for cold black, bare soil, sparsely vegetated areas, plowed fields, or other natural or humanmade barriers. Be careful to not get stuck in soft soils.
- Complete a walk around looking for ash pits, penetrating stobs, unburned adjacent fuel, snags, or other hazards that may damage the apparatus.
- Do not block the access or egress of others. Be careful to not block dozer lines, safety zones, or helispots. Back in and face your danger when turning around. Chock your tires.

California Wildland Fire Coordinating Group

Framework for Mandatory COVID Testing on Federal Fire Incidents in California

Due to the risk of spread of COVID-19 to individual fire personnel and modules, as well as the overall impact on firefighting capacity, the federal leadership of the California Wildland Fire Coordinating Group (CWCG) have decided to move forward with the intent of mandatory testing on all federal fire incidents in California, specifically type 1 and 2 wildfire incidents when logistically possible (e.g. personnel to support, testing available). This intention applies to all federal employees and federal contractors regardless of vaccination status and will be voluntary for partners and cooperators involved in a federal fire incident.

To date, the Department of Agriculture, Forest Service, Pacific Southwest Region, COVID-19 Emergency Response Team (CERT) implemented two mandatory pilot testing programs in California. The first pilot program was during the McFarland Fire on the Shasta-Trinity National Forest. The testing service was provided through a contract. The second pilot program was on the French Fire during unified command between the Bureau of Land Management and the Sequoia National Forest. Cal OES provided the testing service. These pilot programs provided many lessons to assist with more effective implementation on other fire incidents.

To implement this intent the CERT and a Point of Contact (POC) from each of the following Department of the Interior (DOI) agencies: Bureau of Indian Affairs, Bureau of Land Management, Fish and Wildlife Service and the National Park Service will coordinate and collaborate.

It is recognized that testing in and of itself is not a silver bullet, but it is an important tool in the suite of COVID mitigations to protect fire personnel, modules, and their families and friends when personnel return home from fire incidents. With increasing COVID cases over the past few months, and continued fire activity expected in the weeks and months ahead, we have decided this is a necessary tool until vaccine requirements for the federal workforce are fully implemented.

Mandatory Testing Intent & Framework

- Applies to all federal employees and federal contractors on type 1 and 2 wildfire incidents in California, regardless of vaccination status.
- Testing will be provided for partners and cooperators that volunteer or request testing, if testing capacity is available.
- The requirement for testing will be included in the resource order for those resources identified as available to fill orders.
- Refusal of COVID testing on incidents will be handled on a case-by-case basis by the employee's agency or the hiring agency of the federal contractor with participation on the incident not occurring until a resolution is identified.
- If there are logistical challenges (e.g. personnel support, testing availability) the CERT and DOI POCs will attempt to implement this intent in the following priority order: (1) test individuals upon arrival to an incident, (2) test individuals upon demobilization from an incident, (3) test individuals that are already assigned to an ongoing incident at frequencies recommended by the Centers for Disease Control and Prevention (CDC).

HUMAN RESOURCES MESSAGE

Attitude is more important than facts.

It is more important than the past, than education, than money, than circumstances, than failures, than successes, than what other people think or say or do.

It is more important than appearance, giftedness or skill.

It will make or break a company...a team...a home.

The remarkable thing is we have choice every day regarding the attitude we will embrace for that day.

We cannot change the inevitable.

The only thing we can do is play on the one string we have, and that is our attitude.

Please exercise tolerance, show gratitude, practice compassion and exhibit leadership.

Just for today

- Do not have expectations about how you should be treated
- Be as friendly as you can to the people around you
- Do not insist that everything you do is perfect
- Be grateful for your health, your work, your family, your country

Riddle of the Day!!

What five-letter word becomes shorter when you add two letters to it?
