# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> KNP COMPLEX & WINDY FIRE	<b>2. Operational Period:</b>	Date From: 10/29/2021	Date To: 10/30/2021
		Time From: 0700	Time To: 0700

**3. Objective(s):**

**Strategic Framework**

Implement a full suppression strategy on the KNP Complex and Windy Fire. Values at risk include human safety, communities, Sequoia Groves, critical infrastructure, associated improvements, and wilderness values. Apply tactics that offer the highest probability of success commensurate with resource availability.

**Leaders Intent**

Provide the highest level of customer service to all involved with or impacted by the KNP Complex and Windy Fire. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct, and timely/effective communication.
- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by minimizing large group settings, social distancing, wearing face coverings, and handwashing.

**Management Objectives**

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Make risk-informed decisions to minimize fire impacts to Sequoia Groves.
- Coordinate suppression activities with assigned incident Resource Advisors and Tribal Advisors to minimize impacts to Sequoia Groves, wilderness, natural and cultural resources. Utilize Minimal Impact Suppression Tactics (MIST) where appropriate.
- Implement suppression repair activities in accordance with the suppression repair plans and Incident Resource Advisors.

**Control Objectives**

**Branch I KNP Complex**  
To prevent the fire from spreading to private property, surrounding communities, Sequoia Groves, wilderness, and values at risk, keep the fire:

- North, South, and East of established containment lines.
- West of Redwood Meadow Grove confined to areas with natural barriers

**Branch III Windy Fire**  
To prevent the fire from spreading to public and private property on the Tule River Reservation, surrounding communities, Sequoia Groves, natural and cultural values at risk, keep the fire:

- North, South, and West of established containment lines.
- East of established containment lines and within its currently identified perimeter.

**INCIDENT Weather Forecast**

**FORECAST NO:** 43  
**PREDICTION FOR:** 0700 Fri - 0700 Sat  
**SHIFT DATE:** October 29-30, 2021  
**FORECAST ISSUED:** 1800 Thursday October 27

**NAME OF FIRE:** KNP Complex  
**UNIT:** CA-KNP  
**SIGNED:** Chris Foltz  
**Incident Meteorologist**

**WEATHER DISCUSSION**

Temperatures will be very similar today as compared to Thursday but humidity values will be a few percent lower with light terrain driven winds prevailing. A weak low pressure system will move over northern California this weekend bringing an increase in winds and clouds which will result in cooler temperatures. However, no precipitation is expected.

**.FRIDAY...**

Sky/weather.....Patch fog possible at lower elevations. Otherwise, partly cloudy.  
Max temperature.....Lower Elevations 66-76. Upper Elevations 58-68.  
Min humidity.....Lower Elevations 36-46%. Upper Elevations 28-38%.  
Wind (20 ft).....  
    Slope/valley.....Upslope/upcanyon 3-8 mph. Gusts to 12 mph in the afternoon.  
    Ridgetop.....North 3-7 mph.  
Mixing height.....Increasing to around 3000 ft AGL.  
Transport winds.....West around 5 mph.

**.FRIDAY NIGHT...**

Sky/weather.....Partly cloudy.  
Min temperature.....Lower Elevations 46-56. Upper Elevations 31-41.  
Max humidity.....Lower Elevations 65-75%. Upper Elevations 60-70%.  
Wind (20 ft).....  
    Slope/valley.....Downslope/downcanyon 2-7 mph.  
    Ridgetop.....Northeast 3-7 mph.  
Mixing height.....Lowering to around 500 ft AGL.  
Transport winds.....Northeast around 5 mph.

**.SATURDAY...**

Sky/weather.....Partly cloudy.  
Max temperature.....Lower Elevations 56-66. Upper Elevations 45-55.  
Min humidity.....Lower Elevations 42-52%. Upper Elevations 33-43%.  
Wind (20 ft).....  
    Slope/valley.....Upslope/upcanyon 3-8 mph. Gusts to 12 mph in the afternoon.  
    Ridgetop.....North 3-7 mph.  
Mixing height.....Increasing to around 3000 ft AGL.  
Transport winds.....West around 5 mph.

# Windy Incident Weather Forecast

**ORECAST NO:** 48  
**REDICTION FOR:** Friday  
**HIFT DATE:** 10/29-10/30 (0700-0700)  
**ORECAST ISSUED:** 10/28/21 @ 1700

**FIRE NAME:** Windy  
**UNIT:** CA-TIA  
**SIGNED:** Chris Foltz  
**Incident Meteorologist**

**WEATHER DISCUSSION:** High pressure over the region today bringing a mostly clear sky and light winds except for the usual gusts in the Kern River Valley. Temperatures will be above normal once again today with good overnight RH recoveries and moderate afternoon minimum RH values. Clouds will begin to increase on Saturday resulting in slightly cooler temperatures. No precipitation is expected.

## WEATHER FORECAST:

### ODAY:

**WEATHER:** Dry conditions are expected with a mostly clear sky.

**MAX TEMPERATURES:** 69-74 below 5 kft including the Kern River Valley. 63-68 at higher elevations.

**MIN HUMIDITY:** 35-40% across most of the fire; 25-30% along the eastern slopes/Kern River Valley.

### 10 FT WINDS:

**RIDGETOP -** Downslope/downvalley 2-4 mph, then upslope/upvalley to northwest at 6-10 mph after 1000. Afternoon gusts around 15 mph.

**SLOPE/VALLEY -** Downslope/downvalley 2-4 mph, then upslope/upvalley 6-10 mph after 1000. Afternoon gusts to 12 mph. Gusts to 25 mph along the Kern River.

**STABILITY/INVERSION:** Valley inversion including the San Joaquin Valley through 1000.

### SATURDAY:

**WEATHER:** Slightly cooler. Dry conditions are expected with scattered clouds.

**MAX TEMPERATURES:** 64-69 below 5 kft including the Kern River Valley. 59-64 at higher elevations.

**MIN HUMIDITY:** 45-50% across most of the fire; 25-30% along the eastern slopes/Kern River Valley.

### 10 FT WINDS:

**RIDGETOP -** Downslope/downvalley 2-4 mph, then upslope/upvalley to northwest at 6-10 mph after 1000. Afternoon gusts around 15 mph.

**SLOPE/VALLEY -** Downslope/downvalley 2-4 mph, then upslope/upvalley 6-10 mph after 1000. Afternoon gusts to 12 mph. Gusts to 25 mph along the Kern River.

**STABILITY/INVERSION:** Valley inversion including the San Joaquin Valley through 1000.

**OUTLOOK FOR SUNDAY THROUGH TUESDAY:** A weak storm system will continue to move across northern California into early next week. The main impact for the Windy Fire will be cooler temperatures and increasing cloud cover and winds. No precipitation is expected.

### Incident Weather Station Data --- SCAN CODE with Smart Phone

Porterville – Porterville Camp  
 Johnsondale – sheltered basin  
 Peppermint – upper eastern slope

Kern Co. Landfill – Camp 9  
 Sugarloaf Dr – northern slope  
 Pine Flat (UHL) – lower western slope

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 39	<b>TYPE OF FIRE:</b> Vegetation
<b>FIRE NAME:</b> KNP Complex	<b>OPERATIONAL PERIOD:</b> Oct 25 <sup>th</sup> -Oct 29 <sup>th</sup>
<b>DATE ISSUED:</b> October 24 <sup>th</sup>	<b>TIME ISSUED:</b> 1700
<b>UNIT:</b> Sequoia Kings National Park, Sequoia National Forest	<b>SIGNED:</b> Dan O'Connor Fire Behavior Analyst (FBAN)

**WEATHER SUMMARY:** See detailed Fire Weather Forecast in IAP

### FUELS:

The most notable vegetation is forests of giant sequoia (*Sequoiadendron giganteum*). Oak woodland (blue oak, interior live oak) and chaparral with chamise and manzanita characterize the lower elevations. Mixed conifer forest with Colorado white fir, red fir, western yellow pine (ponderosa pine), sugar pine and lodgepole pine forests and montane meadows occupy the middle elevations. Subalpine forests with foxtail pine, whitebark pine and meadows, krummholz, and alpine ecosystems typify the higher elevations. A combination of prescribed and resource benefit fire patches exist throughout the Park and National Forest. Tulare County is currently classified as 'Exceptional' by the US Drought Monitor mapping system impacting both live and dead fuels.

### EXPECTED FIRE BEHAVIOR: *Based on the Warmest, Driest, Windiest Conditions Forecasted*

<u>Maximum Spotting Distance</u> Minimal <u>Probability of Ignition</u> 10 % or less	Fuel Type/Model	Maximum Rate of Spread (chains/hour)	Maximum Flame Length (feet)
	Timber understory (TU5-Overstocked and/or dense reprod)	Head 0-1 ch/hr Flank 1-2 ch/hr	Head 0-1 ft Flank 0-2 ft
	Timber litter (TL6-closed canopy, ground fuels)	Head 0-1 ch/hr Flank 0-1 ch/hr	Head 0-1 ft Flank 0-1 ft

**General:** Previous rain will have a substantial impact on fire growth across the fire area for the week. Higher elevation areas may become inaccessible due to snow and lower elevations will receive adequate moisture to stop or slow fire spread for the foreseeable future. Exceptions may be heavy dead and down logs that may continue to smolder, with potential for creeping late week on the driest, most sun exposed south aspects.

### SPECIFIC

#### **KNP Complex**

**North:** No forward fire progression is expected. Heavier fuels will continue to burn and some creeping should be expected under closed canopies.

**South:** No forward fire progression is expected. Heavier fuels will continue to burn and some creeping should be expected under closed canopies.

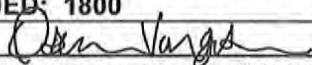

### **AIR OPERATIONS:**

No potential impacts to air operations.

### **SAFETY:**

As you reengage the fire area, look out for deep smoldering root systems that may still contain heat.

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 41 Extended	TYPE OF FIRE: Wildfire
FIRE NAME: Windy Fire	OPERATIONAL PERIOD: 10/29-31, DAY-NIGHT Shift
DATE ISSUED: October 28, 2021	TIME ISSUED: 1800
UNIT: CA-TIA & CA-SQF	SIGNED: 
	Typed/printed: Oscar Vargas (FBAN)

### INPUTS

#### WEATHER SUMMARY:

- Above normal temperatures 10/29 and then slight cooling trend thru 10/30 & 10/31
- Increasing clouds on Saturday and Sunday
- Afternoon gusts around 12-15 with gusts up to 25mph possible in some areas

\*\*See Fire Weather Forecast for daily weather details\*\*

**FUELS SUMMARY:** Dense mixed conifer, old-growth timber, heavy down/dead, mixed ground fuels

**TOPGRAPHY SUMMARY:** Steep to very steep

### OUTPUTS

#### GENERAL FIRE BEHAVIOR:

Fire behavior in most areas will remain minimal however there will be areas that will continue to smoke and smolder in heavy dead fuels and fuels that have been sheltered or burning on the inside. Smoldering is expected to increase as conditions continue to warm and dry out. Fire behavior potential will increase over the next few days as fuels continue to dry but clouds that provide shading over the fire will minimize fire behavior.

- Moderate intensity burning in heavy down/dead
- Rates of spread potential will be low to moderate depending on alignment of wind/gusts, slope & fuel moistures
- ERCs between Low and Average conditions during this period with highest ERCs around 41
- Probability of ignition around 50-65% in most areas but can more or less at your location
- Smoldering could remain active at night in areas that are holding heat in heavy fuels, especially in areas exposed to winds.
- Fine Dead Fuels will continue to dry out and could carry fire in some areas exposed to direct sunlight or steady winds
- You could start seeing smoke in areas that have been quite in the past few days

Spotting distances potential: spotting potential is minimal

Min. Fine Dead Fuel Moistures ranges: 1 hr.= 5-7-%, 10 hr.= 6-9%, 100hr= 11+% 1000hr.= 12+%

Ground and Air resources continue to have a dramatic influence over fire behavior & growth potential. Containment lines are continuing to hold the fire in place.

#### AIR OPERATIONS:

Smoke or Inversions are not a factor or limitation

There are deceptively quite areas on this fire....

Maintain positive situational awareness and situational intelligence to stay safe on the fireline

## Health & Safety Message

<b>Incident:</b> KNP Complex / Windy Fire CA-KNP-000122/ CA-TIA-003058	<b>Date/Op Period:</b> 10/29-30/21 Day Shift 0700-0700
---	---

### Hazards & Risks

**ATV/UTV Safety:** UTV & ATV's are great fireline tools to expedite equipment and personnel movement around more remote areas of the fire, HOWEVER there are regulations that govern the operation and safety of the vehicles. Operators (drivers) must have had the appropriate level of training by their agency. Also, per Forest Service:

*FS – UTV Helmet (for fire use) – must meet the policy within the Safety Handbook (6709.11), Chapter 70, 71.12; Exhibit 01 states "Specialized Equipment, such as ATVs, UTVs, Dirt Bikes, Snowmobiles (Department of Transportation-approved helmet)." **Wearing hardhats while driving or riding on a UTV is not allowed.** Forest Service policy provides no exception to the helmet requirement for low speeds, smooth travel surfaces, or administrative use. UTV Helmet (for fire use) requirements are the same as ATV use. Helmets must meet Snell, or DOT ANSI certification. A 3/4 face model meeting Snell or DOT certification is acceptable for use. Use of half "shorty" helmets requires a JHA/RA for fireline use approved by the Incident Commander or relevant Line Officer and must include justification for its use.*

**Ash Pit Hazards:** Stump holes are abundant in the fire area. Use caution when using water to mop up and avoid straight streaming directly into the ash pit as scalding steam can suddenly erupt from the hole and burn you. Things to LOOK OUT for:

- Extensive root systems of trees and shrubs.
- Deep duff or peat, the organic layer covering mineral soil.
- Landscapes that have once been cultivated or manipulated by heavy equipment, old dozer piles, sawmills, timber sale yards, or decking areas.
- Small rodent holes that have become filled with decadent, combustible debris, beaver holes near dams and stream beds, badger and coyote dens.
- White ash is sometimes an indicator of ash pits as are swarms of hovering insects.
- With the sun behind the suspected ash pit, look for small nearly translucent smokes that dissipate quickly above the ground.
- Ash pits often give off the smell of incomplete combustion or of creosote burning

**Work Assignments:**  
 Task: Implement suppression repair plan. Coordinate and work with the REAF's. Determine additional resource needs.  
 Validate accountable property.  
 Purpose: To prevent further damage to the land and provide erosion control.  
 End State: Suppression repair is completed in accordance within specifications.

**Special Instructions:**  
 See the completed repair plan for further direction.  
 NP BAER Team will be working in all divisions of the fire.

**Work Assignments:**

Implement suppression repair throughout the Repair Division based on priorities identified by the REAFs.  
Monitor open fireline for signs of heat or fire spread that could threaten containment lines.  
Flag roads to increase access and safety for firefighters and the public.

**Special Instructions:**

Follow all COVID-19 protocols and utilize appropriate PPE and social distancing to enhance personal safety.  
Resource avoidance areas will be flagged red/white combined with any other solid color.  
Remove all trash and identify any excess supplies that need to be removed.  
Work with communications for transport needs.

# MEDICAL PLAN (ICS 206 WF) CIIMT 12

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)**

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)**

Patient Assessment: See IRPG PAGE 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (*if different*): (*Descriptive Location (drop point, intersection, etc.) or Lat. / Long.*) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication :*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead. .**

**8. ADDITIONAL INFORMATION: Updates/Changes, etc. .**

**REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively. .**

# COVID-19 Briefing Checklist

## Self-Awareness / Screening

- Notify supervisor if you or others experience:
  - Cough, more than expected
  - Difficulty breathing
  - Loss of taste or smell
  - Fever
  - Chills
  - Sore throat
  - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

## Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

## Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

## Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Nick Stepanian @ (909) 908-4778

MEDL(T) Ellis Johnston @ (208) 390-2326

# KNP COMPLEX & WINDY FIRE COVID CARE CLINICS

## What to expect:

- Wear a mask at all times
- Provide patient information
- Estimated Time for Testing: 30 minutes
- Rapid anti-gen self-tests provided
- PCR Tests available and may be required in certain situations as a follow-up to a rapid.

## Services available at each camp:

Camp Name	Symptomatic Testing	Demob Testing	Vaccinations & Boosters
KNP ICP	X	X	X
Windy ICP	X	X	
Horse Creek	X		
Hume Lake	X		

KNP ICP  
1705 S Anchor St  
Orange Cove, CA  
Hours: 0700 - 2100

Windy ICP  
2700 Teapot Dome Ave  
Porterville, CA  
Hours: 0700 - 2100

## California Wildland Fire Coordinating Group

### Framework for Mandatory COVID Testing on Federal Fire Incidents in California

Due to the risk of spread of COVID-19 to individual fire personnel and modules, as well as the overall impact on firefighting capacity, the federal leadership of the California Wildland Fire Coordinating Group (CWCG) have decided to move forward with the intent of mandatory testing on all federal fire incidents in California, specifically type 1 and 2 wildfire incidents when logistically possible (e.g. personnel to support, testing available). This intention applies to all federal employees and federal contractors regardless of vaccination status and will be voluntary for partners and cooperators involved in a federal fire incident.

To date, the Department of Agriculture, Forest Service, Pacific Southwest Region, COVID-19 Emergency Response Team (CERT) implemented two mandatory pilot testing programs in California. The first pilot program was during the McFarland Fire on the Shasta-Trinity National Forest. The testing service was provided through a contract. The second pilot program was on the French Fire during unified command between the Bureau of Land Management and the Sequoia National Forest. Cal OES provided the testing service. These pilot programs provided many lessons to assist with more effective implementation on other fire incidents.

To implement this intent the CERT and a Point of Contact (POC) from each of the following Department of the Interior (DOI) agencies: Bureau of Indian Affairs, Bureau of Land Management, Fish and Wildlife Service and the National Park Service will coordinate and collaborate.

It is recognized that testing in and of itself is not a silver bullet, but it is an important tool in the suite of COVID mitigations to protect fire personnel, modules, and their families and friends when personnel return home from fire incidents. With increasing COVID cases over the past few months, and continued fire activity expected in the weeks and months ahead, we have decided this is a necessary tool until vaccine requirements for the federal workforce are fully implemented.

#### Mandatory Testing Intent & Framework

- Applies to all federal employees and federal contractors on type 1 and 2 wildfire incidents in California, regardless of vaccination status.
- Testing will be provided for partners and cooperators that volunteer or request testing, if testing capacity is available.
- The requirement for testing will be included in the resource order for those resources identified as available to fill orders.
- Refusal of COVID testing on incidents will be handled on a case-by-case basis by the employee's agency or the hiring agency of the federal contractor with participation on the incident not occurring until a resolution is identified.
- If there are logistical challenges (e.g. personnel support, testing availability) the CERT and DOI POCs will attempt to implement this intent in the following priority order: (1) test individuals upon arrival to an incident, (2) test individuals upon demobilization from an incident, (3) test individuals that are already assigned to an ongoing incident at frequencies recommended by the Centers for Disease Control and Prevention (CDC).

# Suppression Rehabilitation Specifications

**Goal**— Overall line rehab goals are to reduce erosion and runoff potential and promote future plant growth. Walk through adjacent undisturbed area and take a look at your rehab efforts to determine your success at returning the area to as natural a state as possible.

## Rehabilitate dozer lines and handlines after ops approval

- Pull back soil and cut vegetation. Remove berms. Restore slope contour.
- Install waterbars on slopes greater than 10%.

Fire line Gradient (% slope)	Distance Between Waterbars (feet)
0 to 10	no waterbars needed
10 to 20	100
21 to 40	75
41 to 60	50

- Dimensions: 6-18 inches tall. Steeper slopes require taller waterbars
- Angle: 30-45 degrees across fireline. Extend waterbar across entire fireline. Exit waterbar flow into the green.
- Block entrance of dozer lines with extra logs and vegetation to prevent access

**Rehabilitate Helispots, Drop Points, and Staging Areas**—rake back disturbed soil and scatter cut trees, shrubs, limbs, and logs over area. If called out by READs decompact soil as needed in the top 2-4”.

**Roads**-Chip or masticate vegetation piles cut during suppression. Unclog culverts of dirt or vegetation if impacted by suppression.

**Remove Trash**—remove unnecessary microtrash, flagging/equipment and tools from along handlines, spike camps, helispots, drop points, and staging areas.

**Work with Resource Advisors with questions, modifications to the specifications, and sign-off.**

# Hotel Acquisition Protocol

This guideline is only for acquiring hotel accommodation. Meals are still provided by the KNP incident from caterer and off-site meals are **not** authorized for reimbursement. Offsite meals **are** authorized for the Windy Fire. Resources will follow their Agency of Hire direction as identified in the *Standards for Interagency Incident Business Management Handbook*, (4/2021) page 10-62, [www.nwccg.gov/sites/default/files/publications/pms902.pdf](http://www.nwccg.gov/sites/default/files/publications/pms902.pdf) .

**Lodging Per Diem Rate per Incident:** Must stay within per diem rate.

KNP COMPLEX - \$110.00 per night

WINDY - \$113.00 per night

- **Resources will utilize double occupancy (when appropriate) when acquiring rooms.**
  - Example is Resource A – 5 personnel may acquire 3 rooms (2 rooms with two crew members, 1 room with one crew member).
- Federal Resources (Including AD's)
  - Will follow Lodging policy of their Agency.
- Local Government
  - Will follow the State Agreement from which they are from.
  - CA – Work with Finance Section for S# request.
- Contracted Resources
  - Will follow Lodging rules within Agreement.
  - Provide receipt(s) for reimbursement on Invoice.
  - Make sure receipts are Itemized (not from credit card machine) and show a zero balance due.

## HUMAN RESOURCES MESSAGE

What is motivation? Motivation is the drive that encourages action or feeling. To motivate means to encourage and inspire. Motivation can also mean igniting the spark for action. Motivation is a powerful force. It can persuade, convince and propel you into action. It can be defined as motive for action. It is a driving force in our lives and comes from the desire to succeed. The greatest enemy of motivation is complacency.

*Your resume says, 'Only You can prevent forest fires.' Listen, pal... we work as a team here.*

Now is the time to keep your eyes wide open for symptoms of complacency. Now is the time to stay motivated. Now is the time to recognize the success that has been achieved and strive for more.

**"Do not let what you cannot do interfere with what you can do."**

-John Wooden

**David Legrand, HRSP**

**505.218.1189**

### ***Riddle of the Day!***

*What English word has the same pronunciation, even after you take away four of its five letters?*

### ***Daily Double!!!!***

*What occurs once in every minute twice in every moment, yet never in a thousand years?*

# TRAINING SPECIALIST

## TRAINEE INSTRUCTIONS

***Today, 10-29, will be the last day on the KNP Complex and Windy Fire to register a training assignment with the Training Specialist. The Registration QR Code will turn off tonight at 2100***

### Registration

To register your assignment with the TNSP:

1. Scan the "Registration Form" QR Code

2. Complete and submit the form
3. Check Text Messages for further instructions

**(209) 770-4809 [bradley\\_smith@firenet.gov](mailto:bradley_smith@firenet.gov)**

### Training Assignment Close Out

1. Please Close Out your "Open" Training Documentation w the TNSP no later than tomorrow, 10-30, 2100 Hrs.

Want to expedite the process?

Scan and complete the "Incident Trainee Final Interview Form" QR Code below  
Contact the TNSP to front load the rest of your package before Demob.

The Training Desk is located at ICP, in the Main Building, adjacent to the center entrance.

## PLEASE DO:

- Only drive ONE WAY in camp
- Drop your trash off at the Human Eco Consulting: corner of Engine Parking & Sleeper Trailer Row
- Treat other people the way you want to be treated

## PLEASE DO NOT:

- Walk where vehicles drive
- Sleep in vehicle parking areas

# DEMOB Instructions

## KNP Complex:

1. Go to Weed Wash if your vehicle has been on the fireline
  2. Go to Ground Support for your post-inspection
  3. Return items checked out from Supply
  4. Return items checked out from Comms
  5. Email Finance to close out your CTR/Shift tickets
  6. Scan the QR code below to DEMOB. Complete the questionnaire, then call 213-264-1886 to verify that DMOB has received all the information.
- NOTE: If you have any problems, contact Jan by phone: 213-264-1886 or email: [2021.knp.demob@firenet.gov](mailto:2021.knp.demob@firenet.gov)

---

## Windy Fire:

Report to Windy Demob in person to obtain your check-out form. **THERE IS NO REMOTE DEMOB.** Obtain signatures from the appropriate Unit Leaders as noted on your check-out form, closing out with Finance just before bringing the signed form back to Demob.

If you need a flight arranged, contact the Demob Unit Leader **72 hours prior** to your Demob date to ensure that all necessary information has been provided. Demob will submit your request.
