KNP COMPLEX

CA-KNP-000122
PPN9UH (1522)

WINDY FIRE

CA-TIA-003058
PAN9QV (1522)

Sunday

OPERATIONAL PERIOD

10/31/2021 0700

to

11/1/2021 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: KNP COMPLEX & WINDY FIRE	2. Operational Period:	Date From: 10/31/2021	Date To: 11/1/2021	
		Time From: 0700	Time To: 0700	

3. Objective(s):

Strategic Framework

Implement a full suppression strategy on the KNP Complex and Windy Fire. Values at risk include human safety, communities, Sequoia Groves, critical infrastructure, associated improvements, and wilderness values. Apply tactics that offer the highest probability of success commensurate with resource availability.

Leaders Intent

Provide the highest level of customer service to all involved with or impacted by the KNP Complex and Windy Fire. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct, and timely/effective communication.
- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by minimizing large group settings, social distancing, wearing face coverings, and handwashing.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Make risk-informed decisions to minimize fire impacts to Sequoia Groves.
- Coordinate suppression activities with assigned incident Resource Advisors and Tribal Advisors to minimize impacts to Sequoia Groves, wilderness, natural and cultural resources. Utilize Minimal Impact Suppression Tactics (MIST) where appropriate.
- Implement suppression repair activities in accordance with the suppression repair plans and Incident Resource Advisors.

Control Objectives

Branch I KNP Complex
To prevent the fire from spreading to private property, surrounding communities, Sequoia Groves, wilderness, and values at risk, keep the fire:

- North, South, and East of established containment lines.
- West of Redwood Meadow Grove confined to areas with natural barriers

Branch III Windy Fire
To prevent the fire from spreading to public and private property on the Tule River Reservation, surrounding communities, Sequoia Groves, natural and cultural values at risk, keep the fire:

- North, South, and West of established containment lines.
- East of established containment lines and within its currently identified perimeter.

KNP Complex Incident Weather Forecast

FORECAST NO: 45
PREDICTION FOR: 0700 Sun - 0700 Mon
SHIFT DATE: October 31-November 1, 2021
FORECAST ISSUED: 1800 Friday October 29

NAME OF FIRE: KNP Complex
UNIT: CA-KNP
SIGNED: Chris Foltz - Incident Meteorologist

WEATHER DISCUSSION: Expect patchy dense fog again this morning due to increasing humidity and light winds. Once the fog dissipates, a partly to mostly cloudy sky can be expected with dry conditions. Temperatures will be roughly 3 degrees cooler than Saturday with winds remaining similar. A weak storm system will move across the area on Monday which could result in an isolated shower during the afternoon and evening. Any accumulation will be light.

. SUNDAY...

Sky/weather.....Patch dense fog through 1100 then haze through the afternoon.
Partly to mostly cloudy otherwise.
Max temperature....Lower Elevations 55-65. Upper Elevations 49-59.
Min humidity.....Lower Elevations 60-70%. Upper Elevations 45-55%.
Wind (20 ft).....
Slope/valley.....Upslope/upcanyon 3-8 mph. Gusts to 12 mph in the afternoon.
Ridgetop.....West 3-7 mph.
Mixing height.....Increasing to around 2500 ft AGL.
Transport winds....West around 7 mph.

. SUNDAY NIGHT...

Sky/weather.....Mostly cloudy becoming partly cloudy overnight.
Min temperature....Lower Elevations 44-54. Upper Elevations 36-46.
Max humidity.....Lower Elevations 80-90%. Upper Elevations 60-70%.
Wind (20 ft).....
Slope/valley.....Downslope/downcanyon 2-5 mph.
Ridgetop.....Northeast 3-7 mph.
Mixing height.....Lowering to around 100 ft AGL.
Transport winds....Northeast around 3 mph.

. MONDAY...

Sky/weather.....Partly to mostly cloudy.
Max temperature....Lower Elevations 53-63. Upper Elevations 47-57.
Min humidity.....Lower Elevations 50-60%. Upper Elevations 45-55%.
Wind (20 ft).....
Slope/valley.....Upslope/upcanyon 3-8 mph. Gusts to 12 mph in the afternoon.
Ridgetop.....West 3-7 mph.
Mixing height.....Increasing to around 2500 ft AGL.
Transport winds....West around 8 mph.

Windy Incident Weather Forecast

FORECAST NO: 50
PREDICTION FOR: 0700 Sun - 0700 Mon
SHIFT DATE: October 31-November 1, 2021
FORECAST ISSUED: 1800 Saturday October 30

NAME OF FIRE: Windy
UNIT: CA-TIA
SIGNED: Chris Foltz - Incident Meteorologist

WEATHER DISCUSSION: Abundant humidity and calm winds will result in the formation of patchy dense fog once again this morning. Fog and low clouds will linger at lower elevations through mid-morning. Beyond that, a partly to mostly cloudy sky is expected with dry conditions. A weak storm system could bring an isolated shower Monday afternoon and evening but any accumulation will be light.

WEATHER FORECAST:
TODAY:

WEATHER: Patch dense fog through 1100 then haze through the afternoon. Otherwise, dry conditions are expected with a partly to mostly cloudy sky.

MAX TEMPERATURES: 63-68 below 5 kft including the Kern River Valley. 53-58 at higher elevations.
MIN HUMIDITY: 50-55% across most of the fire; 40-45% along the eastern slopes/Kern River Valley.
20 FT WINDS:
RIDGETOP - Downslope/downvalley 2-4 mph, then west at 6-10 mph after 1000. Afternoon gusts around 15 mph.

SLOPE/VALLEY - Downslope/downvalley 2-4 mph, then upslope/upvalley 6-10 mph after 1000. Afternoon gusts to 12 mph. Gusts to 25 mph along the Kern River.

STABILITY/INVERSION: Valley inversion including the San Joaquin Valley lifting to 2500 ft in the afternoon.

MONDAY:

WEATHER: Dry conditions are expected most of the day with a partly to mostly cloudy sky. An isolated shower is possible during the afternoon and evening hours but little accumulation is expected.

MAX TEMPERATURES: 62-67 below 5 kft including the Kern River Valley. 52-57 at higher elevations.
MIN HUMIDITY: 55-60% across most of the fire; 40-45% along the eastern slopes/Kern River Valley.
20 FT WINDS:
RIDGETOP - Downslope/downvalley 2-4 mph, then west at 6-10 mph after 1000. Afternoon gusts around 15 mph.

SLOPE/VALLEY - Downslope/downvalley 2-4 mph, then upslope/upvalley 6-10 mph after 1000. Afternoon gusts to 12 mph. Gusts to 25 mph along the Kern River.

STABILITY/INVERSION: Valley inversion including the San Joaquin Valley lifting to 3000 ft in the afternoon.

OUTLOOK FOR TUESDAY THROUGH THURSDAY: Dry and seasonable conditions are expected with a partly to mostly cloudy sky through Thursday. An isolated shower is possible Wednesday night into Thursday.

Incident Weather Station Data --- SCAN CODE with Smart Phone

Porterville – Porterville Camp	Kern Co. Landfill – Camp 9
Johnsondale – sheltered basin	Sugarloaf Dr – northern slope
Peppermint – upper eastern slope	Pine Flat (UHL) – lower western slope

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 44	TYPE OF FIRE: Vegetation
FIRE NAME: KNP Complex	OPERATIONAL PERIOD: Oct 30 th -Nov 3 rd
DATE ISSUED: October 29 th	TIME ISSUED: 1600
UNIT: Sequoia Kings National Park, Sequoia National Forest	SIGNED: Dan O'Connor Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

The most notable vegetation is forests of giant sequoia (*Sequoiadendron giganteum*). Oak woodland (blue oak, interior live oak) and chaparral with chamise and manzanita characterize the lower elevations. Mixed conifer forest with Colorado white fir, red fir, western yellow pine (ponderosa pine), sugar pine and lodgepole pine forests and montane meadows occupy the middle elevations. Subalpine forests with foxtail pine, whitebark pine and meadows, krummholz, and alpine ecosystems typify the higher elevations. A combination of prescribed and resource benefit fire patches exist throughout the Park and National Forest. Tulare County is currently classified as 'Exceptional' by the US Drought Monitor mapping system impacting both live and dead fuels.

EXPECTED FIRE BEHAVIOR: Based on the Warmest, Driest, Windiest Conditions Forecasted

<u>Maximum Spotting Distance</u> Minimal <u>Probability of Ignition</u> 10 % or less	Fuel Type/Model	Maximum Rate of Spread (chains/hour)	Maximum Flame Length (feet)
	Timber understory (TU5-Overstocked and/or dense reprod)	Head 1-2 ch/hr Flank 0-1 ch/hr	Head 0-2 ft Flank 0-1 ft
	Timber litter (TL6-closed canopy, ground fuels)	Head 0-1 ch/hr Flank 0-1 ch/hr	Head 0-1 ft Flank 0-1 ft

General: This week's moisture continues to impact the fire area, with north aspects and higher elevation areas still under snow and/or wet ground. Exceptions may be heavy dead and down logs that may continue to smolder, with potential for creeping late week on the driest, most sun exposed south aspects. Humidity values in the 50's and lower sun angles/shorter days should further limit potential for fire growth.

SPECIFIC

KNP Complex

North: No forward fire progression is expected. Heavier fuels will continue to burn and some creeping should be expected under closed canopies.

South: No forward fire progression is expected. Heavier fuels will continue to burn and some creeping should be expected under closed canopies.

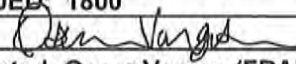

AIR OPERATIONS:

Minimal impacts to air operations anticipated during the forecast period.

SAFETY:

As you reengage the fire area later in the week, look out for deep smoldering root systems that may still contain heat.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 41 Extended	TYPE OF FIRE: Wildfire
FIRE NAME: Windy Fire	OPERATIONAL PERIOD: 10/29-31, DAY-NIGHT Shift
DATE ISSUED: October 28, 2021	TIME ISSUED: 1800
UNIT: CA-TIA & CA-SQF	SIGNED:  Typed/printed: Oscar Vargas (FBAN)

INPUTS

WEATHER SUMMARY:

- Above normal temperatures 10/29 and then slight cooling trend thru 10/30 & 10/31
- Increasing clouds on Saturday and Sunday
- Afternoon gusts around 12-15 with gusts up to 25mph possible in some areas

See Fire Weather Forecast for daily weather details

FUELS SUMMARY: Dense mixed conifer, old-growth timber, heavy down/dead, mixed ground fuels

TOPGRAPHY SUMMARY: Steep to very steep

OUTPUTS

GENERAL FIRE BEHAVIOR:

Fire behavior in most areas will remain minimal however there will be areas that will continue to smoke and smolder in heavy dead fuels and fuels that have been sheltered or burning on the inside. Smoldering is expected to increase as conditions continue to warm and dry out. Fire behavior potential will increase over the next few days as fuels continue to dry but clouds that provide shading over the fire will minimize fire behavior.

- Moderate intensity burning in heavy down/dead
- Rates of spread potential will be low to moderate depending on alignment of wind/gusts, slope & fuel moistures
- ERCs between Low and Average conditions during this period with highest ERCs around 41
- Probability of ignition around 50-65% in most areas but can more or less at your location
- Smoldering could remain active at night in areas that are holding heat in heavy fuels, especially in areas exposed to winds.
- Fine Dead Fuels will continue to dry out and could carry fire in some areas exposed to direct sunlight or steady winds
- You could start seeing smoke in areas that have been quite in the past few days

Spotting distances potential: spotting potential is minimal

Min. Fine Dead Fuel Moistures ranges: 1 hr.= 5-7-%, 10 hr.= 6-9%, 100hr= 11+% 1000hr.= 12+%

Ground and Air resources continue to have a dramatic influence over fire behavior & growth potential. Containment lines are continuing to hold the fire in place.

AIR OPERATIONS:

Smoke or Inversions are not a factor or limitation

There are deceptively quite areas on this fire....
Maintain positive situational awareness and situational intelligence to stay safe on the fireline

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day Shift: 10/31/21 0700 – 0700

INCIDENT: KNP Complex

Date Prepared: Oct. 30, 2021 TIME: 1300

Be alert for signs of FATIGUE in yourself and those you work with. Take periodic breaks, get plenty of sleep, and eat well balanced meals.

Supervisors, crewmembers, & adjoining resources take the moment to look out for each other and recognize when someone looks like they may need help. Watch for signs in each other where one may look like they are stressed, overwhelmed, or fatigue.

Remember it's ok to take a break. It's ok to ask for help. We need your mental strength and your physical capabilities to carry out the mission and the tasks at hand.

Major Hazards and Risks: Mop up, hazard trees, wet surfaces, steep rugged terrain and driving, public encroachment.

Giant sequoia

As efforts are still being made, where to continue with mop up to save these sacred Sequoia's, we must maintain our safety.

- ◆ Evaluate the mission. Is the mission worth the Risk?
- ◆ Have a Plan, Communicate the Plan
- ◆ Place Lookout where needed
- ◆ Ensure a clear Route of Egress

When working around heavy equipment

Operators should always know exactly where all ground-based workers are located. Wearing of high visibility Nomex will help the operator to locate you quickly.

The equipment should have a backup warning alarm that can be heard by all nearby workers.

Radios are also valuable communication tools to communicate with the operator if you need to communicate surrounding hazards with the operator.

Thanks, from your Safety Team!!

Safety Officers: Mike Seymour SOF2, Michael Smith SOF2

6. Work Assignments:
 Task: Patrol and hold fire. Hold and improve existing containment lines. Backhaul trash, fire suppression systems, hose, etc.
 Implement suppression repair plan. Coordinate and work with the REAFs.
 Purpose: To keep fire within existing containment lines. To keep fire north of East Fork of Kaweah River and south of Mineral King Rd.
 To prevent further damage to the land and provide erosion control.
 End State: The fire remains within its existing footprint and prevent spread to the south.
 Suppression repair is completed in accordance within specifications.

7. Special Instructions:
 See the completed repair plan for further direction.
 KNP BAER Team will be working in all divisions of the fire.
 * Resources with * will report to Orange Cove ICP at 1600 to initiate demob process

MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report																													
<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>																													
<p>Use the following items to communicate situation to communications/dispatch.</p>																													
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p> <p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>																													
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>																												
Nature of Injury or Illness & Mechanism of Injury			<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>																										
Transport Request			<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>																										
Patient Location			<i>Descriptive Location & Lat. / Long. (WGS84)</i>																										
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>																										
On-Scene Incident Commander			<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>																										
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>																										
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)</p> <p>Patient Assessment: See IRPG PAGE 106</p> <p>Treatment:</p>																													
<p>4. TRANSPORT PLAN:</p> <p>Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:</p> <p>Helispot / Extraction Site Size and Hazards:</p>																													
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p> <p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extraction :</i></p>																													
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;">Function</th> <th style="width: 25%;">Channel Name/Number</th> <th style="width: 15%;">Receive (RX)</th> <th style="width: 15%;">Tone/NAC *</th> <th style="width: 15%;">Transmit (TX)</th> <th style="width: 15%;">Tone/NAC *</th> </tr> </thead> <tbody> <tr> <td>COMMAND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>AIR-TO-GRND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>TACTICAL</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	COMMAND						AIR-TO-GRND						TACTICAL					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *																								
COMMAND																													
AIR-TO-GRND

<p>7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead. .</p>																													
<p>8. ADDITIONAL INFORMATION: Updates/Changes, etc. .</p>																													
<p>REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively. .</p>																													

COVID-19 Briefing Checklist

Self-Awareness / Screening

- **Notify** supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- **Immediately separate** yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least **SIX** feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- Protect yourself, your crew, and your camp!

Any questions contact:

MEDL Nick Stepanian @ (909) 908-4778

MEDL(T) Ellis Johnston @ (208) 390-2326

KNP COMPLEX & WINDY FIRE COVID CARE CLINICS

What to expect:

- Wear a mask at all times
- Provide patient information
- Estimated Time for Testing: 30 minutes
- Rapid anti-gen self-tests provided
- PCR Tests available and may be required in certain situations as a follow-up to a rapid.

Services available at each camp:

Camp Name	Symptomatic Testing	Demob Testing	Vaccinations & Boosters

California Wildland Fire Coordinating Group

Framework for Mandatory COVID Testing on Federal Fire Incidents in California

Due to the risk of spread of COVID-19 to individual fire personnel and modules, as well as the overall impact on firefighting capacity, the federal leadership of the California Wildland Fire Coordinating Group (CWCG) have decided to move forward with the intent of mandatory testing on all federal fire incidents in California, specifically type 1 and 2 wildfire incidents when logistically possible (e.g. personnel to support, testing available). This intention applies to all federal employees and federal contractors regardless of vaccination status and will be voluntary for partners and cooperators involved in a federal fire incident.

To date, the Department of Agriculture, Forest Service, Pacific Southwest Region, COVID-19 Emergency Response Team (CERT) implemented two mandatory pilot testing programs in California. The first pilot program was during the McFarland Fire on the Shasta-Trinity National Forest. The testing service was provided through a contract. The second pilot program was on the French Fire during unified command between the Bureau of Land Management and the Sequoia National Forest. Cal OES provided the testing service. These pilot programs provided many lessons to assist with more effective implementation on other fire incidents.

To implement this intent the CERT and a Point of Contact (POC) from each of the following Department of the Interior (DOI) agencies: Bureau of Indian Affairs, Bureau of Land Management, Fish and Wildlife Service and the National Park Service will coordinate and collaborate.

It is recognized that testing in and of itself is not a silver bullet, but it is an important tool in the suite of COVID mitigations to protect fire personnel, modules, and their families and friends when personnel return home from fire incidents. With increasing COVID cases over the past few months, and continued fire activity expected in the weeks and months ahead, we have decided this is a necessary tool until vaccine requirements for the federal workforce are fully implemented.

Mandatory Testing Intent & Framework

- Applies to all federal employees and federal contractors on type 1 and 2 wildfire incidents in California, regardless of vaccination status.
- Testing will be provided for partners and cooperators that volunteer or request testing, if testing capacity is available.
- The requirement for testing will be included in the resource order for those resources identified as available to fill orders.
- Refusal of COVID testing on incidents will be handled on a case-by-case basis by the employee's agency or the hiring agency of the federal contractor with participation on the incident not occurring until a resolution is identified.
- If there are logistical challenges (e.g. personnel support, testing availability) the CERT and DOI POCs will attempt to implement this intent in the following priority order: (1) test individuals upon arrival to an incident, (2) test individuals upon demobilization from an incident, (3) test individuals that are already assigned to an ongoing incident at frequencies recommended by the Centers for Disease Control and Prevention (CDC).

Suppression Rehabilitation Specifications

Goal— Overall line rehab goals are to reduce erosion and runoff potential and promote future plant growth. Walk through adjacent undisturbed area and take a look at your rehab efforts to determine your success at returning the area to as natural a state as possible.

Rehabilitate dozer lines and handlines after ops approval

- Pull back soil and cut vegetation. Remove berms. Restore slope contour.
- Install waterbars on slopes greater than 10%.

Fire line Gradient (% slope)	Distance Between Waterbars (feet)
0 to 10	no waterbars needed
10 to 20	100
21 to 40	75
41 to 60	50

- Dimensions: 6-18 inches tall. Steeper slopes require taller waterbars
- Angle: 30-45 degrees across fireline. Extend waterbar across entire fireline. Exit waterbar flow into the green.
- Block entrance of dozer lines with extra logs and vegetation to prevent access

Rehabilitate Helispots, Drop Points, and Staging Areas—rake back disturbed soil and scatter cut trees, shrubs, limbs, and logs over area. If called out by READs decompact soil as needed in the top 2-4".

Roads-Chip or masticate vegetation piles cut during suppression. Unclog culverts of dirt or vegetation if impacted by suppression.

Remove Trash—remove unnecessary microtrash, flagging/equipment and tools from along handlines, spike camps, helispots, drop points, and staging areas.

Work with Resource Advisors with questions, modifications to the specifications, and sign-off.

Hotel Acquisition Protocol

This guideline is only for acquiring hotel accommodation. Meals are still provided by the KNP incident from caterer and off-site meals are **not** authorized for reimbursement. Offsite meals **are** authorized for the Windy Fire. Resources will follow their Agency of Hire direction as identified in the *Standards for Interagency Incident Business Management Handbook*, (4/2021) page 10-62, www.nwccg.gov/sites/default/files/publications/pms902.pdf .

Lodging Per Diem Rate per Incident: Must stay within per diem rate.

KNP COMPLEX - \$110.00 per night

WINDY - \$113.00 per night

- **Resources will utilize double occupancy (when appropriate) when acquiring rooms.**
 - Example is Resource A – 5 personnel may acquire 3 rooms (2 rooms with two crew members, 1 room with one crew member).
- **Federal Resources (Including AD's)**
 - Will follow Lodging policy of their Agency.
- **Local Government**
 - Will follow the State Agreement from which they are from.
 - CA – Work with Finance Section for S# request.
- **Contracted Resources**
 - Will follow Lodging rules within Agreement.
 - Provide receipt(s) for reimbursement on Invoice.
 - Make sure receipts are Itemized (not from credit card machine) and show a zero balance due.

HUMAN RESOURCES MESSAGE

It's All About Perspective...Or Is It?

Like the air we breathe, we all share a common set of cognitive biases that insulate us from things that can challenge our core beliefs, preferences and values.

Cognitive biases close our minds from recognizing the very things that can help us. But the truth is, that our biases are probably protecting us from recognizing that our biases even exist.

A cognitive bias can cause a mistake in reasoning, evaluating, remembering, or other cognitive process, often occurring as a result of holding onto one's preferences and beliefs regardless of contrary information. This causes individuals to create their own 'subjective social reality' from their perception of the input. An individual's construction of social reality, not the objective input, may dictate their behavior in the social world.

Cognitive biases may sometimes lead to perceptual distortion, inaccurate judgment, illogical interpretation, or what is broadly called irrationality.

We live in a time of great change. We also live in a time when, as time passes, we will see even greater change. Whether we see it or not, or depending on how we choose to see it, the world will still change. It's a choice to define our place in this world today & as it evolves, and that choice is ours.

When you look through a lens of past experiences and the beliefs that form as a result of those experiences, it can be hard to see what's right in front of you. Once you see things through a lens of possibility and growth, you'll wonder why you didn't see it sooner.

Riddle of The Day:

What question can you never answer yes to???

DAVID LEGRAND, HRSP
505.218.1189

PLEASE DO:

- Only drive ONE WAY in camp
- Drop your trash off at the Human Eco Consulting: corner of Engine Parking & Sleeper Trailer Row
- Treat other people the way you want to be treated

PLEASE DO NOT:

- Walk where vehicles drive
- Sleep in vehicle parking areas
- Place **ANY** human waste in any trash receptacle

SPECIAL NOTES:

The saw shop at Supply will close at 1200 on Sunday, 10/31

The shower facility at Orange Cove ICP will close at 0800 on Monday, 11/1. "Bath/Shower in a bag" products are available at Supply if needed

Demob inspections at Ground Support will end at 1200 on Tuesday, 11/2

Weed wash at Orange Cove ICP will close at 1200 on Tuesday, 11/2

DEMOB Instructions

KNP Complex:

1. Go to Weed Wash if your vehicle has been on the fireline
2. Go to Ground Support for your post-inspection
3. Return items checked out from Supply
4. Return items checked out from Comms
5. Email Finance to close out your CTR/Shift tickets
6. Scan the QR code below to DEMOB. Complete the questionnaire, then call 213-264-1886 to verify that DMOB has received all the information.
NOTE: If you have any problems, contact Jan by phone: 213-264-1886 or email: 2021.knp.demob@firenet.gov

Windy Fire:

Report to Windy Demob in person to obtain your check-out form. **THERE IS NO REMOTE DEMOB.** Obtain signatures from the appropriate Unit Leaders as noted on your check-out form, closing out with Finance just before bringing the signed form back to Demob.

If you need a flight arranged, contact the Demob Unit Leader **72 hours prior** to your Demob date to ensure that all necessary information has been provided. Demob will submit your request.
