WEATHER SUMMARY:

FORECAST NUMBER: 12

*** Smokey, Warm and Dry***

Smoky conditions persist today. Afternoon temperatures will climb into the lower 80s, with cool overnight lows. Relative humidity will drop into the teens with poor recovery tonight. Diurnal, terrain driven, winds expected, with westerly winds at the ridgetops.

Day

Max.Temperatures- 76°-82° Min. Humidity-15 to 25% Winds- W/SW to 11 mph, Gusting 15 with Terrain!

Night

Min.Temperatures- 48°-54° Max. Humidity-35 to 45% Winds- Becoming downslope 3-6 mph late

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Smoke and haze can hide spot fires until well established.... Lookouts will be tested!
- If you can breathe better, so can the fire...Improved Visibility Equals More Active Fire!
- All fuel sizes are receptive and carrying fire... Expect, and plan for, frequent spotting!
- The fireline has become static in many areas ... Expect More Rollout... and Tree Failure!
- This fire remains fuels driven...But Ventilation Dependent...Read Your Smoke Often!
- Expect drift smoke from regional fires to reduce your visibility....AND situational awareness!
- Respect any tree torching... Tight Crown Spacing will Support Crown Fire Runs!

SPECIFIC:

• All Divisions: All Sizes of Fuels are very DRY, very AVAILABLE, very RECEPTIVE...

Flame Lengths- 2-6 ft. in Grass, Up to 30 ft. in Brush/Understory...Diminishing after midnight

Rate of Spread- Up to 20 chains/hour in Grass, Up to 80 chains/hour in Brush...Slowing overnight

Spotting Distances- Up to .25 miles from Grass/Brush, Up to 1 mile in Timber (From Torching)

Probability of Ignition- (Day) Unshaded Up to 90% - Shaded Up to 60% (Night) Down to <40%

AIR OPERATIONS:

Sunrise: 06:46

Sunset: 18:53

Expect poor smoke dispersion before the inversion breaks by late in the morning. Limited thereafter. Mixing heights start out at less than 1000 feet; rise to 10,000 feet with daytime heating; then returning to less than 1000 feet after sunset. Anticipate terrain induced turbulence in the Tule and Kern River corridors, especially during peak hours of afternoon heating.

SAFETY

YOUR MARGIN OF ERROR IS THIN WHEN.....

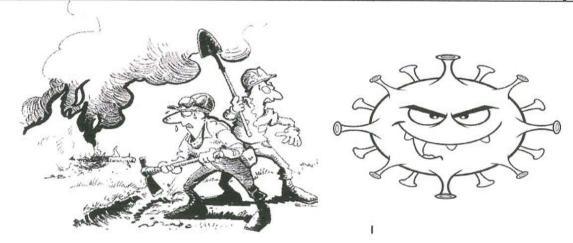

YOUR FUELS ARE PARCHED! YOUR SLOPES ARE STEEP! YOUR WEATHER IS WARM AND DRY!

THESE ARE YOUR CONDITIONS TODAY! UPDATE YOU PLANS.....EARLY AND OFTEN!

INCIDENT #CA-TIA-003058

DATE:9/24-9/25/2021 TIME: 0700-0700 Day/Night Shift

Stay Fire Focused But COVID Aware!

Incident Management Team Transition

- Sometimes called the 19th Watch Out Situation
- Take the time to understand the plan. Ensure all resources completely understand the assignment, the Communications Plan, and the Medical Plan.
- Supervisory positions have changed. Know who you are working for.
 Briefings: Required every shift, for all personnel, for new assignments, and for changing conditions.

Planning for Medical Emergencies (see IRPG Page 2)

Prior to each operational period, Incident Commanders, supervisors, and all wildland firefighters need to ask and be able to answer the following three questions:

- 1. What are we going to do if someone gets hurt?
 - Are there personnel on your crew/division/fire that can provide medical support?
 - What type of equipment is available to treat and transport injured personnel?
- 2. How will we get them out of here?
 - Could you get an injured firefighter to a road or to a helispot?
 - How many personnel and what kind of equipment would you need to get an injured firefighter out?
- 3. How long will it take to get them to a hospital?
 - Where is the closest hospital?
 - Will you use air or ground transportation?
 - Could conditions change and affect the transportation timeline?
- Smoke/clouds/nightfall
- Fire behavior
- Mechanical failures

Risk Management Process: Implement the risk management process for all aspects of this ongoing event. The steps of the risk management process are:

- 1. Situation Awareness
- 2. Hazard Assessment
- 3. Hazard Control
- 4. Decision Point
- 5. Evaluate

(see page 1 of the 2018 IRPG)

Leadership:

Good operational leaders will:

- TAKE CHARGE of assigned resources.
- MOTIVATE firefighters with a "can-do safety attitude.
- DEMONSTRATE INITIATIVE by taking action in the absence of orders or direction.
- COMMUNICATE by giving specific instructions and taking feedback.
- SUPERVISE at the scene of action.

ICS-220 2/99 **INCIDENT RISK ANALYSIS**

ICS (215A) DAY/NIGHT SHIFT

	THORETOIN ANALTOIS	ies (215A) DAT/ Miditi Shiri		
BR/DV	HAZARDOUS ACTIONS - CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES		
ALL	TRAFFIC HAZARDS AND DRIVING	 Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around. Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. Use warning lights when working on roads or traveling in smoke. Drive at or below posted speed limits. Use chock blocks, turn wheels into hill. Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents. 		
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time Fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees. 		
ALL	FIRE BEHAVIOR	 Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place Plan & communicate your exit strategy with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications. Outflow winds from thunderstorms could negatively affect fire behavior. 		
ALL	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate necessity to send personnel in areas with limited access. 		
ALL	WILDLAND URBAN INTERFACE OPERATIONS	 Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. Refer to IRPG Page 12-16 for WUI preparation, preplanning, and hazards. Be active and engage in defense preparations & do not wait for the fire to arrive. Beware of unknown chemicals when working near structures or garden plots. Be decisive in tactical engagement. Know when to engage or not. Establish management decision points, Safety Zones, TRA's, and Escape Routes. 		
ALL	FIRING OPERATIONS	Only personnel trained in the use of each devise will be authorized to use firir equipment. Ensure that all personnel are briefed and prepared for firing and holding operations. Ensure that all ground and Ariel ignition plans are approved and signed by the IC prior to implementation		
ALL	COMMUNICATIONS	Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Answer questions when asked by others. Ask for intel when you do not know the plan. Ensure all personnel are familiar with the incident and IA communications plans.		
ALL	HEAT RELATED ILLNESS	 Drink 2 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include low energy, cramping, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating. 		
ALL	INDIRECT LINE CONSTRUCTION	Establish and maintain LCES. Locate line in favorable location, lighter fuels, and gentler topography when possible. Utilize natural or existing barriers.		
ALL	AIR OPERATIONS	 Follow "Aviation Watch-Out Situations" on page 46, IRPG. Do not plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources.

 - o Notify public health officials.
 - o Have individual transported as appropriate.
 - o Protectand secure any collected Personal Identifiable Information or Personal Health Information.

FINANCE MESSAGE

Questions or Issues can be emailed to 2021.windy.finance@firenet.gov

TIME:

CTRs and Shift Tickets can be emailed to 207-8832

Hard copies can be dropped in the finance box at briefing.

Check the board to see if you are listed and need to visit with Finance in person.

Contract Equipment be sure to note any down time in the remarks on the shift ticket.

Approving Officials for CTRs and Shift Tickets be sure to write legibly and print your name under your signature.

FIRE REPLACEMENT:

For replacement of non-cache items, the requesting resource will take a completed OF-213 and OF-289 to the Comp/Claims Unit Leader for review. Request for replacement of specialized equipment (non-cache and non-expendable) brought from home unit must be documented on an inventory list signed by the home unit.

Based on the documentation provided a determination for replacement will be made by the Finance Section Chief, IC, or INBA.

If the replacement request is approved, the reimbursement amount will be limited to the cache equivalent value. (PMS 902 Chapter 30, Page 30-5 Lines 6-10). Damaged items will be surrendered to the Supply Unit.

Replacement for normal wear and tear is through home unit project funds.

DON NOT WAIT UNTIL DEMOB TO BEGIN THE PROCESS.

Windy Fire Human Resource Message September 24, 2021

The Ten Commandments of Human Relations

- 1. SPEAK TO PEOPLE. There is nothing so nice as a cheerful word of greeting.
- 2. SMILE AT PEOPLE. It takes 72 muscles to frown and only 14 to smile.
- 3. CALL PEOPLE BY NAME. The sweetest music to anyone's ears is the sound of his/her own name.
- 4. BE FRIENDLY AND HELPFUL. If you have friends, be a friend.
- 5. BE CORDIAL. Speak and act as though everything you do is a genuine pleasure.
- 6. BE GENUINELY INTERSTED IN PEOPLE. You can like almost everybody if you try.
- 7. BE GENEROUS WITH PRAISE. Cautious with criticism.
- 8. BE CONSIDERATE WITH THE FEELINGS OF OTHERS. There are usually three sides to every controversy; yours, the other fellow's and the correct side.
- BE ALERT TO GIVE SERVICE. What counts most in life is what we do for others.
- 10. ADD TO THIS A GOOD SENSE OF HUMOR...a big dose of patience, a dash of humility and you will be rewarded many fold.

Apologizing doesn't always mean you're wrong and the other person is right. It means you *value* your relationship *more* than your ego.

Janine Summy, Human Resource Specialist, 509-429-1206

Resource Advisors Message

Giant sequoias are among the world's largest and longest-lived trees, reaching 2,500-3,000 years old. They grow naturally only on California's Sierra Nevada mountain range. They are fire adapted, and the trees survived low intensity fires every 10-15 years that removed fallen branches, leaves, logs, and other fuels while promoting seed germination. Historically, fire rarely killed mature giant sequoias. However, we now know they are vulnerable to high severity fire.

AT LEAST 10% of the world's Giant sequoias were lost during the Castle Fire last year.

THANK YOU FOR PROTECTING THE GIANT SEQUIA GROVES! Use these BMP's to help protect the big trees:

- Think of protecting old growth sequoias like a structure.
- Remove surface and ladder fuels from under sequoias. Remove nonsequoia conifers up to 16" diameter. Scatter or chip fuel away from sequoias.
- Scrape duff and fuel from around sequoias, prioritize clearing out cat faces and old fire scars.

Protecting the Sequoia Groves is the #1 Resource Priority
