3. Objective(s): <u>Leaders Intent</u> - An aggressive full suppression strategy will be implemented using direct tactics when safe to do so. Efforts will be made to minimize impacts to residences, the giant sequoia groves and critical infrastructure through the application of well planned tactical responses.																					
<u>Management Objectives</u> <ul style="list-style-type: none"> - Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles. - Minimize the threat to private and public property located on the Tule River Reservation, local communities, giant sequoia groves and cultural resources. - Establish and enhance cooperator, partner and stakeholder relationships. - Follow identified CDC, local, state and federal procedures to minimize the spread of COVID-19. - Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure. 																					
<u>Control Objectives</u> <ul style="list-style-type: none"> - Keep the fire North of Highway 155. - Keep the fire South of Western Divide Highway 190. - Keep the fire East of Cow Mountain Peak, Oak Flat Peak and Gibbon Peak. - Keep the fire West of of Kern River. 																					
General Situational Awareness: <ul style="list-style-type: none"> - Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees. - In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing. - Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

INCIDENT Weather Forecast

FORECAST NO: 22 **NAME OF FIRE:** Windy
PREDICTION FOR: Mon-Tue **UNIT:** CA-TIA
SHIFT DATE: 10/04-10/05 (0600-0600) **SIGNED:** Philomon Geertson (T) / Rich Thompson
FORECAST ISSUED: 10/03/21 @ 1500 **Incident Meteorologist**

WEATHER DISCUSSION: A weak upper low will pass south of the incident today into tomorrow, weakening the high pressure ridge that is responsible for the very dry and warm weather over the last several days. As this occurs, look for enhanced diurnal wind speeds again through this afternoon. Increasing moisture will also lead to periods of mid to high level cloud cover, leading to slightly cooler and moister conditions than yesterday. This gradual cooling and moistening trend will continue through Thursday ahead of a cold front.

WEATHER FORECAST FOR TODAY:

WEATHER: Partly sunny. Areas of smoke.

MAX TEMPERATURES: 78-86 below 4,000 ft. west side and below 5,000 ft. east side; 68-78 at higher elevations.

MIN HUMIDITY: 13-20%

20 FT WINDS:

RIDGETOP - East northeast 6-10 MPH with gusts up to 21 MPH through 0900, then gradually shifting south to west at 5-8 MPH with gusts to 18 MPH.

SLOPE/VALLEY - Through 0900: West of the divide, east 5-9 MPH with gusts up to 15 MPH. East of the divide, downslope/downvalley winds 3-6 MPH with gusts up to 12 MPH, except 8-13 MPH with gusts to 21 MPH along the Kern River.
 0900-1630: Becoming upslope/upvalley 3-8 MPH with gusts up to 17 MPH, except increasing to 9-14 MPH with gusts of 22-27 MPH along the Kern River.
 1630-1800: Winds diminishing and starting to turn downslope/downvalley.

OUTLOOK FOR TONIGHT:

WEATHER: Partly cloudy. Areas of smoke.

MIN TEMPERATURES: 45 ridgetops to 61 Kern Valley.

MAX HUMIDITY: 30-40% eastern side and 35-50% western side and on ridges above 7,000 feet.

20 FT WINDS:

RIDGETOP - West 4-8 MPH with gusts to 17 MPH early, becoming variable to easterly at 3-6 MPH with gusts to 10 MPH overnight.

SLOPE/VALLEY - Downslope/downvalley 2-5 MPH with gusts up to 8 MPH, except becoming downvalley 4-8 MPH with gusts up to 16 MPH along the Kern.

OUTLOOK FOR TUESDAY: Mostly sunny and more humid with stronger westerly winds.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- With a "PIG" of 90%....**YOU are an ignition source... Any New Start will Grow Quickly!**
- Expect drift smoke from regional fires to reduce your visibility....**AND Situational Awareness!**
- PIG values will be linked to shading from smoke...**More Sun= More Spotting Potential!**
- If you can breathe better, so can the fire...**Improved Visibility Equals More Active Fire!**
- Identify Wind, Slope and Fuel Alignment ...**Short Runs Can Happen with Preheating!**
- Spotting comes in many forms...**Make a Plan... for Lofted Material... AND Rollout!!**
- Identify unburned islands close to the line...**PIG Values are Up...Spotting is in Play!!!**

SPECIFIC:

All Divisions: 24/7...ALL FUELS are Now ...very DRY, very AVAILABLE, very RECEPTIVE...

Flame Lengths- 2-6 ft. in Grass, Up to 30 ft. in Brush/Understory... **Fuels Driven!**

Rate of Spread- Up to 30 chains/hour in Grass, Up to 60 chains/hour in Brush...**Fuels Driven!**

Spotting Distances- Up to a 1/2 mile from Grass/Brush, Up to 1 miles in Timber (From Torching)

Probability of Ignition- (Day) Unshaded Up to **90%** - Shaded- Up to 60% (Night) Down to <40%

AIR OPERATIONS:

Sunrise: 06:54

Sunset: 18:38

Expect very poor smoke dispersion until the lower elevation inversion breaks around noon. Limited dissipation later. Mixing heights start out at less than 400 feet; rise to 8,000 AGL; then return to less than 400 feet after sunset. Slight better ventilation again.

Mission Analysis and Engagement

- What is the mission, what is the assignment?
- Are all hazards identified and made known?
- Is additional information needed?
- Lookouts – Communications – Escape Routes – Safety Zones
- Situational Awareness – Perception of the elements in the environment!
Comprehension of the situation and Projection of Future Status.

Be sure all elements of your safety plan are in place prior to engagement

Personal Hygiene and Illness Prevention

With shared utilities such as sleeping quarters, restrooms and the chow hall, the chance of spreading illness and infection is a concern. Take the following steps to limit your exposure to illness or infection:

- Use handwashing stations routinely.
- Stay hydrated and well nourished.
- Get your rest, use hand sanitizer.
- Avoid contact with social surfaces (handrails, doorknobs) without washing hands after.
- Follow all CDC and Agency COVID 19 protocols.

Mitigate or Change Tactics When Faced With

- Indirect Fireline
- Compromised LCES
- Frontal Assault
- Change in wind speed and/or direction
- Re-burn Potential
- Predicted Lightning
- Lack of Communications
- Structural Protection
- Spotting Becomes Common
- Downhill Line Construction

Pacific Southwest Region
Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. We do great; however, stress is cumulative. The fire season can and may have already pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Get Plenty of Rest
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

A CISM Coordinator/Peer Support will be onsite today. We want to hear from you. How are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year with COVID-19 mitigations and fire suppression. Are your needs being met in regard to crisis management? Would you or your crew or unit benefit from follow-up support? Connect with us today or call anytime. Thank you for all you do.

For federal employees, if you are injured, please contact the COMP UL for the Authorization for Treatment (CA-16). We can issue the form directly to the hospital or clinic, but we need full names and SSN for the required forms prior to being able to do that. The employee or supervisor should contact COMP/CLAIMS as soon as possible or upon arrival at the hospital, whichever is convenient.

For claims there are different forms needed based on the circumstances of the property loss or damage. Please contact COMP UL first to find out which forms are appropriate for your situation, and what additional information might be needed. This will expedite the process.

Human Resource Message

“It is not the strongest of the species that survives, nor the most intelligent. It is the one that is most adaptable to change.”

Charles Darwin

This year has been challenging. We are living in an unprecedented time with the COVID pandemic, as well as dealing with extreme fire activities. Understandably, everyone is tired. Everyone is having to adapt and be flexible. Please remember and remind each other to continue to be professional and conduct yourselves with consideration for those around you. Thank
you.
