Short-haul Extraction Description*

Yosemite Helicopter 551 is an Advanced Life Support (ALS) rescue capable ship. For rescue operations, two rescuers can be inserted into technical terrain or an area with tight canopy cover via rappel or Short-haul. Once medical interventions and patient packing are completed by rescuers, 551 will extract all individuals via Short-haul.

Ground personnel should consider an opening free of overhead hazards and snags as a reasonable site. Ensure extraction site is a safe distance from the fire-line (rotor wash). The standard Shorthaul rope length is 150' but can be extended to 250'. During the insertion and extraction process of a patient, ground personnel must remain clear of area.

H-551 will fly to lat and long provided. H-551 will contact personnel on the ground via CALCORD. Once a recon of the site has been completed, 2 rescuers will be inserted via rappel and may be followed by cargo let down (CLD) of gear. Once Rappel/Short-haul operations commence, and the sterile cockpit has been established, H-551 will only monitor the Air Guard frequency. During Rappel/Short-haul operations, contact H-551 via Air Guard only in case of an emergency.

Once rescuers are on the ground, H-551 will depart the area for the closest landing zone (LZ) and configure helicopter for extraction of patient and rescuers via Short-haul. Once patient packaging is completed, H-551 will return to the area and extract personnel. H-551 will fly to the closest LZ and load the patient internally.

*This is intended as a brief description. When requesting a medical evacuation, prior to the arrival of H-551, remember the basics: Utilize the Medical Incident Report (MIR) Page 118, IRPG, scene safety, initial patient care and management of on scene personnel.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	AIRCRAFT OPERATIONS	 Involve aviation leadership with operational planning to avoid risk/exposure transference. Establish trigger points to disengage aviation resources. Keep personnel out of drop zones when bucket work in progress. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective.
ALL	EXTENDED MEDICAL EXTRACTION TIMES.	Identify helispots and communicate lat/longs to DIVS Be familiar with medical plan and communicate 8 line promptly Do to unforeseen weather conditions or mechanical issues with helicopters extraction times may be longer.
ALL	HAZARD TREES	 Follow Hazard Tree Safety Guidelines (IRPG p. 20). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. Be especially alert around snags during wind events or changing wind direction. Check for hazard trees & "widow-makers" in sleeping areas prior to using.
ALL	ENVIROMENTAL HAZARDS	Manage trash in spike camps to avoid attracting bears Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks. Pick up and remove all trash from fire line. Don't allow storage of food in tents
All	WEATHER	 Dress in multiple layers. Even though experiencing cold temperatures, ensure hydration. Winds will enhance wind chill factor effecting resources in camp and on the fire.
ALL	FIRE BEHAVIOR	 Establish and maintain LCES. Take weather observation. Winds increasing with cold front. Allow for adequate time to escape routes and safety zone.
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION&FATIGUE	 Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor your resources for fatigue. Repeated assignments in the same area can lead to complacency. Drinking water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat disorder in yourself and others.
ALL	DRIVING HAZARDS	 Yosemite Valley, High tourist area, where it's common for drivers to stop and start suddenly to take pictures. Drive defensively! Expect the unexpected around every curve. Don't drive when fatigued. Adhere to agency driving regulations and guidelines. Be alert for wildlife.
ALL	SUPPRESSION REPAIR/MOP UP	 Use all required PPE, including eye protection. Be alert for stump holes and root cavities.
ALL	COMMUNICATIONS	Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Answer questions when asked by others. Ask for intel when you don't know the plan. Ensure all personnel are familiar with the incident and IA communications plans
ALL	INFECTIOUS DISEASE	 Maintain 6' foot distance whenever possible. Wear masks when appropriate. Notify MEDL if any symptoms arise. Do frequent handwashing/sanitizing and disinfecting common surfaces.
Red /Rodgers 215a	DATE PREPARED: 9/16/2022 TIME PREPARED: 13:16:23	OPERATIONAL PERIOD: 9/17-20/2022 Prepared by: F.Pingiczer /S.Beachum

WILDLAND FIRE COVID-19 SCREENING TOOL/ TESTING INFO

- Have you in the past 14 days, had contact with a person known to be infected with the Coronavirus (COVID-19)?
 - o Today or in the past 24 hours, have you had any of the following symptoms?

+ Cough more than expected?

+ Shortness of breath or difficulty breathing?

+ Fever? Chills?

+ Sore throat?

+ Nausea or vomiting?

+ Diarrhea?

+ New loss of taste or smell?

+ Fatigue, outside your normal for firefighting?

- + Headache, outside your normal for firefighting?
- + Congestion or runny nose, outside your normal for firefighting?
- + Muscle pain, outside your normal for firefighting?

<u>IF YOU ARE HAVING ANY SIGNS OR SYMPTOMS HAVE SUPERVISOR CALL MEDL</u> <u>@ (530)400-0880 IF IN CAMP, OTHERWISE CALL VIA RADIO FOR FUTHER</u> INSTRUCTIONS.

Preventative Measures:

Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
 - Utilize face coverings as a tool when practical.
 - Clean or replace dirty face coverings, equipment, and PPE.

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a
 public place, and after coughing or sneezing.
 - Avoid handshakes and communal use items.
 - Maintain a supply of hand sanitizer and hand wipes.
 - Disinfectant high touch surfaces often:
 - Radios, phones, doors, pumps, fuel cans, etc.

Communications

 Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your module, your camp!
