

Incident Action Plan

RED FIRE: CA-YNP-000056 / PYW6 (1522)

RODGERS FIRE: CA-YNP-000058 / PZA1 (1522)

Sunday - Tuesday

OPERATIONAL PERIOD

9/11/2022 0700

to

9/13/2022 0700

Fire Information: (209) 379-1493

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: RED FIRE: CA-YNP-000056 / PYW6 (1522)	2. Operational Period:	Date From: 9/11/2022 Time From: 0700	Date To: 9/13/2022 Time To: 0700
---	-------------------------------	---	-------------------------------------

3. Objective(s):

Management Objectives

- Provide for the safety of responders and public through the application of sound risk management and the implementation of tactics and strategy that have a high probability of success with the least amount of exposure.
- Use tactics which limit fire spread utilizing a combination of natural and constructed control features to minimize impacts to values at risk. Ensure tactics are developed in close coordination with assigned resource advisors, meet MIST guidelines and allow for resource benefit as conditions allow.
- Provide for the accurate and timely dissemination of incident related information including smoke and recreational impacts.
- Limit the spread of infectious disease through implementation of the CDC, CA-DPH and FMB/MPHAT guidelines.
- Provide a work environment that promotes mutual respect and is harassment free.

Control Objectives -

<p>Red fire:</p> <ul style="list-style-type: none"> Keep fire east of Buena Vista trail and Ostrander ridge Keep fire west of Clark Range Keep fire north of Buena Vista crest and Merced pass Keep fire south of Bunnell pt, Cascade cliff, and Starr King Lake 	<p>Rodgers fire:</p> <ul style="list-style-type: none"> Keep fire east of Piute trail Keep fire west of Register creek Keep fire north of Tuolumne river and Register creek Keep fire south of Saddle Horse lake, Piute Creek / Rodgers lake
---	---

General Situational Awareness:

- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

5. Site Safety Plan Required? Yes No

FIRE WEATHER FORECAST

FORECAST NO: 1
PREDICTION FOR: Sun/Mon, Sep 11/12, 2022

INCIDENT NAME: Red & Rodgers Fires
UNIT: Yosemite National Park
SIGNED: *Andrew Gorelow*

TIME AND DATE

FORECAST ISSUED: Sat. Sep 10. @ 1800 hours

Incident Meteorologist – Andrew Gorelow

WEATHER DISCUSSION: Former Hurricane Kay will continue to influence the weather today as the additional moisture will allow for the development of scattered afternoon showers and thunderstorms, mainly 1300-1800. Rainfall totals between 0.25"-0.50" are possible where storms develop. RH will remain elevated again today with minimums remaining 40% or greater. Outside of thunderstorm influences, winds will generally remain light and terrain driven. Thunderstorm coverage is forecast to decrease Monday afternoon, but isolated storms are still expected. Temperatures will be a few degrees cooler and there will be little overall change in RH. No significant wind is expected and generally influenced by the terrain.

SKY/WEATHER TODAY (SUNDAY): Partly cloudy in the morning becoming mostly cloudy in the afternoon. Scattered afternoon showers and thunderstorms which will be capable of heavy rain, gusty winds, and small hail. RH will remain elevated through the day. Greatest threat of storms will be 1300-1800. Rainfall amounts between 0.25"-0.50" possible.

MAX TEMP / MIN RH: 65-72 degrees (Down 3-5) / 40-50% (Up 10 percent)

20 FT WINDS:

Slope/Valley: Downslope/downvalley 3-5 mph in the morning, becoming upslope/upvalley 4-7 mph in the afternoon. Gusty and erratic outflow winds possible near storms.

Ridges: Southwest 15-25 mph.

MIXING HEIGHT...6500 feet AGL **TRANSPORT WIND...**S-SW 5-10 mph. **CWR (0.10")...**50% **LAL....**2

SKY/WEATHER TONIGHT (SUNDAY NIGHT): Partly cloudy with isolated early evening thunderstorms then becoming mostly clear. Good overnight RH recoveries.

MIN TEMP / MAX RH: 52-57 degrees.

20 FOOT WINDS:

Slope/Valley: NW in the evening 4-8 mph becoming light drainage overnight.

Ridges: Northwest 10 to 15 decreasing to 5 to 10 mph.

CWR (0.10")...20% early evening. **LAL....**2 early evening, then 1.

SKY/WEATHER MONDAY: Partly cloudy with isolated afternoon showers and thunderstorms. Rainfall amounts generally less than a quarter inch.

MAX TEMP / MIN RH: 60-65 degrees (Little Change) / 40-50% (Little Change)

20 FT WINDS:

Slope/Valley: Light draining winds in the morning 2-4 mph becoming upslope/upvalley 4-8 mph with gusts up to 15 mph.

Ridges: Southwest 15-25 mph.

MIXING HEIGHT...6000 feet AGL **TRANSPORT WIND...**West 10 mph. **CWR (0.10")...**40% **LAL....**2

OUTLOOK for TUESDAY and WEDNESDAY: Conditions will trend drier by mid-week as moisture from Kay shifts away from the area. There will still be a slight chance of thunderstorms Tuesday afternoon, but by Wednesday dry conditions should prevail. Temperatures will remain near normal with RH slowly decreasing each day. By the end of the week, min RH is forecast to drop into the 20s. Southwest winds will prevail each afternoon with gusts between 10-15 mph Tuesday and 10-20 mph Wednesday.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: Wildfire
FIRE NAME: Red & Rodgers	OPERATIONAL PERIOD: Sun/Mon, Sept 10/11, 2022
DATE ISSUED: September 10, 2022 @1800	TIME ISSUED: 1600 hours
UNIT: CA-YNP	SIGNED: /s/ Jennifer Anderson Typed/printed: Jenn Anderson, FBAN (t) Patty Johnson, FBAN

Weather Summary

****Please see attached Fire Weather Forecast****

High Temps: 65^o - 72^o

Winds: See Weather Forecast for fire specific wind information

Min Temps: 52^o - 57^o

Min RH: 40-50%

Energy Release Component (ERC): 85th percentile/ Burning Index (BI): 40th percentile

GENERAL:

Fire activity has continued to decrease the last few days due to the strong efforts of the ground and aerial resources combined with the drop in temperatures and precipitation received on the fires. Fire behavior will be drastically reduced in areas that receive precipitation, however sporadic winds influenced by thunderstorms and the complex terrain can increase fire behavior and spotting distances. Areas with heavy dead and down fuels will still support active fire behavior. Cooler nighttime temperatures, higher humidity recovery, and some precipitation will moderate fire behavior over the next operational period. There will be periods of clouds and storms followed by clear skies and warmer periods that will dry fuels making them more receptive.

Local Thresholds: Combinations of any of these factors can lead to increases in fire behavior:
20' windspeed > 10 mph, relative humidity <12%, temperature >80, 10-Hour Fuel Moisture < 5.

SPECIFIC:

Red: Most activity continues to be on the SW flank of the fire. The fire received ~.40' of precipitation the afternoon of 09/10, which has greatly reduced fire behavior, but pockets of dead and down fuels will still support active fire behavior. Expect some drying in the mornings into the early afternoon that will result in some smoldering and very mild fire behavior. More rain forecasted overnight and into the afternoons along with gusty winds will further limit fire behavior, however in areas that do not receive this precipitation expect the chance of increased winds and spotting distances with receptive fuels that may support more active fire behavior. The abundant amount of granite outcroppings and fuels within rock provide a slowing and in some cases a barrier to fire spread.

Rodgers: Most fire activity continues to be on the southern flank of the fire along Register Creek. The fire received ~.10' of precipitation the afternoon of 09/10, which may temporarily reduce fire spread but pockets of dead and down fuels will still support active fire behavior. Expect some drying in the mornings and afternoons that will result in smoldering and very mild fire behavior. More thunderstorms are forecasted in the overnight and into the afternoon along with gusty winds; however, the area may not receive any precipitation. Fire behavior will be minimal but may flare up with the increased winds. The abundant amount of granite outcroppings and fuels within rock provide a slowing and in some cases a barrier to fire spread.

Initial Attack: Increased thunderstorm activity with associated strong, erratic winds mean there is a chance of new ignitions. Be prepared to support fires in the area if requested. Anticipate minimal to moderate rates of spread depending on fuel conditions and utilize anchor and flank tactics.

AIR OPERATIONS:

With the increased thunderstorm activity, do not depend on air operations throughout the next few operational periods.

SAFETY:

Threat of thunderstorm related fire behavior will require situational awareness at all times, smoke may obscure thunder cells above, as well as travel routes, fire in your local area, etc.. Ensure that LCES accounts for long travel times. Review page 17 of the Incident Response Pocket Guide – "Thunderstorm Safety".

ASSIGNMENT LIST (ICS 204 WF)

CONTROLLED UNCLASSIFIED

Short-haul Extraction Description*

Yosemite Helicopter 551 is an Advanced Life Support (ALS) rescue capable ship. For rescue operations, two rescuers can be inserted into technical terrain or an area with tight canopy cover via rappel or Short-haul. Once medical interventions and patient packing are completed by rescuers, 551 will extract all individuals via Short-haul.

Ground personnel should consider an opening free of overhead hazards and snags as a reasonable site. Ensure extraction site is a safe distance from the fire-line (rotor wash). The standard Short-haul rope length is 150' but can be extended to 250'. During the insertion and extraction process of a patient, ground personnel must remain clear of area.

H-551 will fly to lat and long provided. H-551 will contact personnel on the ground via CALCORD. Once a recon of the site has been completed, 2 rescuers will be inserted via rappel and may be followed by cargo let down (CLD) of gear. Once Rappel/Short-haul operations commence, and the sterile cockpit has been established, H-551 will only monitor the Air Guard frequency. ***During Rappel/Short-haul operations, contact H-551 via Air Guard only in case of an emergency.***

Once rescuers are on the ground, H-551 will depart the area for the closest landing zone (LZ) and configure helicopter for extraction of patient and rescuers via Short-haul. Once patient packaging is completed, H-551 will return to the area and extract personnel. H-551 will fly to the closest LZ and load the patient internally.

*This is intended as a brief description. When requesting a medical evacuation, prior to the arrival of H-551, remember the basics: Utilize the Medical Incident Report (MIR) Page 118, IRPG, scene safety, initial patient care and management of on scene personnel.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	THUNDERSTORMS	<ul style="list-style-type: none"> • Follow Thunderstorm Safety Precautions (IRPG p. 17) • Don't stay on ridge tops, in wide open areas or near ledges or rock outcroppings. Don't group together. • Expect reverse in wind direction, noticeable rise in wind speed and a sharp drop in temperature. Rain, hail, and lightning may be present.
ALL	FIRE BEHAVIOR/ WEATHER	<ul style="list-style-type: none"> • Establish and maintain LCES. Take weather observation. • Allow for adequate time to escape routes and safety zone. • Winds increasing or changing direction.
ALL	HAZARD TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p. 20). • Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. • Be especially alert around snags during wind events or changing wind direction. • Check for hazard trees & "widow-makers" in sleeping areas prior to using. • Maintain Situational Awareness.
ALL	FATIGUE	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor your resources for fatigue.
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> • Drive defensively! Expect the unexpected around every curve. • You are working in a high tourist area where it's common for drivers to stop in the middle of the road for photos. • Don't drive when fatigued. Adhere to agency driving regulations and guidelines. • Be alert for wildlife, heavy trucks, & high-speed drivers.
ALL	AIRCRAFT OPERATIONS	<ul style="list-style-type: none"> • Keep personnel out of drop zones when bucket work in progress. • Use air-to-ground frequency to communicate with aircraft. • Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective.
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> • Establish and maintain LCES. • Locate line in favorable location, lighter fuels and gentler topography when possible. • Utilize natural or existing barriers. • If possible, burn out or backfire as line construction progresses.
ALL	BEAR PRECAUTIONS	<ul style="list-style-type: none"> • Pick up and remove all trash from fire line. Don't allow storage of food in tents. Manage trash in spike camps to avoid attracting bears
ALL	HYDRATION	<ul style="list-style-type: none"> • Drinking water before, during and after shifts, up to 1.5 gal. per shift. • Be alert for signs of heat disorder in yourself and others.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Answer questions when asked by others. Ask for intel when you don't know the plan. • Ensure all personnel are familiar with the incident and IA communications plans
ALL	COLD / FLU VIRUS SYMPTOMS SPREADING THRU INCIDENT PERSONNEL	<ul style="list-style-type: none"> • Follow good hygiene practices – wash hands frequently.... before eating, after rest room use, etc. Treat symptoms early, visit Med Unit. Get as much rest as possible, stay hydrated, eat healthy foods (fruits & vegetables)
Red Rodgers 215a	DATE PREPARED: 9/10/2022 TIME PREPARED: 18:47:08	OPERATIONAL PERIOD: 9/11-12/2022 <ul style="list-style-type: none"> • Prepared by: Pingiczer / Danen / Ferguson

SAFETY MESSAGE

Planning for Medical Emergencies

- Prior to each operational period be able to answer these 3 questions;
 - 1. What are you going to do if someone gets hurt?**
 - Where is your closest medical personnel and ambulance?
 - 2. How will we get them out of here?**
 - Can you get the injured to a road or helispot, what will it take to do that?
 - 3. How long will it take to get them to a hospital?**
 - Where is the closest hospital, air or ground transport, what conditions can change or affect the transportation timeline?

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE SPOT FIRES	ROLLING MATERIAL DEHYDRATION BUCKET DROPS	HAZARD TREES COMPLACENCY LIGHTNING
---	--	---

Be sure all elements of your safety plan are in place prior to engagement

Planning for Safety

Have multiple plans and make them known

P – Primary Plan (Offense)

Focused on firefighter safety and mission objectives

A – Alternate Plan (Offense)

A fallback plan that closely supports the primary

C - Contingency Plan (Defense)

Entirely focused on firefighter safety

E – Emergency Plan (Defense)

Entirely focused on individual firefighter survival

Engagement following Rain

- Use caution watching for rocks and trees that may have become unstable from the added moisture to the soil.
- Drought stricken trees may become more unstable with added weight from recent rain.
- Watch for loose and rolling material while working on slopes.
- Keep risk commensurate with benefit, waiting another day until conditions improve may be best.

WILDLAND FIRE COVID-19 SCREENING TOOL/ TESTING INFO

- **Have you in the past 14 days, had contact with a person known to be infected with the Coronavirus (COVID-19)?**
 - **Today or in the past 24 hours, have you had any of the following symptoms?**
 - + Cough more than expected?
 - + Fever? Chills?
 - + Nausea or vomiting?
 - + New loss of taste or smell?
 - + Headache, outside your normal for firefighting?
 - + Congestion or runny nose, outside your normal for firefighting?
 - + Muscle pain, outside your normal for firefighting?
 - + Shortness of breath or difficulty breathing?
 - + Sore throat?
 - + Diarrhea?
 - + Fatigue, outside your normal for firefighting?

IF YOU ARE HAVING ANY SIGNS OR SYMPTOMS HAVE SUPERVISOR CALL MEDL @ (530)400-0880 IF IN CAMP, OTHERWISE CALL VIA RADIO FOR FUTHER INSTRUCTIONS.

Preventative Measures:

Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
 - Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

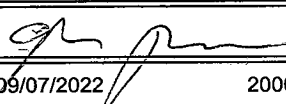

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
 - Avoid handshakes and communal use items.
 - Maintain a supply of hand sanitizer and hand wipes.
 - Disinfectant high touch surfaces often:
 - Radios, phones, doors, pumps, fuelcans, etc.

Communications

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your module, your camp!

Red Fire-Incident Training Program

A TNSP is available on this incident to assist with your training assignment needs and documentation.

To receive documented credit for your assignment, click on the link below to access and complete the Trainee Registration Form or scan the QR code on the front of your IAP and click on the Training Specialist tab. Once registered you will receive additional instructions via text.

Registering your training assignment as early as possible on the incident is to your benefit!

The Training Specialist Desk is located in the Yosemite Valley Lodge. Permanent location TBA.

For training related questions, call: Bill Fullerton (TNSP)T at 209-768-8786 or email billfullerton@sbcglobal.net

Hard Copies of the Trainee Registration Form is attached to this message.

[Red Fire-Trainee Registration](#)

INCIDENT TRAINEE REGISTRATION FORM

Complete ALL fields and return to Training Specialist or DROP BOX for entry into database.

Remember to close out training packets with the Training Specialist before DEMOB.

TRAINEE's DATA

Name (PRINT): _____ ICS Trainee Position: _____

Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the download button to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

Once you have completed the appropriate form for your resource please email to your supervisor for approval. Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving please email the approved form back to the resource for their record and to finance at 2022.red.finance@firenet.gov

Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to 2022.red.finance@firenet.gov

RED / RODGERS FIRE DEMOB MESSAGE
Demob unit phone # 1-530-264-8701

When you are scheduled to be released from either of these incidents, there are a few steps to take to ensure a smooth demob before travelling back to your home unit or to a new assignment. Call the demob unit first to start the process and to answer any questions.

All of your finance documents shall be completed and turned in electronically. Please utilize the finance message in the IAP and follow the instructions to turn in any shift tickets, CTR's, and/or possible comp/claims.

If you have checked out a radio, you will need to return it to the communication trailer located at the emergency services camp in Yosemite Village.

For incident replacement, fill out a general message and send it electronically to the ordering manager at CIIMT10ordering@gmail.com. If you have any questions, please call Tracey at 1-916-201-4366 and she can help you with the process.

Ground support is located at the El Portal fire cache along with the supply unit and fuel. Post vehicle inspections will be done there and when completed, the GSUL will notify the demob unit.

When you are finished with the required steps, call the demob unit to finalize your release and return travel.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
