

# INCIDENT ACTION PLAN

RED FIRE: CA-YNP-000056 / PYW6 (1522)

RODGERS FIRE: CA-YNP-000058 / PZA1 (1522)

Tuesday - Thursday

## OPERATIONAL PERIOD

9/13/2022 0700

to

9/15/2022 0700

Fire Information: (209) 379-1493

# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> RED FIRE: CA-YNP-000056 / PYW6 (1522)	<b>2. Operational Period:</b>	Date From: 9/13/2022 Time From: 0700	Date To: 9/15/2022 Time To: 0700
---	-------------------------------	---	-------------------------------------

**3. Objective(s):**

- Management Objectives**
- Provide for the safety of responders and public through the application of sound risk management and the implementation of tactics and strategy that have a high probability of success with the least amount of exposure.
  - Use tactics which limit fire spread utilizing a combination of natural and constructed control features to minimize impacts to values at risk. Ensure tactics are developed in close coordination with assigned resource advisors, meet MIST guidelines and allow for resource benefit as conditions allow.
  - Provide for the accurate and timely dissemination of incident related information including smoke and recreational impacts.
  - Limit the spread of infectious disease through implementation of the CDC, CA-DPH and FMB/MPHAT guidelines.
  - Provide a work environment that promotes mutual respect and is harassment free.

**Control Objectives -**

- |   |   |
|---|---|
| <p><b>Red fire:</b></p> <ul style="list-style-type: none"> <li>Keep fire east of Buena Vista trail and Ostrander ridge</li> <li>Keep fire west of Clark Range</li> <li>Keep fire north of Buena Vista crest and Merced pass</li> <li>Keep fire south of Bunnell pt, Cascade cliff, and Starr King Lake</li> </ul> | <p><b>Rodgers fire:</b></p> <ul style="list-style-type: none"> <li>Keep fire east of Piute trail</li> <li>Keep fire west of Register creek</li> <li>Keep fire north of Tuolumne river and Register creek</li> <li>Keep fire south of Saddle Horse lake, Piute Creek / Rodgers lake</li> </ul> |
|---|---|

**General Situational Awareness:**

- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

**5. Site Safety Plan Required?** Yes  No

# FIRE WEATHER FORECAST

**FORECAST NO:** 2  
**PREDICTION FOR:** Tue/Wed, Sep 13/14, 2022

**INCIDENT NAME:** Red & Rodgers Fires  
**UNIT:** Yosemite National Park  
**SIGNED:** *Andrew Gorelow*

**TIME AND DATE**  
**FORECAST ISSUED:** Mon Sep 12 @ 1800 hours

**Incident Meteorologist** – Andrew Gorelow

**WEATHER DISCUSSION:** An area of low pressure will approach the west coast and bring an increasing southwest flow to the region. This will help to scour out the moisture from former Hurricane Kay that has brought daily afternoon showers and thunderstorms to the area. There will still be a few isolated showers and storms this afternoon, but coverage will be a lot less than previous days, however, some storms could produce between a tenth and a quarter of an inch of rain. Dry conditions are expected Wednesday with no threat of showers/t-storms. RH will remain elevated again today, but will trend 5-15 percent lower Wednesday. Look for afternoon Southwest winds around 6-8 mph today, but will increase Wednesday afternoon with gusts to around 15 mph. Dry conditions will prevail through the remainder of the week with RH trending downward each day. Temperatures are expected to remain near normal and winds will follow a typical upvalley/downvalley cycle Thursday into the weekend.

**SKY/WEATHER TODAY (TUESDAY):** Partly cloudy with isolated afternoon showers and thunderstorms. Light winds in the morning becoming southwest 4-7 mph.

**MAX TEMP / MIN RH:** 57-62 degrees (Down 3-5) / 50-60% (Little Change)

**20 FT WINDS:**

**Slope/Valley:** Downslope/downvalley 3-5 mph in the morning, becoming upslope/upvalley 4-7 mph in the afternoon. Gusty and erratic outflow winds possible near storms.

**Ridges:** Southwest 10-20 mph.

**MIXING HEIGHT...**5500 feet AGL **TRANSPORT WIND...**SW 10-15 mph. **CWR (0.10")...**20% **LAL...**2

**SKY/WEATHER TONIGHT (TUESDAY NIGHT):** Partly cloudy with very good RH recoveries. Light drainage winds.

**MIN TEMP / MAX RH:** 46-50 degrees. / 75-90%

**20 FOOT WINDS:**

**Slope/Valley:** SW early evening, then becoming light drainage overnight.

**Ridges:** Northwest 10 to 15 decreasing to 5 to 10 mph.

**CWR (0.10")...**0% **LAL...**1.

**SKY/WEATHER WEDNESDAY:** Mostly sunny with a drying trend. Temperatures remaining near normal. Gusty afternoon southwest winds.

**MAX TEMP / MIN RH:** 58-63 degrees (Up slightly) / 45-50% (Down 5-10%)

**20 FT WINDS:**

**Slope/Valley:** Light draining winds in the morning 2-4 mph becoming southwest 5-10 mph with gusts to 15 mph.

**Ridges:** Southwest 10-20 mph.

**MIXING HEIGHT...**5500 feet AGL **TRANSPORT WIND...**SW 15-20 mph. **CWR (0.10")...**0% **LAL...**1

**OUTLOOK for THURSDAY and FRIDAY:** A drying trend will continue through the end of the week with RH dropping about 5-10% each day and temperatures remaining near normal. No significant winds are expected with daily afternoon southwest winds 5-8 mph. Good overnight RH recoveries can also be expected each day. Skies will remain generally clear Thursday and Friday with just a few clouds each afternoon.

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: Wildfire
FIRE NAME: Red & Rodgers	OPERATIONAL PERIOD: Tues/Wed, Sept 13/14, 2022
DATE ISSUED: September 12, 2022 @1800	TIME ISSUED: 1600 hours
UNIT: CA-YNP	SIGNED: /s/ Jennifer Anderson Typed/printed: Jenn Anderson, FBAN (t) Scott Linn, FBAN

### Weather Summary

\*\*Please see attached Fire Weather Forecast\*\*

Energy Release Component (ERC): 40<sup>th</sup> percentile/ Burning Index (BI): 30<sup>th</sup> percentile  
Probability of Ignition: 9%-12%

Fuels: Timber (Litter & Understory) & Brush  
ERC levels were at critical levels the last month but have moderated with the recent precipitation. However, these fuels can dry out quickly and become available for contribution to fire spread. Live fuels are starting to move towards dormancy and could become more available.

Topography: Red is located in the Illilouette Creek basin with a combination of flat areas and steep drainages.

Rodgers is located in rough terrain, granite outcroppings, high elevation and steep drainages.

### GENERAL:

Fire behavior will be minimal in areas that received precipitation; areas with heavy dead and down fuels will transition to smoldering to full consumption. Cooler nighttime temperatures, higher humidity recovery, and light precipitation will continue to moderate fire behavior over the next few operational periods. Overall, minimal fire behavior with creeping and smoldering will be observed across both fire areas. As fuels begin to dry over the next few days, expect a slow increase in fire behavior especially in heavy fuels. Grasses and shrubs will not support fire spread.

Local Thresholds: Combinations of any of these factors can lead to increases in fire behavior:  
**20' windspeed > 10 mph, relative humidity <12%, temperature >80, 10-Hour Fuel Moisture < 5.**

### SPECIFIC:

**Red:** Most activity continues to be on the SW flank of the fire. Fire behavior is minimal with creeping and smoldering, but pockets of dead and down fuels will continue to consume as fuels dry out. The abundant amount of granite outcroppings and fuels within rock provide a slowing and in some cases a barrier to fire spread.

**Rodgers:** Scattered heat is present on the northeast flank and southern flank of the fire along Register Creek. Fire behavior is minimal with creeping and smoldering, but pockets of dead and down fuels will continue to consume as fuels dry out. The abundant amount of granite outcroppings and fuels within rock provide a slowing and in some cases a barrier to fire spread.

**Initial Attack:** As fuels dry out and RH levels drop, be alert to new ignitions that may be held over from previous lighting from the last few days. Be prepared to support fires in the area if requested. Anticipate minimal to moderate rates of spread depending on fuel conditions and utilize anchor and flank tactics.

### Air Ops/Smoke Dispersion

Smoke may impact aviation operations in the mornings but should lift in the afternoons (~1300-1400).

### Safety

Varying amounts of moisture in the fire area, some fuels were sheltered from moisture. Drying rates may accelerate with wind and warming. Fuels that have consumed leave hot ash pits. Fire weakened snags and trees are not to be trusted...maintain situational awareness of your surroundings at all times – the situation may change.

**Shutdown based on Mariposa location**

**What is the technical name of an airsickness bag?**

### Short-haul Extraction Description\*

Yosemite Helicopter 551 is an Advanced Life Support (ALS) rescue capable ship. For rescue operations, two rescuers can be inserted into technical terrain or an area with tight canopy cover via rappel or Short-haul. Once medical interventions and patient packing are completed by rescuers, 551 will extract all individuals via Short-haul.

Ground personnel should consider an opening free of overhead hazards and snags as a reasonable site. Ensure extraction site is a safe distance from the fire-line (rotor wash). The standard Short-haul rope length is 150' but can be extended to 250'. During the insertion and extraction process of a patient, ground personnel must remain clear of area.

H-551 will fly to site and land as provided. H-551 will contact personnel on the ground via CALCORD. Once a recon of the site has been completed, 2 rescuers will be inserted via rappel and may be followed by cargo let down (CLD) of gear. Once Rappel/Short-haul operations commence, and the sterile cockpit has been established, H-551 will only monitor the Air Guard frequency. ***During Rappel/Short-haul operations, contact H-551 via Air Guard only in case of an emergency.***

Once rescuers are on the ground, H-551 will depart the area for the closest landing zone (LZ) and configure helicopter for extraction of patient and rescuers via Short-haul. Once patient packaging is completed, H-551 will return to the area and extract personnel. H-551 will fly to the closest LZ and load the patient internally.

\*This is intended as a brief description. When requesting a medical evacuation, prior to the arrival of H-551, remember the basics: Utilize the Medical Incident Report (MIR) Page 118, IRPG, scene safety, initial patient care and management of on scene personnel.

**INCIDENT RISK ANALYSIS (ICS 215a)**

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	THUNDERSTORMS	<ul style="list-style-type: none"> <li>Follow Thunderstorm Safety Precautions (IRPG p. 17)</li> <li>Don't stay on ridge tops, in wide open areas or near ledges or rock outcroppings. Don't group together.</li> <li>Expect reverse in wind direction, noticeable rise in wind speed and a sharp drop in temperature. Rain, hail, and lightning may be present.</li> </ul>
ALL	AIRCRAFT OPERATIONS	<ul style="list-style-type: none"> <li>Involve aviation leadership with operational planning to avoid risk/exposure transference.</li> <li>Establish trigger points to disengage aviation resources.</li> <li>Keep personnel out of drop zones when bucket work in progress.</li> <li>Use air-to-ground frequency to communicate with aircraft.</li> <li>Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective.</li> </ul>
ALL	EXTENDED MEDICAL EXTRACTION TIMES.	<ul style="list-style-type: none"> <li>Identify helispot and communicate lat/longs to DIVS</li> <li>Be familiar with medical plan and communicate 8 line promptly</li> <li>Due to unforeseen weather conditions or mechanical issues with helicopters extraction times may be longer than anticipated.</li> </ul>
ALL	ENVIROMENTAL HAZARDS	<ul style="list-style-type: none"> <li><b>Manage trash in spike camps to avoid attracting bears</b></li> <li>Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks.</li> <li>Pick up and remove all trash from fire line. Don't allow storage of food in tents</li> </ul>
ALL	FIRE BEHAVIOR/ WEATHER	<ul style="list-style-type: none"> <li>Establish and maintain LCES. Take weather observation.</li> <li>Allow for adequate time to escape routes and safety zone.</li> </ul>
ALL	HAZARD TREES	<ul style="list-style-type: none"> <li>Follow Hazard Tree Safety Guidelines (IRPG p. 20).</li> <li>Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen.</li> <li>Be especially alert around snags during wind events or changing wind direction.</li> <li>Check for hazard trees &amp; "widow-makers" in sleeping areas prior to using.</li> </ul>
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION&FATIGUE	<ul style="list-style-type: none"> <li>Be alert for signs of fatigue and take breaks as necessary.</li> <li>Maintain 2:1 work/rest ratio. Monitor your resources for fatigue.</li> <li><b>Repeated assignments in the same area can lead to complacency.</b></li> <li>Drinking water before, during and after shifts, up to 1.5 gal. per shift.</li> <li>Be alert for signs of heat disorder in yourself and others.</li> </ul>
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> <li><b>Yosemite Valley, High tourist area, where it's common for drivers to stop and start suddenly to take pictures.</b></li> <li>Drive defensively! Expect the unexpected around every curve.</li> <li>Don't drive when fatigued. Adhere to agency driving regulations and guidelines.</li> <li>Be alert for wildlife.</li> </ul>
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> <li>Establish and maintain LCES.</li> <li>Locate line in favorable location, lighter fuels and gentler topography when possible.</li> <li>Utilize natural or existing barriers.</li> <li>If possible, burn out or backfire as line construction progresses.</li> </ul>
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> <li>Share your Situational Awareness (hazards, changes, etc.) to those who also have a need.</li> <li>Answer questions when asked by others. Ask for intel when you don't know the plan.</li> <li>Ensure all personnel are familiar with the incident and IA communications plans</li> </ul>
ALL	INFECTIOUS DISEASE	<ul style="list-style-type: none"> <li>Maintain 6' foot distance whenever possible. Wear masks when appropriate. Notify MEDL if any symptoms arise.</li> <li>Do frequent handwashing/sanitizing and disinfecting common surfaces.</li> </ul>

## **SAFETY MESSAGE**

### **Crew Safety Is Dependent Upon Competent And Confident Leadership**

Every Incident Supervisor Has The Responsibility To Confirm That Safe Practices Are Known And Observed

- **TAKE CHARGE** of assigned resources
- **MOTIVATE** crew members with a "can do" safety attitude
- **DEMONSTRATE INITIATE** by taking appropriate action in the absence of orders
  - **COMMUNICATE** by giving specific instructions and asking for feedback
  - **SUPERVISE** at the scene of the action

#### **MAJOR HAZARDS AND RISKS**

STEEP TERRAIN FATIGUE SPOT FIRES	ROLLING MATERIAL DEHYDRATION EVAC TIMES	LIGHTNING HAZARD TREES COMPLACENCY
--	---	--

***Be sure all elements of your safety plan are in place prior to engagement***

#### **Briefing Protocol**

Brief your personnel using the IRPG checklist prior to engagement

Re-brief anytime your plan changes, unexpected changes compromise the plan or your safety, or anytime essential information becomes known and needs to be communicated

Ask questions to be sure essential content is understood

#### **Radio Communications**

- Use clear and concise language when transmitting
- Pause briefly before speaking when transmitting
- Wait for the repeater to click off before replying to a message
- Acknowledge messages to ensure they were received
- Keep spare batteries readily available
- When channels are busy, keep radio traffic to a minimum
- Always scan the command, tactical, and air to ground channels

## **WILDLAND FIRE COVID-19 SCREENING TOOL/ TESTING INFO**

- **Have you in the past 14 days, had contact with a person known to be infected with the Coronavirus (COVID-19)?**
  - **Today or in the past 24 hours, have you had any of the following symptoms?**
    - + Cough more than expected?
    - + Fever? Chills?
    - + Nausea or vomiting?
    - + New loss of taste or smell?
    - + Headache, outside your normal for firefighting?
    - + Congestion or runny nose, outside your normal for firefighting?
    - + Muscle pain, outside your normal for firefighting?
    - + Shortness of breath or difficulty breathing?
    - + Sore throat?
    - + Diarrhea?
    - + Fatigue, outside your normal for firefighting?

**IF YOU ARE HAVING ANY SIGNS OR SYMPTOMS HAVE SUPERVISOR CALL MEDL @ (530)400-0880 IF IN CAMP, OTHERWISE CALL VIA RADIO FOR FUTHER INSTRUCTIONS.**

### **Preventative Measures:**

#### **Social Distancing and Protective Equipment**

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
  - Utilize face coverings as a tool when practical.
  - Clean or replace dirty face coverings, equipment, and PPE.

#### **Hygiene on the Fireline**

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
  - Avoid handshakes and communal use items.
  - Maintain a supply of hand sanitizer and hand wipes.
    - Disinfectant high touch surfaces often:
      - Radios, phones, doors, pumps, fuel cans, etc.

#### **Communications**

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

**Protect yourself, your module, your camp!**

***Red Fire-Incident Training Program***

A TNSP is available on this incident to assist with your training assignment needs and documentation.

To receive documented credit for your assignment, click on the link below to access and complete the Trainee Registration Form or scan the QR code on the front of your IAP and click on the Training Specialist tab. Once registered you will receive additional instructions via text.

Registering your training assignment as early as possible on the incident is to your benefit!

The Training Specialist Desk is located in the Yosemite Valley Lodge. Permanent location TBA.

For training related questions, call: Bill Fullerton (TNSP)T at 209-768-8786 or email [billfullerton@sbrglobal.net](mailto:billfullerton@sbrglobal.net)

Hard Copies of the Trainee Registration Form is attached to this message.

# INCIDENT TRAINEE REGISTRATION FORM

Complete ALL fields and return to Training Specialist or DROP BOX for entry into database.

Remember to close out training packets with the Training Specialist before DEMOB.

## TRAINEE's DATA

## Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the download button to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

Once you have completed the appropriate form for your resource please email to your supervisor for approval.

Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving, please email the approved form back to the resource for their record and to finance at [2022.red.finance@firenet.gov](mailto:2022.red.finance@firenet.gov)

**Make sure you include in the subject line:**

- Fire Name you are assigned to
- Your Resource Order Number
- Your Resource Name

**Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to [2022.red.finance@firenet.gov](mailto:2022.red.finance@firenet.gov)**

**RED / RODGERS FIRE DEMOB MESSAGE**  
**Demob unit phone # 1-530-264-8701**

When you are scheduled to be released from either of these incidents, there are a few steps to take to ensure a smooth demob before travelling back to your home unit or to a new assignment. Call the demob unit first to start the process and to answer any questions.

All of your finance documents shall be completed and turned in electronically. Please utilize the finance message in the IAP and follow the instructions to turn in any shift tickets, CTR's, and/or possible comp/claims.

If you have checked out a radio, you will need to return it to the communication trailer located at the emergency services camp in Yosemite Village.

For incident replacement, fill out a general message and send it electronically to the ordering manager at [CIIMT10ordering@gmail.com](mailto:CIIMT10ordering@gmail.com). If you have any questions, please call Tracey at 1-916-201-4366 and she can help you with the process.

Ground support is located at the El Portal fire cache along with the supply unit and fuel. Post vehicle inspections will be done there and when completed, the GSUL will notify the demob unit.

When you are finished with the required steps, call the demob unit to finalize your release and return travel.

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> - 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> - 3<sup>o</sup> burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
