# FIRE WEATHER FORECAST

**FORECAST NO:** 3  
**PREDICTION FOR:** Thu/Fri, Sep 15/16, 2022

**INCIDENT NAME:** Red & Rodgers Fires  
**UNIT:** Yosemite National Park  
**SIGNED:** Andrew Gorelow

**TIME AND DATE**  
**FORECAST ISSUED:** Wed Sep 14 @ 1800 hours      **Incident Meteorologist – Andrew Gorelow**

**WEATHER DISCUSSION:** A weak area of low pressure over the region will keep cool, but dry conditions in place through the end of the week. Temperatures will remain near normal with afternoon RH dropping into the 30-40% range. Winds will generally remain terrain driven with some afternoon southwest gusts up to 15 mph, especially in aligned drainages. Overnight RH recoveries will remain good. We are looking at some changes this weekend as a stronger area of low pressure digs down the coast. This will bring increasing southwest winds Saturday afternoon along with RHs dropping to around 30-35%. Shower chances will increase Sunday afternoon and especially Sunday night and Monday as the area of low pressure moves closer. This could bring widespread rain showers along with snow levels potentially down to 8500 feet. Any rain or snow amounts are highly uncertain, but it looks like rain/snow chances will remain in the forecast until the middle part of next week.

**SKY/WEATHER TODAY (THURSDAY):** Mostly sunny. Inversion lifting 1100-1200.

**MAX TEMP / MIN RH:** 53-58 degrees (Down 1-2) / 35-40% (Little Change)

**20 FT WINDS:**

**Slope/Valley:** Downslope/downvalley 3-5 mph in the morning, becoming upslope/upvalley 4-7 mph in the afternoon with occasional gusts to 15 mph.

**Ridges:** Southwest 5-10 mph.

**MIXING HEIGHT...**5000 feet AGL **TRANSPORT WIND...**SW 10 mph.      **CWR (0.10")...**0%      **LAL....**1

**SKY/WEATHER TONIGHT (THURSDAY NIGHT):** Mostly clear. Good overnight RH recoveries. Light drainage winds.

**MIN TEMP / MAX RH:** 40-45 degrees. / 50-60%

**20 FOOT WINDS:**

**Slope/Valley:** SW early evening, then becoming light drainage overnight.

**Ridges:** Light and Variable.

**CWR (0.10")...**0%      **LAL....**1.

**SKY/WEATHER FRIDAY:** Mostly sunny. Inversion lifting 1100-1200.

**MAX TEMP / MIN RH:** 55-60 degrees (Up 2-4) / 33-38% (Down 3-5%)

**20 FT WINDS:**

**Slope/Valley:** Light draining winds in the morning 2-4 mph becoming southwest 5-10 mph with gusts to 15 mph.

**Ridges:** Southwest 10 mph.

**MIXING HEIGHT...**5500 feet AGL **TRANSPORT WIND...**SW 15-20 mph.      **CWR (0.10")...**0%      **LAL....**1

**OUTLOOK for SATURDAY and SUNDAY:** An area of low pressure digging off the northern and central CA coast this weekend will bring changing weather. Southwest winds will increase Saturday afternoon ahead of the trough with gusts up to 25 mph with potentially higher gusts over the exposed ridges. Afternoon RH will drop to around 30% with temperatures in the mid to upper 50s. As the trough approaches Sunday, moisture will increase bringing a better chance of showers Sunday afternoon. Snow levels are expected to drop to around 8500 feet. Temps will drop about 6-9 degrees on Sunday.

## SPIKE CAMP TEMPERATURES

RED	THU	FRI	SAT	SUN	MON
H6, H11 (8240')	42/56	43/58	41/56	37/46	35/52
H9 (6960')	45/58	45/60	44/58	40/49	38/54

## RODGERS

H2 (7780')	42/60	41/62	39/60	38/48	36/55

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER: 3</b>	<b>TYPE OF FIRE: Wildfire</b>
<b>FIRE NAME: Red &amp; Rodgers</b>	<b>OPERATIONAL PERIOD: Thurs/Fri, Sept 15/16, 2022</b>
<b>DATE ISSUED: September 14, 2022 @1800</b>	<b>TIME ISSUED: 1600 hours</b>
<b>UNIT: CA-YNP</b>	<b>SIGNED: /s/ Jennifer Anderson</b> <b>Typed/printed: Jenn Anderson, FBAN (t)</b> <b>Scott Linn, FBAN</b>

### Weather Summary

\*\*Please see attached Fire Weather Forecast\*\*

Red & Rogers Energy Release Component (ERC): 20<sup>th</sup> percentile/ Burning Index (BI): 20<sup>th</sup> percentile (Moderate)  
Low/Moderate Elevation Energy Release Component (ERC): 55<sup>th</sup> – 85<sup>th</sup> percentile/Burning Index (BI): 50<sup>th</sup>-95<sup>th</sup> (High)  
Probability of Ignition: 9%-12%

Fuels: Timber (Litter & Understory) & Brush  
ERC levels were at critical levels the last month but have moderated with the recent precipitation. However, these fuels can dry out quickly and become available for contribution to fire spread. Live fuels are starting to move towards dormancy and could become more available.

Topography: Red is located in the Illilouette Creek basin with a combination of flat areas and steep drainages.

Rodgers is located in rough terrain, granite outcroppings, high elevation and steep drainages.

#### GENERAL:

Overall, minimal fire behavior with creeping and smoldering will be observed across both fire areas. As fuels begin to dry over the next few days, expect a slow increase in fire behavior especially in heavy fuels. Grasses and shrubs will not support fire spread.

Local Thresholds: Combinations of any of these factors can lead to increases in fire behavior:

**20' windspeed > 10 mph, relative humidity <12%, temperature >80, 10-Hour Fuel Moisture < 5.**

#### SPECIFIC:

**Red:** Most activity continues to be on the SW flank of the fire. Fire behavior is minimal with creeping and smoldering, but pockets of dead and down fuels will continue to consume as fuels dry out. The abundant amount of granite outcroppings and fuels within rock provide a slowing and in some cases a barrier to fire spread.

**Rodgers:** Scattered heat is present on the northeast flank. Fire behavior is minimal with creeping and smoldering, but pockets of dead and down fuels will continue to consume as fuels dry out. The abundant amount of granite outcroppings and fuels within rock provide a slowing and in some cases a barrier to fire spread.

**Initial Attack:** As fuels dry out and RH levels drop, be alert to new ignitions that may be held over from previous lighting from the last few days. Be prepared to support fires in the area if requested. Anticipate minimal to moderate rates of spread depending on fuel conditions and utilize anchor and flank tactics.

#### Air Ops/Smoke Dispersion

The fires are producing much less smoke each day. Although conditions may be hazy, the air should be clear enough to support air operations throughout the entire operational period.

#### Safety

Isolated flare-up are possible in areas that have not shown activity in many days. Scorched trees may fall into heat initiating a flare-up. Winds may kindle smoldering fuels to flame. Review Common Denominators of Fire Behavior on Tragedy Fires (IRPG page 5).

Shutdown based on Mariposa location

**REMARKS**

What is the farthest distance a paper airplane has flown?

### Short-haul Extraction Description\*

Yosemite Helicopter 551 is an Advanced Life Support (ALS) rescue capable ship. For rescue operations, two rescuers can be inserted into technical terrain or an area with tight canopy cover via rappel or Short-haul. Once medical interventions and patient packing are completed by rescuers, 551 will extract all individuals via Short-haul.

Ground personnel should consider an opening free of overhead hazards and snags as a reasonable site. Ensure extraction site is a safe distance from the fire-line (rotor wash). The standard Short-haul rope length is 150' but can be extended to 250'. During the insertion and extraction process of a patient, ground personnel must remain clear of area.

H-551 will fly to lat and long provided. H-551 will contact personnel on the ground via CALCORD. Once a recon of the site has been completed, 2 rescuers will be inserted via rappel and may be followed by cargo let down (CLD) of gear. Once Rappel/Short-haul operations commence, and the sterile cockpit has been established, H-551 will only monitor the Air Guard frequency. ***During Rappel/Short-haul operations, contact H-551 via Air Guard only in case of an emergency.***

Once rescuers are on the ground, H-551 will depart the area for the closest landing zone (LZ) and configure helicopter for extraction of patient and rescuers via Short-haul. Once patient packaging is completed, H-551 will return to the area and extract personnel. H-551 will fly to the closest LZ and load the patient internally.

\*This is intended as a brief description. When requesting a medical evacuation, prior to the arrival of H-551, remember the basics: Utilize the Medical Incident Report (MIR) Page 118, IRPG, scene safety, initial patient care and management of on scene personnel.

<b>Lookouts</b> <b>Communications</b> <b>Escape Routes</b> <b>Safety Zones</b>	<b>Red/Rodgers Fire</b> <b>Operation Period: 09/15-17/20022</b>
	<b>SAFETY MESSAGE</b>

**WHAT IS THE PROBABILITY OF SUCCESS?**

- **When you are developing your tactical plan honestly weigh the probability of successfully completing your objectives.**
- **Do you have the time, resources, logistical support, and supervision needed for the assignment?**
- **Do you have all elements of your safety plan in place?**
- **Are the risks associated with the assignment worth the gain?**
- **When your probability of success falls below 75% it should be a red flag to consider an alternative plan.**

**MAJOR HAZARDS AND RISKS**

EVAC TIMES FATIGUE WILDLIFE(BEARS)	ROLLING MATERIAL DEHYDRATION COMPLACENCY	COMMUNICATIONS HAZARD TREES AIR OPERATIONS
--	--	--

*Be sure all elements of your safety plan are in place prior to engagement*

**Cumulative Fatigue**

Maintaining peak performance requires that you take good care of your body.

Get the appropriate amount of rest. Manage your off time to get as much sleep as possible.

Proper Nutrition and hydration is critical to managing fatigue.

**Look Up, Look Down,  
Look Around During Mop Up**

**\*Look Up:** Check the sky for any weather changes such as building or approaching thunderstorms, wind shifts or increasing in speed. Watch for air operations and water drops. Look for hazard trees and the potential for rolling material.

**\*Look Down:** Watch your footing. Keep an eye out for snakes, bee's nests, Stump holes, and ash pits.

**\* Look Around** Check for flagging identifying hazards in the area, and general terrain features. Keep an eye on fellow firefighters for signs of heat stress and fatigue.

**INCIDENT RISK ANALYSIS (ICS 215a)**

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	AIRCRAFT OPERATIONS	<ul style="list-style-type: none"> <li>• Involve aviation leadership with operational planning to avoid risk/exposure transference.</li> <li>• Establish trigger points to disengage aviation resources.</li> <li>• Keep personnel out of drop zones when bucket work in progress.</li> <li>• Use air-to-ground frequency to communicate with aircraft.</li> <li>• Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective.</li> </ul>
ALL	EXTENDED MEDICAL EXTRACTION TIMES.	<ul style="list-style-type: none"> <li>• Identify helispots and communicate lat/longs to DIVS</li> <li>• Be familiar with medical plan and communicate 8 line promptly</li> <li>• Do to unforeseen weather conditions or mechanical issues with helicopters extraction times may be longer.</li> </ul>
ALL	HAZARD TREES	<ul style="list-style-type: none"> <li>• Follow Hazard Tree Safety Guidelines (IRPG p. 20).</li> <li>• Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen.</li> <li>• Be especially alert around snags during wind events or changing wind direction.</li> <li>• Check for hazard trees &amp; "widow-makers" in sleeping areas prior to using.</li> </ul>
ALL	ENVIROMENTAL HAZARDS	<ul style="list-style-type: none"> <li>• <b>Manage trash in spike camps to avoid attracting bears</b></li> <li>• Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks.</li> <li>• Pick up and remove all trash from fire line. Don't allow storage of food in tents</li> </ul>
ALL	FIRE BEHAVIOR/ WEATHER	<ul style="list-style-type: none"> <li>• Establish and maintain LCES. Take weather observation.</li> <li>• Allow for adequate time to escape routes and safety zone.</li> </ul>
ALL	HEAT RELATED ILLNESS (HRI) / DEHYDRATION&FATIGUE	<ul style="list-style-type: none"> <li>• Be alert for signs of fatigue and take breaks as necessary.</li> <li>• Maintain 2:1 work/rest ratio. Monitor your resources for fatigue.</li> <li>• <b>Repeated assignments in the same area can lead to complacency.</b></li> <li>• Drinking water before, during and after shifts, up to 1.5 gal. per shift.</li> <li>• Be alert for signs of heat disorder in yourself and others.</li> </ul>
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> <li>• <b>Yosemite Valley, High tourist area, where it's common for drivers to stop and start suddenly to take pictures.</b></li> <li>• Drive defensively! Expect the unexpected around every curve.</li> <li>• Don't drive when fatigued. Adhere to agency driving regulations and guidelines.</li> <li>• Be alert for wildlife.</li> </ul>
ALL	SUPPRESSION REPAIR/MOP UP	<ul style="list-style-type: none"> <li>• Use all required PPE, including eye protection.</li> <li>• Be alert for stump holes and root cavities.</li> </ul>
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> <li>• Share your Situational Awareness (hazards, changes, etc.) to those who also have a need.</li> <li>• Answer questions when asked by others. Ask for intel when you don't know the plan.</li> <li>• Ensure all personnel are familiar with the incident and IA communications plans</li> </ul>
ALL	INFECTIOUS DISEASE	<ul style="list-style-type: none"> <li>• Maintain 6' foot distance whenever possible. Wear masks when appropriate. Notify MEDL if any symptoms arise.</li> <li>• Do frequent handwashing/sanitizing and disinfecting common surfaces.</li> </ul>

## **WILDLAND FIRE COVID-19 SCREENING TOOL/ TESTING INFO**

- **Have you in the past 14 days, had contact with a person known to be infected with the Coronavirus (COVID-19)?**

- **Today or in the past 24 hours, have you had any of the following symptoms?**

- + Cough more than expected?
- + Shortness of breath or difficulty breathing?
- + Fever? Chills?
- + Sore throat?
- + Nausea or vomiting?
- + Diarrhea?
- + New loss of taste or smell?
- + Fatigue, outside your normal for firefighting?
- + Headache, outside your normal for firefighting?
- + Congestion or runny nose, outside your normal for firefighting?
- + Muscle pain, outside your normal for firefighting?

**IF YOU ARE HAVING ANY SIGNS OR SYMPTOMS HAVE SUPERVISOR CALL MEDL @ (530)400-0880 IF IN CAMP, OTHERWISE CALL VIA RADIO FOR FUTHER INSTRUCTIONS.**

### **Preventative Measures:**

#### **Social Distancing and Protective Equipment**

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
  - Utilize face coverings as a tool when practical.
  - Clean or replace dirty face coverings, equipment, and PPE.

#### **Hygiene on the Fireline**

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
  - Avoid handshakes and communal use items.
  - Maintain a supply of hand sanitizer and hand wipes.
    - Disinfectant high touch surfaces often:
      - Radios, phones, doors, pumps, fuel cans, etc.

#### **Communications**

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

**Protect yourself, your module, your camp!**

NIMS IAP

Team 10 will be transitioning off the incident first thing Saturday morning. With that said we will need to complete your training forms by end of day tomorrow at minimum, preferably today. You will not need to go to the ICP or see me in person, we have set up an electronic package that we can accomplish all necessary forms virtually just like the registration form. Below are the directions on how to complete your documentation:

1. Go to
2. On the home page click on the link to current incident tab under the team picture.
3. On the right side of the page that opens will be a Training Specialist tab, this is probably where you registered.
4. All necessary forms and directions are at you and your trainees' fingertips, once forms are completed, they will come directly to me.
5. We will process your packets and ensure that the trainer, trainee and home unit get digital copies of your packets.

Packets need to be completed by 9/15/22 at 15:00, thank you. I will be at the ICP Thursday and Friday if you need assistance.

Bill Fullerton  
Training Specialist Trainee  
CIIMT 10

## Finance Remote Processing Procedures

Use the QR code to the right to access electronic Finance forms. When the form opens, click the download button to open on your device.

On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop.

They are Adobe PDF forms so you will need a PDF reader app on your device. The Forms were created in android/PC environment.

To work with apple use the Sync function. You cannot complete in the browser on your device.

Once you have completed the appropriate form for your resource please email to your supervisor for approval.

Supervisors can use their app to apply a signature or just type /s/ their name on the approval line.

After approving, please email the approved form back to the resource for their record and to finance at [2022.red.finance@firenet.gov](mailto:2022.red.finance@firenet.gov)

**Make sure you include in the subject line:**

- Fire Name you are assigned to
- Your Resource Order Number
- Your Resource Name

**Resources: Please send photos or electronic copies of Casual hire forms, contracts, Cooperative agreements, Vehicle inspection, Manifests and resource orders to [2022.red.finance@firenet.gov](mailto:2022.red.finance@firenet.gov)**

**RED / RODGERS FIRE DEMOB MESSAGE**  
**Demob unit phone # 1-530-264-8701**

When you are scheduled to be released from either of these incidents, there are a few steps to take to ensure a smooth demob before travelling back to your home unit or to a new assignment. Call the demob unit first to start the process and to answer any questions.

All of your finance documents shall be completed and turned in electronically. Please utilize the finance message in the IAP and follow the instructions to turn in any shift tickets, CTR's, and/or possible comp/claims.

If you have checked out a radio, you will need to return it to the communication trailer located at the emergency services camp in Yosemite Village.

For incident replacement, fill out a general message and send it electronically to the ordering manager at [CIIM110ordering@gmail.com](mailto:CIIM110ordering@gmail.com). If you have any questions, please call Tracey at 1-916-201-4366 and she can help you with the process.

Ground support and fuel is located at the Indian Flat campground. Post vehicle inspections will be done there and when completed, the GSUL will notify the demob unit.

When you are finished with the required steps, call the demob unit to finalize your release and return travel.

Controlled Unclassified Information//Basic

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> – 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> – 3<sup>o</sup> burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
