

INCIDENT OBJECTIVES	1. Incident Name ZACA	2. Date Prepared 8/05/07	3. Time 2200
4. Operational Period August 6, 2007 24 Hour 0600-0600			
5. Core Values-All Incidents, All the time <ul style="list-style-type: none"> ★ Firefighter Safety is the #1 priority and includes all support functions. ★ Public Safety-We will be proactive in facilitating the safety of the people we serve. ★ 100% Effort-We will engage the mission with all of our expertise. ★ Open Communications-Direct, respectful, and 2-way communications is the key to our success. 			
6. General Control Objectives for the Incident (include alternatives) Operational Objectives: <ul style="list-style-type: none"> ★ Provide for emergency personnel and public safety at all times. ★ Keep fire North of Catway Rd. (Zaca ridge Rd) and the line running from Drop Point 12 south east to the Buckhorn Road.. ★ Keep fire South of Sisquoc River to Pine Canyon Rd. / Dick Smith Wilderness Boundary and Don Victor Valley Jeep Trail. ★ Keep fire East of Schoolhouse Canyon. ★ Keep fire West of Ventura County Line. Commanders Intent: <ul style="list-style-type: none"> ★ Fight fire with Speed, Agility, Focus & Effectiveness. ★ Ensure the health, welfare and safety of incident personnel and the safety of the public. ★ Suppression strategies and tactics consider historical weather patterns, record low rainfall, very low live fuel moistures and a fuel bed that demonstrates rapid fuel driven fires. ★ Appropriate fatigue mitigation measures are applied to all fire suppression, management, and support resources with an emphasis on sustaining a prolonged fire suppression effort. 			
7. Priorities <ul style="list-style-type: none"> ★ Division R ★ Division S ★ Division T ★ Paradise

Incident Weather Forecast

FORECAST NO: 33

NAME OF INCIDENT: Zaca

PREDICTION FOR: 0600 PDT Monday – 0600 PDT Tuesday

UNIT: LPF

SHIFT DATE: Aug 6, 2007

SIGNED:

TIME AND DATE 2000 PDT Sunday
FORECAST ISSUED: August 5, 2007

P.J. Szatanek - IMET (trainee)
Rob Balfour - IMET

WEATHER DISCUSSION: An upper level trough moving across California will result in relatively cooler temperatures and a deepening of the marine layer. Little change in this weather pattern is expected for Tuesday. High Pressure will rebuild on Wednesday and Thursday for a warming and drying trend.

WEATHER FORECAST:

WEATHER: Mostly Clear with smoke and fog in valleys in the morning and again tonight.

TEMPS: Max 70-76
Min mid 50s-low 60 and upper slopes...near 50 valleys and lower slopes.

HUMIDITY: Min 20-25% ...except 45% below 3500 ft MSL
Max 35-40%...except 85% below 3500 ft MSL.

20 FT WINDS:

RIDGETOP - till 1000 PDT.....Southwest 5 mph with gusts 10 mph.
1100-0200 PDT.....Southwest 10 mph with gusts 15 mph
0200-0600 PDT.....West 5 mph with gusts 10 mph.

SLOPE/VALLEY - till 1000 PDT.....Variable/South 1-3 mph
1200-2000 PDT....Upslope/Southwest 5-10 mph with gusts 20 mph.
2100-0600 PDT....Downslope/Down valley 1-2 mph.

MIXING HEIGHT: Inversion near 4000 ft in the morning...weakening and lifting to 6000 ft MSL during the early afternoon. Another weak inversion near 12,000 ft MSL.

TRANSPORT WIND: Southwest 15 mph

Forecast for Tuesday: (OPERATIONAL PERIOD – 0600 PDT 08/06/07 - 0600 PDT 08/07/07)
Mostly clear except smoke and fog in valleys nights and mornings. Highs 76-80. Lows 52-62. Min RH 25-30%. Max RH 35% except lower slopes 75-85%. Inversion lifting to 6000 feet in the afternoons. Wind west to southwest 10-15 mph afternoons and evenings.

Outlook...August 8-10 2007

Wednesday through Friday... Mostly clear. Highs 74-80. Lows 50-60. Min RH 25%. Max RH 35-55%. Wind east 5 mph night and morning hours...west 5 to 15 mph afternoons and evenings. Mostly clear except smoke and fog in valleys nights and mornings. Wind east 5 mph night and morning hours...west 5 to 15 mph afternoons and evenings.

FORECAST FOR ZACA AIR OPERATIONS

DISCUSSION...

Marine layer depth around 4000 feet in the morning. Stratus will be slower to clear this morning...and smoke and haze may be trapped in valleys and below 4000 feet until midday. Similar conditions expected for Tuesday. On Wednesday and Thursday, warmer and drier conditions are expected as High pressure moves back in to the area.

FORECAST (VALID AUG 6 6AM PDT TO AUG 7 6AM PDT)

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 33

TYPE OF FIRE: SURFACE

FIRE NAME: ZACA

OPERATIONAL PERIOD: 8/6/2007

DATE ISSUED: 8/5/07

TIME ISSUED: 2100

UNIT: SANTA BARBARA COUNTY/LOS PADRES NF

SIGNED: David Kerr

INPUTS

WEATHER SUMMARY: An upper level trough is moving across California and will result in cooler temperatures and a deepening marine layer today. SEE ATTACHED INCIDENT WEATHER FORECAST. PROBABILITY OF IGNITION = 75% (calculated), up 25 from 8/5/07
Live Fuel Moistures are 51% at Upper Oso (Los Prietos). Sample date July 15, 2007

FIRE BEHAVIOR

GENERAL: Marine moisture will move up the canyon below 3,500 feet this morning and persist until near 110hrs. This creates a favorable setting for checking fire spread on the south side of the fire, as the active burning period will be reduced. Grass fuels may not be available until around noon, while the brush come available short after the lifting of the inversion. The fire above 4000' will be active throughout the shift, however much of the northern portion of the fire is out of alignment with the slope and will need to reposition in order to continue the active burning witnessed the past three shifts.

SPECIFICS:

Division J - The heat has come out of much of this division, but the large fuels will continue to burn down. Interior burning will continue with occasional torching.

Division K – The fire has spread over the Mission Basin trail in many areas and will begin the backing process towards the Sisquoc. Fire high on the ridge will be exposed to the SW winds and spread well, while north of the bench will be sheltered from the winds and back more slowly towards the Sisquoc. The fire has the potential to reposition for upslope runs by late in the shift. Group torching should be expected in the conifer stands.

Division L – The Division has spread over the Buckhorn Road and is well established in the Dick Smith Wilderness. The fire is out of alignment with the slope and is backing towards several branches of Buckhorn Creek, where it can reposition for uphill runs. The main Buckhorn ridge will act to block the general winds today checking fire movement.

Division T – The burnout operation was successful and has cooled to the point where direct line can be constructed to secure the division. Higher humidity below 3500' will assist in securing portions of the line.

Division S – The higher humidity may impact burning ops in the early morning hours, but things will dry through the day, support firing and fire spread. Rollout has limited potential for spread in the fuels below 3500'. Firing ops should focus on the brush as the finer grass fuels will not come available until 1200. The grass will carry fire if preheated from areas of active fire.

Division R - The grass fuels lower in the drainages may not come available until after noon, but the brush will support fire/firing shortly after the fog lifts. The fire is out of alignment and is backing off of steep bluffs, with roll-out into heavier fuels below. This roll-out has limited spread potential under the S/SW wind pattern

AIR OPERATIONS: Expect burn-off of the marine influence at Rancho helibase between 1030 and 1100. Haze will hang in the valley longer possibility impacting operations at Rancho helibase.

SAFETY

- The fire has repositioned into more conifer fuels and torching should be expected. The pine litter is more continuous than in the Mission Pine Basin area and spotting is more likely in these fuels
- Fuels come available at different times today as the lower elevations are affected by the marine while areas above the inversion will rapidly support fire spread. Be aware of your position in relationship to this effect and know that fuel availability and fire behavior will change rapidly as the inversion lifts.

ORGANIZATION ASSIGNMENT LIST	
1. Incident Name	
ZACA	CA-LPF-001087
2. Date	3. Time
August 5, 2007	1900
4. Operational Period	
August 6, 2007 0600-1800 day 1800-0600 night

DAY OPERATIONAL PERIOD

MAJOR HAZARDS/SAFETY CONCERNS

TRANSFER OF COMMAND
LCES BASICS

FUEL CONDITIONS
INCIDENT TRANSPORTATION

HAZARD MITIGATIONS

TRANSFER OF COMMAND: This Team transition should be seamless and not cause any problems but any transition period is a watch-out situation. Make sure you understand the IAP prior to leaving the briefing. This includes the Communications Plan, the Medical Plan, the LCES Analysis, and your specific fire assignment. Know who you are working for, who is working for you, and who is working adjacent to you. If you have any question about your assignment, ask and clarify prior to going to the fire line. Test your communication link prior to needing it.

LCES BASICS: Be certain that you can satisfy LCES for every operation, at all times. Reassess conditions periodically as the operational period progresses and conditions change.

FUEL CONDITIONS: Fuels across the whole area are extremely dry, compounded by a variety of factors which include low winter moisture, hot dry June and July weather, and increased vegetation stress and mortality from drought. Expect extreme fire behavior and base all actions accordingly.

INCIDENT TRANSPORTATION: Incident travel routes and travel distances are long, and local residents continue to share the roads. Be alert for traffic, drive with your lights on, keep your speed down, and anticipate other drivers' actions. Watch for local traffic on Hwy 154. The camp speed limit is 5 mph.

Thank you for continuing to make this a safe working environment.
