FIRE BEHAVIOR FORECAST

FORECAST NO. 41

NAME OF FIRE: Zaca II

UNIT: CA-LPF 1087

DATE & TIME ISSUED: 08/13 2200 hr

PREDICTION FOR: 8/14/07 24hrShift

DATE : 8/13/07.

SIGNED: /s/ Dennis Burns

FIRE BEHAVIOR ANALYST

WEATHER SUMMARY: Continued Hot and dry

Winds: Day, West-NW 6-12mph gusts to 25mph, Night, North-NE 8-14 gusts to 20mph.

Min. RH: 3-10%, Max RH: 15-30%

Temperatures: Day 97-105 Night 64-74

Probability of ignition: 100%

FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

With the low RH overnight the fire will remain active. Were RH is below 25% expect torching. Spot fires from roll outs will continue to challenge containment. Fire progression will shift to the southeast were drainages align with the wind. Fire progression will be mainly by flanking fire with short intense upslope runs where slope and fuels align. The fire will remain active through the night above 1500ft. Watch for dry down canyon winds during the night.

SPECIFIC:

Branch V

- No forward fire progression expected. Watch for hold over heat on steep slopes.
- Watch column if unburned islands ignite, spot fires are possible with column collapse.

Branch VII

- Expect flanking fire with intense uphill runs towards the Don Victor Jeepway.
- Spot fires from roll outs will continue to be a problem.
- The fire will back to the south in the Dick Smith, fire progression has slowed in the Ogivly burn scar.
- Rates of spread will exceed 100cph, with flame lengths 30-60-ft. in the brush.
- Expect active fire behavior through out the night, with potential down slope runs.

Branch IX

- The fire is not expected to impact the Branch during this forecast period.

Air Operations: Poor visibility earlier, then clearing by 0900hrs.

SAFETY:

Conditions are hot and dry. Expect extreme fire behavior.

Steep slopes mean spot fires from roll outs. Post lookouts!

FIVE HAZARDOUS ATTITUDES (This applies to all of us, not just pilots!)

Flight out of Balance
(five in a series of five)

5 *Resignation*

The flip side of the invulnerability coin is the attitude of resignation. "What's the use?" say pilots who feel they have little control over what happens to them. They do not see themselves as players in their own lives' dramas. They feel that circumstances are governed by luck, and they leave action to others, allowing other people or commitments to influence their decisions. They are resigned to leaving things as they are, and they may deny that a situation is as critical as it appears.

But listen to William Ernest Henley "It matters not how strait the gate, How charged with punishments the scroll, I am the master of my fate: I am the Captain of my soul." Henley was not a resigned man. Above all, "the pilot in command of an aircraft is directly responsible for, and is the final authority as to, the operation of the aircraft" FAR 91.3(a). No controller, no instructor or set of rules or procedures can help you unless you are firmly and comfortably in command of your flight. It's your ship; you are the captain, and you are the master of your fate.

Antidote: When things look bleak, say to yourself "I'm not helpless. I *can* make a difference."

Become alert to hazardous attitudes creeping into your flight activities. Sensitizing yourself to them is the first important step in eliminating them

SAFETY MESSAGE

ZACA – LIVE OAK ZONE

**August 14, 2007
DAY OPERATIONAL PERIOD**

MAJOR HAZARDS/SAFETY CONCERNS

**HYDRATION ISSUES CUMULATIVE FATIGUE
FIRE BEHAVIOR/WEATHER**

HAZARD MITIGATIONS

HYDRATION ISSUES: Hydrate often, these high temperatures (100+), low Relative Humidity's (<10%) and poor overnight recoveries mandate we drink plenty of fluids. Complete evaporation of 1 liter of sweat removes 580 kilocalories of heat. In order to maintain a healthy body temperature, the firefighter needs to evaporate about 1 liter (slightly more than 1 quart) of sweat during each hour of work. Hydration issues are very preventable with attention to detail:

- Maintaining body fluids is essential for sweating. You must hydrate before, during, and after work.
- Before work you should take extra fluids to prepare for the heat. Drink 1 or 2 cups of water, juice, or a sport drink before work. Avoid excess caffeine; it hastens fluid loss in the urine.
- While working drink at least 1 quart of fluid per hour. Drink as much as you can during the lunch break. Water is your greatest need during work in the heat.
- Providing a portion of fluid replacement with a carbohydrate/electrolyte sport beverage will help you retain fluids and maintain energy and electrolyte levels.
- You can assess your hydration by observing the volume, color, and concentration of your urine. Low volumes of dark, concentrated urine, or painful urination indicate a serious need for re-hydration. Other signs of dehydration include a rapid heart rate, weakness, excessive fatigue, and dizziness.
- Keep a close eye on each other for signs of dehydration.

CUMULATIVE FATIGUE & COMPLACENCY: Crews have been on fires all year, and this incident is 40+ days old. People are tired, both physically and mentally and this can lead to accidents if care is not taken. Maintain your situational awareness and don't let complacency creep into your work. Concentrate on doing the job safely. This includes wearing the proper full PPE, and taking the hot, dry weather into consideration.

FIRE BEHAVIOR/WEATHER: We are in a very hot and dry weather pattern. These are the conditions which significantly contributed to the past large spread of this fire and crew heat-related issues. Expect fire behavior to be very active and plan accordingly. Constantly observe weather and burning conditions and always have a contingency plan for any situation.

Human Resource Message

Laughter

Laughter is a stress reducer; it lifts our spirits and soothes our souls. We need to laugh more and seek stress reducing humor in our lives. Laughter is the human gift for coping and for survival.

Laughter makes us feel better, see things more clearly, and creatively weigh and use our options. Laughter also helps us roll with the punches and deal with everyday stressors. As firefighters, you weigh your options often, and you roll and deal with the punches on a daily basis.

Take some pressure off yourselves, and use laughter today, And use laughter as a therapy to help reduce you stress.

The power of laughter is unleashed every time we laugh.

“It’s a very sobering feeling to be up in space
and realize that one’s safety factor was determined by
the lowest bidder on a government contract”

Alan Shepard (1943-93)
