# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 39	TYPE OF FIRE: WILDFIRE
FIRE NAME: ZACA – Richardson Zone	OPERATIONAL PERIOD: Thurs 8/30/2007 Day Shift
DATE ISSUED: 8/29/07	TIME ISSUED: 1400h
UNIT: SANTA BARBARA COUNTY /LOS PADRES NF	SIGNED: <i>Isl Kelly Martin</i>

**MIN RH:** 8 - 15%: **SIMILAR TO YESTERDAY**  
**MAX TEMP:** 90 - 97 Ridgetops, higher in the valley bottoms: **SIMILAR TO YESTERDAY**  
**WINDS (20 FT):** SSW 6-12G18: **STEADY WIND DIRECTION**

**GENERAL: A WARM DRY TREND HAS SETTLED IN:** . Potential fire activity within the perimeter has slowed considerably. Most of the fire has made it to containment lines and what remains is unburned islands of green vegetation that has potential to flare-up and initiate a run during peak burning conditions. At this point, potential fire behavior will consist of a single or several ignition points around the fire perimeter especially with the general wind flow pattern – most vulnerable will be DIV DD, North FF and South FF along HWY 33. Live and dead vegetation (due to very low fuel moisture) is still extremely receptive to fire brands.

**CURRENT FIRE ACTIVITY TREND**  **3-DAY FIRE ACTIVITY TREND** 

## **Branch XXIII:**

**Division AA/BB** – No significant fire activity expected today. Watch for hotter and drier conditions than predicted when working in and down towards the bottom of the drainage.

**Division CC/DD/EE** – Much work has been completed on DD to reduce the remaining heat along the line. No significant fire activity expected today.

## **Branch XXV**

**Division FF North:** Any lingering heat will be a concern on the flanks where heavy retardant was dropped that may burn under and though the retardant if not extinguished. No significant fire activity expected today

**Lookout Group:** Much work has been completed on this group to reduce the remaining heat along the line. If the spot along the back side of the ridge is mopped up, this will greatly reduce the chance for this fire to creep down the slope. No other significant fire activity expected today

## **Branch XXVII:**

**Division FF South:** Flare-ups are still possible in pockets of unburned vegetation. No significant fire activity expected today.

**Division GG/HH** –Watch for isolated activity when RH's drop to low teens and single digits. No significant fire activity expected today.

**AIR OPERATIONS:** No significant impacts are expected.

## **SAFETY**

- ✓ **BASE ALL ACTIONS ON CURRENT AND EXPECTED FIRE BEHAVIOR** – EXPECT FIRE BEHAVIOR TO TRANSITION TO EXTREME WHEN HUMIDITIES BEGIN TO REACH 12% AND LOWER – ESPECIALLY WHEN THEY REACH SINGLE DIGITS
- ✓ **FIELD OBSERVATIONS EVERY HALF HOUR WILL BE ABLE TO DETECT LOWERING TRENDS**
- ✓ **IF A RUN DEVELOPS EXPECT WINDS TO ENHANCE A SLOPE DRIVEN RUN ON SOUTH AND WEST ASPECTS.**

## Human Resource Message

Zaca II day and night shift 08/30/07

# Smokey Says...

Just as safety issues increase when the fire winds down and we get close to demob, so do human resource issues. Focus on our mission decreases, and our minds begin to wander, as we think about our next assignment or maybe even going home for a few days. Please remember to treat everybody with kindness, patience and respect.

**Incident Human Resource Specialist is: Diane Simpson**

**Location: Trailer next to Check-In/Demob**

**Phone: 618-534-2111**

# **SAFETY MESSAGE ZACA FIRE**

**August 30, 2007**

***"Lookouts Communications Escape Routes Safety Zones"***

**"HEAT ADVISORY IS IN EFFECT"**

**Special weather statement as been issued in the fire area for Thursday  
Be ready for extremely hot temperatures.  
Alert your crews and stay hydrated during and after your shift.**

## **Weather:**

- RH's continue to stay very low.
- Be prepared for any change in the fire.

## **Fireline:**

- Continue to identify safety zones as you mop up you just never know if they will be needed.
- Green islands are present throughout the fire area, post lookouts and watch for any flare ups, that may threaten the line and your safety.
- Rocks continue to roll on the lines and on the roads – HEADS UP.

## **Transportation Issues**

- Hwy 33 and 166 are open to the public. Semi's travel very quickly along the highway, keep defensible driving at the top of your games.
- Pull off the road to use your cell phone!!
- The roads are steep, narrow, and dusty in places, always drive with caution and keep your speeds down.
