Fire Behavior Forecast Number 30

Name of Fire: Zaca II Richardson Zone
Location: Los Padres NF
Date/ Time Forecast Issued: Sept 5, 2007 2000 hrs

Prediction For: Sept 6, 2007
Thursday Day Shift
Drew Smith- FBAN/So.Cal Team 1

Weather

Sunny

Temps around 82-95. RH:12% -25%. Eye Level Wind: Down canyon/ down slope winds in the morning until 0900

Upslope up valley Westerly 6-10 mph with increasing gusts throughout the day reaching up to 15 mph.

Fire Behavior:

General:

The fire has been in-active near control lines. Hard work by crews and excellent mop up standards have maintained the current fire perimeter. Several deep interior islands continue to produce smokes in heavy down fuels and snags. Poor night recoveries have kept these smokes alive.

Live fuel moisture = 40%- 50%. **PBI**= 80-90%

Burn Index = 154 (OZENA). **Fire Danger Index**= *Extreme*

Burn Index = 87 (LOS PRIETOS) **Fire Danger Index**= *Very High*

Specific:

Interior Islands will continue to produce smoke in heavy fuels. With the Extreme Fire Danger Index today, an isolated headfire run may develop by early afternoon. Flame lengths of 30-50 feet can be anticipated. Fine fuels will be very receptive to sparks from mechanical heat sources.

Initial Attack (SITUATIONAL AWARENESS)

Head fire will not be conducive to direct attack. Safe engagement practices must be identified on the observed and predicted fire behavior. Any new starts will have a very high potential for large fire development.

Air Operations:

Regional activity may limit aircraft use.

Safety:

- **Observe the fire behavior for fire suppression engagement**
- **A new start may develop more abrupt than anticipated**
- **Identify a solid anchor point and safety zones.**
- **Situational Awareness needs to be a top priority= Safety**

Many of us will be demobing soon. Whether you are

traveling by  ,  , or  ,

I hope you have a safe trip home, or to your next assignment. No matter how many times you've been through it, the demob process is always stressful.

Remember that you are not the only one feeling stressed, anxious and tired. You can assist the folks in demob and help the process go as smoothly as possible by being **PREPARED** and **PATIENT**.

Incident Human Resource Specialist is: Dana Simpson
