INCIDENT ACTION PLAN STEEP VALLEY FIRE

WV-NRP-000763 PP QRK1 (1523)

Your Safety

An important aspect of safety is individual responsibility for one's own health and safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning safety. It is important that individual responsibility is taught as the basis for a viable safety program. Some of those individual responsibilities are:

- Fitness for duty.
- Utilization of personal protective equipment (PPE).
- Following safe work practices.
- Using the **correct reference materials** is an important aspect of safety.
- Ensure instructions are clearly understood. Communication is a basic responsibility for all fire personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you observe hazards that may place you or others at risk.
- Always maintain situational awareness. Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or sharing information.

Do not expect someone else to be responsible for your safety. Take it upon yourself to make **Your Safety your number one priority**.

Steep Valley Fire Resource Management Message

Please note the following

Portable Pump Operations

If water pumping is going to occur, the river access ramps/areas by Army Camp, McCreery, Grandview Sandbar, Mill Creek, and Glade Creek are preferrable given their already high level of disturbance and lack of mussel populations.

Helicopter Dip-Sites

Given the high density and relatively high diversity of freshwater mussels, I recommend avoiding the following areas if it is likely that collecting water will disturb the river bottom (like a large bucket being dropped in to collect water and hitting the bottom).

 Within 500 feet upstream and downstream of the Meadow Creek Access

- Within 1 mile upstream of the Thayer River Access

- Between the old bridge piers upstream of Glade Creek
