Date and Time Imagery Received by Interpreter: 09/14/2015 @ 0125 MDT		Type of media for final product: PDF map, zipped shapefiles and KMZ files	
Date and Time Products Delivered to Incident: 09/14/2015 @ 0330 MDT		Digital files sent to: ftp://ftp.nifc.gov/incident_specific_data/great_basin/ 2015_Incidents /2015_Rapid/IR/20150914	
Comments /notes on tonight's mission and this interpretation: Growth in the perimeter since last IR was primarily on the eastern perimeter, into the headwaters of Little Buckhorn Creek and on the ridge west of Cougar Creek. Areas of intense and scattered heat were detected in the headwaters of Little Buckhorn Creek and along the ridge west of Cougar Creek. Isolated heat remains inside the hot spots on the ridge at the confluence of the South Fork and main stem of Buckhorn Creek, and in the hot spot south of Buckhorn Lake.
