Near Term Fire Behavior (NTFB)

This map shows a 3-day Near Term Fire Behavior - starting 9/4/15. The NTFB model uses forecasted weather for the analysis period to predict fire growth. The model assumes no suppression action except where barriers are indicated.

Model Parameters:

Teapot RAWs. Model uses Finney Crown fire, which will have slower crown rate of spread, based on potential rain and increase RH forecast. Ignitions based on MODIS and intense heat IR. Burn Period: 1400 - 2000. Spotting = 0.01
