Lowman

Placerville

Idaho City

Archery & Muzzleloader season has arrived: A small portion of unit 39, about half of unit 33, half of unit 34 south of Forest Service Road 579, and the western edge of unit 35 will remain closed for the near future. As fire suppression repair is completed, and the threat of fire spread is removed, closed areas will reopen to public access.

The Forest Service is sensitive to the recreation opportunities being impacted by the Pioneer Fire, but firefighter and public safety are a priority. Until access routes can be examined and threats removed or mitigated, the closures will remain.

As soon as hazards are mitigated, areas will reopen to the public.
