HIGHLINE - FSPro_Aug27_14day_2000F_01
RESULTS: This analysis approximates the probability of the Highline fire impacting any given location on this landscape by September 9th. These results indicate a low probability of fire impacting areas to the north and west. Root Ranch sits right at the boundary of the 5 to 20% and 20 to 40% clouds, indicating an up to 40% probability of root ranch experiencing fire by the 9th. Cold Meadows has less than 0.2% probability and Lower Chamberlain bridge with up to 5% probability, while Arctic Point Lookout remains outside the probabilities of experiencing fire by September 9th.

GOAT - FSPro_Aug27_14day_2000F_01
RESULTS: This analysis approximates the probability of the Goat fire impacting any given location on this landscape by September 9th. These results indicate an up to 0.2% probability of this fire spotting over the Salmon River and spreading to the north of the river by September 9th. These results also show a 2 to 5% probability of the fire spreading down and across cottonwood creek to the east by the 9th.
