<b>Date and Time Imagery Received by Interpreter:</b> 7/13/2017 @ 0430 MDT		<b>Type of media for final product:</b> Shapefiles, PDF Map, KMZ, IR Daily Log	
<b>Date and Time Products Delivered to Incident:</b> 7/13/2017 @ 0545 MDT		<b>Digital files sent to:</b> NIFC FTP: <a href="http://ftp.nifc.gov/incident_specific_data/great_basin/2017_incidents/RoostersComb/IR/20170713/">http://ftp.nifc.gov/incident_specific_data/great_basin/2017_incidents/RoostersComb/IR/20170713/</a>	
<b>Comments /notes on tonight's mission and this interpretation:</b> Tonight's mapping used the incident provided fire perimeter as a starting point. No detectable growth was mapped beyond the 7/12 2200 perimeter. Interior areas of intense heat surrounded by scattered heat were mapped primarily southeast of Antelope Creek. A number of false detects were found associated with mine sites and equipment east of the fire. These false detections were not included in the provided map products.
