INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: County Line	2. Operational Period: Date From: 8/25/2018 Time From: 0600	Date To: 8/25/2018 Time To: 2200											
3. Objective(s): 1. The number one priority is to provide for firefighter and public safety. 2. Take the necessary precautions to protect the community of Carlin, nearby ranches, residents in Pine Valley, the nearby Emigrant Mine and transportation corridors to minimize the threat to public safety. 3. Limit fire intensity in riparian areas to protect Lahontan Cutthroat trout habitat in Trout Creek and Dixie Creek. Keep retardant three hundred feet on either side of all riparian areas. 4. Take appropriate action to minimize fire size and intensity to protect Greater Sage-grouse habitat, and mule deer habitat in the Pinion Mountain Range. 5. Keep the fire east of highway 278, south of the Emigrant Mine road, west of Beards Creek and Emigrant Spring, and north of Ferdelford Creek and out of the old Bullion Mine cultural alert zone.													
4. Operational Period Command Emphasis: Fight fire aggressively having provided for safety first. Use tactics that have the greatest probability for success considering associated risks to firefighters and the public. Get out early hit the fire hard, and secure the fire perimeter ahead of the predicted frontal passage.													
General Situational Awareness There have been multiple medical incidents and accidents taking place on incidents within the Great Basin. Be aware that there is significant potential for extreme fire behavior and rapid rates on spread on any incident within the geographical area. Reminder it is not business as usual, adjust tactics accordingly to compensate for extreme fire behavior and rapid rates of spread. Always have LCES in place, and never break the 10 standard firefighting orders, and 18 watch-out situations.

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: **County Line Fire**

DATE: 08/25/2018

Oper. Period: 0600-2200

Major Hazards

Access/Egress: Steep rocky rugged terrain. Limited road access with most areas inaccessible to engines. Long travel times for equipment to reach the fireline.

Railroads: 2 different train tracks. Either track can travel either way. Listen for trains. Look both ways before crossing.

Fatigue: Watch for compounding fatigue. Maintain 2:1 work/rest ratio and use the buddy system to monitor each other. Maintain appropriate hydration and nutrition.

Mining Operations: Active and abandon mines in the area. Heavy truck traffic on mining roads at 0600/1800 **WATCH SPEEDS**. When parked on mining roads pull off as far as possible.

For many it might feel like groundhogs day so don't get complacent. Keep that constant evaluation loop going for hazards around you. Continue to communicate what you see and ways to mitigate the hazards.

Watch Out Situation of the Day

3. SAFETY ZONES AND ESCAPE ROUTES
NOT IDENTIFIED

Escape Routes/Safety Zone Checklist

Escape Routes:

- More than one escape route
- Scouted – soils, vegetation, slope
- Timed – slowest person, fatigue, dozer speed
- Marked – flagged for day and night use with lime green flagging

Safety Zones:

- Survivable without a shelter
- Natural – clean burn, water, bare soil/rock
- Manmade – constructed sites, roads
- Scouted for size and hazards
- Close enough considering escape time needed

Fuels and Fire Behavior Advisory:

- Significant carryover fine fuels
- Continuous fine fuel loading 200-300%
- Record low fuel moisture
- Fuel loading is dense
- Flashy fine fuels **Anticipate** rapid fire spread
- Anticipate **Extreme** fire behavior
