SAFETY MESSAGE

October 4, 2018

Pole Creek/Bald/Pack Fires

Transition

- CAIIMT 1 will be transitioning this incident at the end of shift. You will see new leadership today and tomorrow. Know who you are working for. Understand your work assignment. If you have any questions or are uncertain of leader's intent... ASK!!!

Repair

- Understand the hazards working around heavy equipment. The main work is repair utilizing excavators. Do not approach the equipment while it is in operation. Ensure you have contact with the operator before approaching the equipment. Radio or face to face. Be alert for any rolling objects or debris that may become dislodged during the work.

Inclement Weather

- Stay updated on current weather forecasts. Request spot weather forecasts if needed. Refer to the Inclement Weather Plan when storm impacts hit the fire area. Flash Flooding and debris flow is possible in and around the fire area.

DEMOB SAFETY

Part of your response to the Pole Creek/Bald Mt Fires includes the return home.

Plan your travel route home. This includes meals and rest stops. Use multiple drivers if necessary.

- Equipment checks are essential. In addition to your inspection, you should be following your agency's policy for daily apparatus/equipment checks
- Slow down when driving in and around camp. It is easy to get in a hurry at this point and let your guard down.
- Do not exceed maximum allowable driving limitations. 10 hrs behind the wheel for a single driver.
- Pre plan breaks in your trip. This helps to prevent you from driving too long without a rest.
