

Incident Status Summary (ICS-209)

Incident: **Cove Creek**

1. Incident Name: Cove Creek		2. Incident Number: ID-SCF-019218	
3. Report Version (check one box): Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: Knudson	5. Incident Management Organization: Type 2 Team	6. Incident Start Date/Time: Date: 08/03/2019 Time: 1358 MDT
7. Current Incident Size or Area Involved (use unit label – e.g., "Acres", "Square Miles"): 4394 Acres	8a. Percent (%) Contained or Completed: 59 %	9. Incident Type: Wildfire B. Incident Description: C. Cause: Lightning/Natural D. Fire Suppression Strategy:	10. Incident Complexity Level: <input checked="" type="checkbox"/> Single Complex
	b. Total Percentage (%) of Perimeter that will be Contained or Completed: 100 %		
12. Prepared By: Print Name: Mike Mattfeldt Date/Time Prepared: 08/13/2019 1800 MDT		13. Approved By: Print Name: Jeff Knudson Signature: .	
14. Date/Time Submitted:		15. Primary Location, Organization, or Agency Sent To: GBCC	
16. State: ID	17. County / Parish / Borough: Lemhi	18. City: Salmon	
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction): ID-SCF	
22. Latitude/Longitude: Latitude: 45° 19' 41" Longitude: 114° 27' 10"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township: Range: Section: 1/4 Sec: of 1/4 Sec:	
25. Short Location or Area Description (list all affected areas or a reference point): 27 NM North West of Salmon, ID			26. UTM Coordinates: Zone: Easting: Northing:
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): https://ftp.nifc.gov/public/incident_specific_data/great_basin/2019_Incidents/2019_CoveCreek/			
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Minimal Creeping Backing			

Incident Status Summary (ICS-209)

Incident: **Cove Creek**

Smoldering
 Narrative:
Activity on the fire was light with the majority of the fire creeping and smoldering. The fire had little movement on the west-side in the Skull Gulch Area, however aerial support to manage remaining areas of heat proved critical. The northern flank of the fire showed minimal activity in Owl Creek, East Owl Creek, and upper Cove Creek. Little to no activity was observed on the eastern flank along the Salmon River and lower portions of Cove Creek.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):
**Tall Grass (2.5 feet)
 Timber (Litter and Understory)**
 Narrative:
Primary fuel Model are GS2 (Low Load, Dry Climate Grass) and GS1 (Short, Sparse Dry Climate Grass) all grasses at lower elevation are fully cured.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc): Additional traffic from fire resources on the Salmon River Road has created some delays for recreational river and forest users.	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed

Incident Status Summary (ICS-209)

Incident: **Cove Creek**

<p>and one way out road access, and traffic on Salmon River Road.</p> <p>Recreational traffic within the Salmon River corridor continues to present additional hazards and road safety issues for fire resources in multiple locations along transportation routes.</p> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Dry conditions and light terrain driven winds were observed across the fire today. Temperatures rose into the upper 70s to lower 80s under mostly sunny skies as RH fell into the mid 20% range.</p> <p>12-24 hrs: Warm and dry conditions under mostly sunny skies will persist into Wednesday with lower 80s expected for highs. Relative humidity will be in the lower to mid 20s with a light northwest wind along ridgetops and light terrain driven winds in sheltered canyons.</p> <p>48 hrs: A slight chance of a late shower or thunderstorm is expected Thursday as a weather disturbance approaches central Idaho. However, no rain is expected. Temperatures will be cooler in the upper 70s with improved minimum RH close to 30%.</p> <p>72 hrs: The weak weather disturbance will move through central Idaho Friday bringing slightly cooler temperatures and alight chances for isolated afternoon showers and thunderstorms. Rainfall is expected to be minimal with gusty outflow winds possible.</p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 90%;"></th> <th style="width: 10%; text-align: center;">Active?</th> </tr> </thead> <tbody> <tr><td>A. <p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p> <p>12 hours: Minimal fire activity.</p> <p>24 hours: Drying trend in the weather expected; all slope aspects becoming more receptive to ignition in the fine fuel component.</p> <p>48 hours: Drying trend in the weather expected, despite lower temperatures; all slope aspects becoming more receptive to ignition in the fine fuel component.</p> <p>72 hours: Drying trend in the weather expected, despite lower temperatures; all slope aspects becoming more receptive to ignition in the fine fuel component.</p> <p>Anticipated after 72 hours:</p>
--

<p>37. Strategic Objectives (define planned end-state for incident): Suppression efforts will have been focused on lateral spread reduction using reasonable tactics. Risk to firefighters will have been minimized by limiting efforts to protecting values at risk along the Salmon River Corridor. All suppression damage will have been repaired and a long term plan will have been developed and provided to the incoming organization.</p>

<p>38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential</p>
--

Incident Status Summary (ICS-209)

Incident: **Cove Creek**

economic or cascading impacts:	
12 hours:	Access to Salmon River Corridor, sociopolitical concerns with rafters and water users in the area.
24 hours:	Access to Salmon River Corridor, sociopolitical concerns with rafters and water users in the area.
48 hours:	Access to Salmon River Corridor, sociopolitical issue with rafters and water users in the area.
72 hours:	Access to Salmon River Corridor, sociopolitical issue with rafters and water users in the area.
Anticipated after 72 hours:	

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:	
12 hours:	None.
24 hours:	
48 hours:	
72 hours:	
Anticipated after 72 hours:	

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:	
1) critical resource needs identified above,	
2) the Incident Action Plan and management objectives and targets,	
3) anticipated results.	
Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.	
Impact to the river corridor and recreational users. River Corridor road access. Steep rocky terrain, structure protection.	

41. Planned Actions for Next Operational Period:	
Transition to Salmon- Challis National Forest fire management is planned to occur on Wednesday, 14 August 2019.	
Aerial firefighting support in Cove Creek, Owl Creek, and Skull Gulch to mitigate heat in 1000 hour fuel sources. Weather trend has resulted in all slope aspects becoming more receptive to ignition in the fine fuel component.	

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):
--

43. Anticipated Incident Containment or Completion Date: 08/30/2019
--

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: \$3,952,820.00

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):
As of 8/13/2019 at 18:00 MDT: 4,394 acres; 59% contained.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
