.DISCUSSION...Central Idaho Dispatch Area weather impact summary (Zones 475 and 476)...

Low pressure will move into the Pacific Northwest tomorrow and into Montana on Sunday, pushing a dry cold front through central Idaho. As the front approaches, expect temperatures to spike upward, with humidity taking a large drop for the afternoon. The cold front will pass through during the day Sunday, bring cooler temperatures but also very dry air, and so humidity will stay about the same. The wind will also be increasing, with Sunday wind being stronger with the front. Cooling continues into Monday.

### **HEALTH AND SAFETY MESSAGE**

**SAFETY** starts with **YOU** 

We are **ALL** accountable for **SAFE** behaviors

For Day Operations: August 23, 2019

### **Major Hazards and Risks:**

- DRIVING: Drive defensively, be aware of <u>traffic on the 030 road and fire area</u>. Remember traffic may not be looking at the road and traveling at a higher rate of speed.
- ACCOUNTABILITY: Each resource on the fire has a supervisor. Know and coordinate with him/her. Establish relationships with local resources working in your area.
- HAZARD TREES: Avoid high concentration snag patches. Snag safety zone is 2 ½ times the tree height.
- SAFETY ZONES/ESCAPE ROUTES: Know at all times where these is located. Be sure you can get there under the conditions that exist. Reevaluate as the day progresses.

Fire Order of the Day:

# Keep informed on fire weather conditions and forecasts (#1)

- Evaluate the forecasts provided in the IAP.
- Has the weather been becoming Hotter and Dryer?
- What are your spot weather forecasts telling you?

# **LCES**

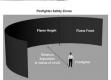

LOOKOUTS: Should be experience, competent, trusted and know the situation

COMMUNICATIONS: Confirm radio freqs, provide updates, sound alarm early

ESCAPE ROUTE(S): Provide more than one. Ensure it is open

SAFETY ZONE(S): Survivable without a shelter

Snags!!!

Stay alert as you work around snags.

- Helicopters may cause snags to fall
- Wind may cause snags to fall
- Fate may cause snags to fall
- Remember the hazard zone is 2 ½ times the tree height
- Follow "Hazard Tree Safety" guidelines IRPG page 22

Constantly assess your situation. If conditions dictate, consider working in another area until conditions change

Safety: Laney Cutshaw **SAFETY IS AN OUTCOME** 

OF DOING THINGS RIGHT!!!
