A rise in temperature and a drep in relative humidity combined with	N. Area Restriction in Effect					
A rise in temperature and a drop in relative humidity combined with ecord low fuel moisture values have the potential to increase fire						
activity.	P. Trail Closure	х				
	Q. Area Closure	x				

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames: Low to moderate fire behavior near the DIV B/C break in the timber stringers. Pockets of isolated heat are present throughout the southern half of the fire's footprint. The high 12 hours: afternoon temps and low relative humidity will cause single/group tree torching and short runs in interior pockets of grass and sage. 24 hours: Same As Above High pressure will continue to dominate over the area causing low daytime RH and poor 48 hours: overnight recoveries. Winds will also remain gusty on ridge tops. An inversion each night will keep ridgetops warmer and drier with poor overnight recoveries. 72 hours: **Poor recoveries will be followed by warm, dry afternoons that have the potential to support** continued burning of available fuels. Anticipated after 72 hours: Same As Above 37. Strategic Objectives (define planned end-state for incident):

Following the incident objectives developed during the WFDSS process and in line with the Delegation of Authority strategic objectives are as follows (clockwise from north):

-NORTH of Mahogany Butte to protect grazing allotments, private inholdings, and cultural and natural resources.

-EAST of FSR 542 and FSR 541, Deadline Ridge, and Rock Creek to protect vacation homes, Magic Mountain Ski Resort, improved campgrounds, grazing allotments, private inholdings, and cultural and natural resources.

-SOUTH of County Road E2900N and County Road E 3000 N to protect residences, grazing allotments, and cultural and natural resources.

-WEST of Cottonwood Ridge and Rams Horn Ridge to protect residences, grazing allotments, and cultural and natural resources.

### Incident: Badger

	nt Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond.
	the primary incident threats to life, property, communities and community stability, residences, health care
	other critical infrastructure and key resources, commercial facilities, natural and environmental resources, esources, and continuity of operations and/or business. Identify corresponding incident-related potential
	or cascading impacts:
economic	Threats are expected to continually subside as crews continue to secure the fires perimeter and
	improve previously constructed fire line. Threats are minimal for all other divisions at this time.
	Threats to life and property: Fire activity continues to pose a threat to Magic Mountain Ski
	Resort and Wildland Urban Interface in DIV B.
	Threats to public and private infrastructure:
12 hours	Magic Mountain Ski Resort and nearby residential areas.
12 hours:	Threats to cultural and natural resources:
	Priority sage grouse habitat remains potentially impacted.
	Cassia Crossbill habitat remains potentially impacted.
	······································
241	
24 nours:	Same As Above
48 hours:	Isolated pockets of heat will continue to smolder with occasional creeping and single tree torching.
72 hours:	Same As Above
Anticipate	d after 72 hours: <b>Same As Above</b>
39. Critica	al Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives.
	rce category, kind, and/or type, and amount needed, in priority order:
	TO flight nightly due to five size, minimal five nersennel and to provide situational averages
12 hours:	for hot spots near fireline.
24 hours:	Same As Above
48 hours:	Same As Above
72 hours:	Same As Above
	d after 72 hours: Same As Above
	gic Discussion: Explain the relation of overall strategy, constraints, and current available information to: al resource needs identified above,
	ncident Action Plan and management objectives and targets,
	pated results.
-	ajor problems and concerns such as operational challenges, incident management problems, and social,
	economic, or environmental concerns or impacts.
	nent with the Sawtooth National Forest Plan and WFDSS direction for the Badger Fire,
	ant a 100 percent full suppression strategy to meet incident objectives.
	ed Actions for Next Operational Period:
	, K, O and Z: Resources are patrolling/mopping up hot spots along the fires edge and working to
	a large interior island that is critical Cassia Crossbill habitat.

DIV B: Resources will mop up, hold, and patrol secured fireline increasing depth to prevent spotting.
