values will increase into the 39-51% range, with daytime	M. Quarantine in Progress	
temperatures in the high 30's to low 50's.	N. Area Restriction in Effect	
	O. Road Closure	x
	P. Trail Closure	X
	Q. Area Closure	X

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

Low to moderate fire behavior in interior unburned islands and timber stringers. Pockets of isolated heat remain present well inside the fire perimeter, and constitutes low/minimal threat. High wind speeds, low RH, and high Haines may cause single and group tree torching and short runs in interior pockets of grass and sage.

<sup>24</sup> hours: Minimal activity is expected due to higher RH values and lower temperatures, however wind gusts up to 35 mph remain a concern.

48 hours: Very minimal chance of fire spread due to predicted precipitation, RH values in the 40-50% range, and much cooler temperatures.

72 hours: Fire activity is expected to diminish with more seasonable temperatures and RH, however windspeeds will still be in the 15-25 mph range.

Anticipated after 72 hours: Higher daytime RH and cooler temperatures through mid-week.

37. Strategic Objectives (define planned end-state for incident):

Following the incident objectives developed during the WFDSS process and in line with the Delegation of Authority strategic objectives are as follows (clockwise from north):

-NORTH of Mahogany Butte to protect grazing allotments, private inholdings, and cultural and natural resources.

-EAST of FSR 542 and FSR 541, Deadline Ridge, and Rock Creek to protect vacation homes, Magic Mountain Ski Resort, improved campgrounds, grazing allotments, private inholdings, and cultural and natural resources.

-SOUTH of County Road E2900N and County Road E 3000 N to protect residences, grazing allotments, and cultural and natural resources.

-WEST of Cottonwood Ridge and Rams Horn Ridge to protect residences, grazing allotments, and cultural and natural resources.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond.

### Incident: Badger

Summarize primary incident threats to life, property, communities and community stability, residences, health car facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources	5,
cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:	
Threats are expected to continually subside as crews continue to patrol and monitor fire perimeter. Threats are minimal for all other divisions at this time.	
Threats to life and property: Fire activity continues to pose a minimal threat to Magic Mour Ski Resort and Wildland Urban Interface in DIV B.	ntain
Threats to public and private infrastructure: Magic Mountain Ski Resort and nearby residential areas.	
12 hours: Threats to cultural and natural resources:	
Priority sage grouse habitat remains potentially impacted. Cassia Crossbill habitat remains potentially impacted.	
24 hours: Threat will decrease with forecasted weather.	
48 hours: Same As Above.	
72 hours: Same As Above.	
Anticipated after 72 hours: Same As Above	
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectiv	es.
List resource category, kind, and/or type, and amount needed, in priority order: 12 hours: <b>No critical needs.</b>	
24 hours: Same As Above	
48 hours: Same As Above	
Come As Above	
72 hours: Same As Above	
Anticipated after 72 hours: Same As Above	
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to	:
1) critical resource needs identified above,	
2) the Incident Action Plan and management objectives and targets,	
3) anticipated results.	
Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.	
In alignment with the Sawtooth National Forest Plan and WFDSS direction for the Badger Fire, implement a 100 percent full suppression strategy to meet incident objectives.	
41. Planned Actions for Next Operational Period:	
DIV A, F, K, O and Z: Resources are patrolling/monitoring along the fires edge and working to protect large interior island that is critical Cassia Crossbill habitat.	ct a
DIV B: Resources will mop up, hold, and patrol secured fireline increasing depth to prevent spotting	•
DIV C: Resources in the southern portion of the division near the B/C break will patrol and monitor fireline for any heat that may pose a threat.	

### Incident: Badger

Repair Group: The repair group will continue rehabilitating and stabilizing dozer line, and repairing roads that were damaged during suppression actions.															
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): <b>91,143</b>
