28. Observed Fire Beha	vior or Significan	t Events for the	Time Period	d Repor	ted (describe fi	re beha	vior using accepted		

Incident: Badger

terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):

Extreme Running Uphill Runs Spotting

Narrative:

Extreme fire behavior has occurred during the last two burn periods.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Grass and Understory) Heavy Logging Slash

Narrative:

Beetle kill timber. ERCs are currently 90-95th percentile. Fuel composition and low fuels moistures results in large fire growth.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

Structures are less threatened in Trapper Creek due to firefighter efforts. Structure protection group has been established for the Rock Creek Corridor. Bostetter Campground is still too hot to check on. As new intel comes in, destroyed and damaged structures may increase.

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

Fire is burning actively to the west with multiple heads to the north and east up Trapper Creek 12 hours: Drainage and Cottonwood Creek to the north. Continued significant fire spread towards recreational areas and Rock Creek Road to the west.

24 hours: Fire is expected to reach areas of multiple jurisdictions (BLM, State, and Private).

48 hours: Fire is expected to reach areas of multiple jurisdictions (BLM, State, and Private).

72 hours:

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Established anchor point at the heel of the fire and will continue point protection of values at risk and assessing damage impacted by the fire.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

42 primary structures, 8 outbuildings, Magic Mtn. Ski Resort, two organization Camps and vacation homes are threatened. Trying to manage the fire while protecting life, property, and 12 hours: other values at risk is extremely difficult with limited suppression personnel and resources. Low fuel moistures and lack of resources are making current suppression efforts ineffective. Wildland Urban Interface exists to the northwest and east of the current fire perimeter.

42 primary structures, 8 outbuildings, Magic Mtn. Ski Resort, two organization Camps and vacation homes are threatened. Trying to manage the fire while protecting life, property, and 24 hours: other values at risk is extremely difficult with limited suppression personnel and resources. Low fuel moistures and lack of resources are making current suppression efforts ineffective.

Sep 17, 2020 3 8:30:43 PM

Incident: Badger

	Wildland Huban Tutorfo or evista to the morthwest and cost of the comment five novinctory
	Wildland Urban Interface exists to the northwest and east of the current fire perimeter.
48 hours:	42 primary structures, 8 outbuildings, Magic Mtn. Ski Resort, two organization Camps and vacation homes are threatened. Trying to manage the fire while protecting life, property, and other values at risk is extremely difficult with limited suppression personnel and resources. Low fuel moistures and lack of resources are making current suppression efforts ineffective. Wildland Urban Interface exists to the northwest and east of the current fire perimeter.
	42 primary structures, 8 outbuildings, Magic Mtn. Ski Resort, two organization Camps and vacation homes are threatened. Trying to manage the fire while protecting life, property, and other values at risk is extremely difficult with limited suppression personnel and resources. Low fuel moistures and lack of resources are making current suppression efforts ineffective. Wildland Urban Interface exists to the northwest and east of the current fire perimeter.
Anticipate	d after 72 hours: Long term outlook does not show any fire slowing/season ending events.
	Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. rce category, kind, and/or type, and amount needed, in priority order:
	5 - Dozers, Type 2
	5 - HEQB
	8 - Type 1 or Type 2 I/A or Type 2 crews
	15 - Engines, any type
12 hours:	2 - Type 1 Helicopters
	3 - Type 2 Helicopters
	2 - SOFR
	2 - EMTF 4 - TFLD
	5 - Dozers, Type 2 5 - HEQB
	8 - Type 1 or Type 2 I/A or Type 2 crews
	15 - Engines, any type

Anticipate	d after 72 hours: 5 - Dozers, Type 2

Incident: Badger

5 - HEOB

8 - Type 1 or Type 2 I/A or Type 2 crews

15 - Engines, any type

2 - Type 1 Helicopters

3 - Type 2 Helicopters

2 - **SOFR**

2 - EMTF

4 - TFLD

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Firefighter and public safety is the priority in all fire management activities. Provide for protection of wildland urban interface and other populated areas where there is a threat to primary residences, developed property, and community-dependent infrastructure.

41. Planned Actions for Next Operational Period:

Continue to reinforce anchor point and enhance point protection around values at risk.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"): **50,000**
- 43. Anticipated Incident Containment or Completion Date: 10/31/2020
- 44. Projected Significant Resource Demobilization Start Date:
- 45. Estimated Incident Costs to Date: \$1,900,000.00
- 46. Projected Final Incident Cost Estimate: \$5,000,000.00
- 47. Remarks (or continuation of any blocks above list block number in notation):
- (7.) Reduction in acreage for this reporting period due to more accurate mapping.
- (10.) In-briefing for IMT2 GBT5 (Hicks) occurred at 1100 on 9/17 at 1100.
- 49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
