36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames: In DIV C, the potential for fire spread remains north and west near Wildland Urban Interface in the Rock Creek Road area and in the vicinity of Niles Gulch and Antelope Valley. Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the 12 hours: majority of heat is present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend will test current suppression efforts. In DIV C, the potential for fire spread remains north and west near Wildland Urban Interface in the Rock Creek Road area and in the vicinity of Niles Gulch and Antelope Valley. Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the 24 hours: majority of heat is present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend will test current suppression efforts. In DIV C, the potential for fire spread remains north and west near Wildland Urban Interface in the Rock Creek Road area and in the vicinity of Niles Gulch and Antelope Valley. Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the 48 hours: majority of heat is present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend will test current suppression efforts. In DIV C, the potential for fire spread remains north and west near Wildland Urban Interface in the Rock Creek Road area and in the vicinity of Niles Gulch and Antelope Valley. Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the 72 hours: majority of heat is present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend will test current suppression efforts.

Incident: Badger

In DIV C, the potential for fire spread remains north and west near Wildland Urban Interface in the Rock Creek Road area and in the vicinity of Niles Gulch and Antelope Valley. Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the majority of heat is Anticipated after 72 hours: present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend will test current suppression efforts.

37. Strategic Objectives (define planned end-state for incident):

Following the incident objectives developed during the WFDSS process and in line with the Delegation of Authority strategic objectives are as follows (clockwise from north):

- -NORTH of Mahogany Butte to protect grazing allotments, private inholdings, and cultural and natural resources.
- -EAST of FSR 542 and FSR 541, Deadline Ridge, and Rock Creek to protect vacation homes, Magic Mountain Ski Resort, improved campgrounds, grazing allotments, private inholdings, and cultural and natural resources.
- -SOUTH of County Road E2900N and County Road E 3000 N to protect residences, grazing allotments, and cultural and natural resources.
- -WEST of Cottonwood Ridge and Rams Horn Ridge to protect residences, grazing allotments, and cultural and natural resources.
- 38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

All of the above threats will remain valid and continue based on observed fire behavior.

Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.

Threats to public and private infrastructure:

Precautionary residential power outages continue.

12 hours:

Threats to cultural and natural resources:

Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.

All of the above threats will remain valid and continue based on observed fire behavior.

Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.

24 hours:

Threats to public and private infrastructure:

Precautionary residential power outages continue.

Threats to cultural and natural resources:

Incident: Badger

Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.

All of the above threats will remain valid and continue based on observed fire behavior.

Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.

Threats to public and private infrastructure:

48 hours:

Precautionary residential power outages continue.

Threats to cultural and natural resources:

Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.

Three cold fronts over the next 72 hrs have the potential to increase fire behavior and fire activity in all divisions with uncontained fire perimeter.

All of the above threats will remain valid and continue based on observed fire behavior.

Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.

Threats to public and private infrastructure:

Precautionary residential power outages continue.

72 hours:

Threats to cultural and natural resources:

Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.

Three cold fronts over the next 72 hrs have the potential to increase fire behavior and fire activity in all divisions with uncontained fire perimeter.

> All of the above threats will remain valid and continue based on observed fire behavior.

Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.

Threats to public and private infrastructure:

Anticipated after 72 hours: **Precautionary residential power outages continue.**

Threats to cultural and natural resources:

Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.

Three cold fronts over the next 72 hrs have the potential to increase fire behavior and fire activity in all divisions with uncontained fire perimeter.

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
 - 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

In alignment with the Sawtooth National Forest Plan and WFDSS direction for the Badger Fire, implement a full suppression strategy to meet incident objectives. Critical Resource Needs are necessary to meet incident objectives and fulfill the Delegation of Authority. The addition of CRNs will improve the probability of reducing fire spread while providing for firefighter and public safety.

41. Planned Actions for Next Operational Period:

In DIV C suppression resources will continue to provide structure protection within the Rock Creek drainage and actively working the fire's edge with aerial support as necessary. Resources will perform burnouts as necessary to check fire spread. Bucket and scooper work will support ground resources along the west flank of the division to halt further fire spread to the west. Suppression resources

Incident: Badger

assigned to DIVs A and B will actively engage the fire's edge with production of direct and/or indirect fire line to halt fire spread to the southwest and seek targets of opportunity. Crews will continue to mop up and patrol in all other divisions.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"): 120,000
- 43. Anticipated Incident Containment or Completion Date: 10/31/2020
- 44. Projected Significant Resource Demobilization Start Date: 10/13/2020
- 45. Estimated Incident Costs to Date: \$4,400,000.00
- 46. Projected Final Incident Cost Estimate: \$13,000,000.00
- 47. Remarks (or continuation of any blocks above list block number in notation):
- (7.) Reduction in acreage due to more accurate mapping.

Burned acres by ownership:

FS - 71,159

BLM - 13,575

ST - 1,146

PRI - 3,210

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
