recoveries.	Q. Area Closure	х
72+ hr: Any precipitation associated with the passing cold front will be slight with no wetting rains expected.		
A rise in temperature, a drop in relative humidity, and increasing winds have the potential to increase fire activity along uncontrolled fireline.		

	ted Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next
operation	al period and in 12-, 24-, 48-, and 72-hour time frames:
12 hours:	Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the majority of heat is present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend with an increase in gusty winds will test current suppression efforts.
24 hours:	Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the majority of heat is present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend with an increase in gusty winds will test current suppression efforts.
48 hours:	Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the majority of heat is present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend with an increase in gusty winds will test current suppression efforts.
72 hours:	Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the majority of heat is present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend with an increase in gusty winds will test current suppression efforts.

Anticipated	Fire activity is present east of Deadline Ridge, Pike Mountain, and Diamondfield Jack in Division B, where the majority of heat is present, and has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Currently scattered heat along the fire perimeter remains along DIVs A, C, and Z. Isolated heat is present in DIVs F, K, and O. A warming and drying trend with an increase in gusty winds will test current suppression efforts.
Following	ic Objectives (define planned end-state for incident): the incident objectives developed during the WFDSS process and in line with the Delegation of strategic objectives are as follows (clockwise from north):
-NORTH o	of Mahogany Butte to protect grazing allotments, private inholdings, and cultural and natural
-EAST of	FSR 542 and FSR 541, Deadline Ridge, and Rock Creek to protect vacation homes, Magic Ski Resort, improved campgrounds, grazing allotments, private inholdings, and cultural and
-SOUTH o	f County Road E2900N and County Road E 3000 N to protect residences, grazing allotments, ral and natural resources.
-WEST of	Cottonwood Ridge and Rams Horn Ridge to protect residences, grazing allotments, and natural resources.
Summarize facilities, o cultural res economic o	t Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. e primary incident threats to life, property, communities and community stability, residences, health care ther critical infrastructure and key resources, commercial facilities, natural and environmental resources, sources, and continuity of operations and/or business. Identify corresponding incident-related potential or cascading impacts: All of the above threats will remain valid and continue based on observed fire behavior.
	Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.
	Threats to public and private infrastructure: Precautionary residential power outages continue.
	Threats to cultural and natural resources: Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.
	All of the above threats will remain valid and continue based on observed fire behavior.
	Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.
	Threats to public and private infrastructure: Precautionary residential power outages continue.
	Threats to cultural and natural resources: Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.

	All of the above threats will remain valid and continue based on observed fire behavior.									
	Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.									
48 hours:	Threats to public and private infrastructure: Precautionary residential power outages continue.									
TO HOURS.	Threats to cultural and natural resources: Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.									
	Three cold fronts over the next 72 hrs have the potential to increase fire behavior and fire activity in all divisions with uncontained fire perimeter.									
	All of the above threats will remain valid and continue based on observed fire behavior.									
	Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.									
72 hours:	Threats to public and private infrastructure: Precautionary residential power outages continue.									
	Threats to cultural and natural resources: Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.									
	Three cold fronts over the next 72 hrs have the potential to increase fire behavior and fire activity in all divisions with uncontained fire perimeter.									
	All of the above threats will remain valid and continue based on observed fire behavior.									
	Threats to life and property: Fire activity continues to pose a threat to Wildland Urban Interface.									
Anticipate	Threats to public and private infrastructure: d after 72 hours: Precautionary residential power outages continue.									
	Threats to cultural and natural resources: Priority sage grouse habitat remains threatened and continues to be potentially impacted by fire spread.									
	Three cold fronts over the next 72 hrs have the potential to increase fire behavior and fire activity in all divisions with uncontained fire perimeter.									
	Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. rce category, kind, and/or type, and amount needed, in priority order:									
List resou	1 - AOBD									
12 hours	2 - Type 1 or Type 2 I/A or Type 2 crews 2 - SOFR									
12 HOURS:	2 - SOFR 2 - EMTF

1 - COST
1 - AOBD
2 - Type 1 or Type 2 I/A or Type 2 crews
Anticipated after 72 hours: 2 - SOFR
2 - EMTF 1 - COST
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
1) critical resource needs identified above,
2) the Incident Action Plan and management objectives and targets,
3) anticipated results.
Explain major problems and concerns such as operational challenges, incident management problems, and social,
political, economic, or environmental concerns or impacts.
In alignment with the Sawtooth National Forest Plan and WFDSS direction for the Badger Fire, implement a full suppression strategy to meet incident objectives. Critical Resource Needs are
implement a full suppression strategy to meet incident objectives. Critical Resource Needs are necessary to meet incident objectives and fulfill the Delegation of Authority. The addition of CRNs will
improve the probability of reducing fire spread while providing for firefighter and public safety.
41. Planned Actions for Next Operational Period:
Suppression resources assigned to DIV B will actively engage the fire's edge with direct and/or indirect fire line to stop fire spread to the south and west near Pike Mountain and Magic Mountain Ski Resort. In DIV K, crews will work to cool pockets of heat along the fire's east flank. Crews assigned to DIV C will employ suppression tactics to hold the northern portion of the division in the Rock Creek area. Aerial resources will support ground crews in B, C, and K to stop further fire spread. Crews will continue to mop up in all other divisions.
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): 120,000
43. Anticipated Incident Containment or Completion Date: 10/31/2020
44. Projected Significant Resource Demobilization Start Date: 10/13/2020
45. Estimated Incident Costs to Date: \$5,500,000.00
46. Projected Final Incident Cost Estimate: \$13,000,000.00
47. Remarks (or continuation of any blocks above – list block number in notation):
(7.) Reduction in acreage due to more accurate mapping.
Burned acres by ownership:
