Incident: **Badger**

Backing Creeping
 Narrative:
Isolated, moderate fire behavior northwest of Cotton Ridge in DIV C. Isolated, moderate fire behavior east of Porcupine Spring in Telephone Canyon of DIV B. Unburned fuels within timber stringers and islands continue to consume interior.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):
**Timber (Grass and Understory)
 Heavy Logging Slash**
 Narrative:
sub-alpine fir, lodgepole pine, juniper, mountain brush and grass communities. ERCs above 97th percentile. 1000-hr fuel moisture below 10 percent.

30. <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):</p> <p>24-48 hr: Strong post frontal winds in the afternoons sustained at 10-20 mph with gusts to 25-30 mph, and up to 35 mph on ridges and higher elevations exposed to a west/northwest wind. RH around 25 percent.</p> <p>48: A very slight chance of precipitation with less than .05 inches expected. RH values elevated. RH 30-40 percent.</p> <p>72 hr: Northwesterly post frontal winds sustained at 12-18 mph with gusts 25-30 mph. Persistent gusts of 25 mph likely. Cool temps and elevated humidities.</p> <p>72+ hr: Strong high pressure ridge will develop much of next week. Temps 10-15 degrees above normal. RHs will return to the teens toward the end of the week.</p> <p>A rise in temperature, a drop in relative humidity, and increasing winds combined with record low fuel moisture values have the potential to increase fire activity along uncontrolled fireline.</p>																																					

<p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p>	
12 hours:	<p>Moderate fire behavior with intense heat near the DIV B/C break northwest of Cotton Ridge, east of Trail Canyon, and along Third Fork Rock Creek that has the potential to impact Wildland Urban Interface and Magic Mountain Ski Resort. Areas of isolated interior heat remains south of the F/K break at Fuller Pasture and Bear Flat. Primarily scattered heat along the fire perimeter in DIVs B and C. Primarily isolated interior heat is present in DIVs A, Z, and the south half of DIV K.</p>
24 hours:	<p>The passing dry cold front will continue to generate west to northwest winds 10-20 mph with gusts to 30 mph. While favorable wind directions for DIV B, terrain influence can create unpredictable wind conditions with varying aspects, elevations, and canyons. West to northwest winds have the potential to impact DIVs A, K, and Z with extremely dry fuels and no precipitation expected.</p>
48 hours:	<p>Post frontal northwest winds will continue to create conditions that could potentially impact DIVs A, K, and Z. Increased fire behavior is possible in timber stringers and islands where</p>

72 hours:	<p>Post frontal Winds will be replaced with a Warming and drying trend with above average temperatures and no precipitation.</p>
Anticipated after 72 hours:	<p>Strong high pressure ridge will develop much of next week. Temps 10-15 degrees above normal. RHs will return to the teens toward the end of the week. Extremely dry fuels and no precipitation expected.</p>
<p>37. Strategic Objectives (define planned end-state for incident): Following the incident objectives developed during the WFDSS process and in line with the Delegation of Authority strategic objectives are as follows (clockwise from north):</p> <ul style="list-style-type: none"> -NORTH of Mahogany Butte to protect grazing allotments, private inholdings, and cultural and natural resources. -EAST of FSR 542 and FSR 541, Deadline Ridge, and Rock Creek to protect vacation homes, Magic Mountain Ski Resort, improved campgrounds, grazing allotments, private inholdings, and cultural and natural resources. -SOUTH of County Road E2900N and County Road E 3000 N to protect residences, grazing allotments, and cultural and natural resources. -WEST of Cottonwood Ridge and Rams Horn Ridge to protect residences, grazing allotments, and cultural and natural resources. 	
<p>38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:</p>	
12 hours:	<p>All of the above threats will remain valid and continue based on observed fire behavior.</p> <p>Threats to life and property: Fire activity continues to pose a threat, though minimal for most divisions, to Magic Mountain Ski Resort and Wildland Urban Interface in DIV K.</p> <p>Threats to public and private infrastructure: Magic Mountain Ski Resort and nearby residential areas.</p> <p>Threats to cultural and natural resources: Priority sage grouse habitat remains potentially impacted.</p>
