Minimal Single Tree Torching Creeping

Incident: Badger

Narrative:

Moderate fire behavior near the B/C break were crews are conducting tactical burn out operations. Interior timber stringers and islands continue to consume.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Litter and Understory) Heavy Logging Slash

Narrative:

sub-alpine fir, lodgepole pine, juniper, mountain brush and grass communities. 1000-hr fuel moisture below 10 percent.

30. Damage Assessment Information (summarize					
damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and in operational period and in 12-, 24-, 48-, and 72-hour time frames: Moderate fire behavior near the DIV B/C break northwest of the period and period.	Cotton Ridge, east of Trail Ca	nyon,
and along Third Fork Rock Creek where crews are performing 12 hours: Areas of isolated heat within the interior remains south of Co Canyon area of DIVs B and C. Pockets of isolated heat is prese the fire's footprint. A strong high pressure system has set in over the fire area. A	tton Ridge and in the Telepho ent throughout the southern	one half of

DIVs B and C may be influenced by the warming and drying trend. Crews will be focusing on any 24 hours: uptick in fire behavior and intensity in the immediate area. Minimal fire behavior will continue within the interior on the south half of the fire where unburned fuels are expected to consume in timber stringers and islands.

Same As Above - The high pressure system is expected to stay in place but an upper-level 48 hours: disturbance will pass through the fire area bringing an increase in winds that may increase fire behavior in areas of unburned fuels.

An inversion each night will keep ridgetops warmer and drier with poor overnight recoveries. 72 hours: Poor recoveries will be followed by warm, dry afternoons that have the potential to support continued burning of available fuels.

Anticipated after 72 hours: Same As Above

37. Strategic Objectives (define planned end-state for incident):

Following the incident objectives developed during the WFDSS process and in line with the Delegation of Authority strategic objectives are as follows (clockwise from north):

-NORTH of Mahogany Butte to protect grazing allotments, private inholdings, and cultural and natural resources.

-EAST of FSR 542 and FSR 541, Deadline Ridge, and Rock Creek to protect vacation homes, Magic Mountain Ski Resort, improved campgrounds, grazing allotments, private inholdings, and cultural and

Incident: Badger

natural resources. -SOUTH of County Road E2900N and County Road E 3000 N to protect residences, grazing allotments, and
cultural and natural resources.
-WEST of Cottonwood Ridge and Rams Horn Ridge to protect residences, grazing allotments, and cultural and natural resources.
38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond.
Summarize primary incident threats to life, property, communities and community stability, residences, health care
facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources,
cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential
economic or cascading impacts:
All of the above threats will remain valid and continue based on observed fire behavior in DIVs B
and C. Threats are expected to subside as crews make progress burning out fuels along the fire's
perimeter creating depth to reinforce previously constructed fireline. Threats are minimal for all
other divisions at this time.
Threats to life and property: Fire activity continues to pose a threat to Magic Mountain Ski Resort and Wildland Urban Interface in DIV B.
Threats to multiple and minute infractory sturge
12 hours: Threats to public and private infrastructure: Magic Mountain Ski Resort and nearby residential areas.
Hugie Hountain oki Kesort and nearby residential areasi
Threats to cultural and natural resources:
Priority sage grouse habitat remains potentially impacted.
24 hours: Same As Above
Isolated pockets of heat will continue to smolder with occasional creening and single tree
⁴⁸ hours: torching.
72 hours: Same As Above
Anticipated after 72 hours: Same As Above
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List
recourse stegony kind and/or type, and amount peeded in priority order:
12 hours: bolding energians
notating operations.
²⁴ hours: Currently assigned resources are critical to carry out ongoing short term tactical firing and holding operations.
⁴⁸ hours: Resources assigned following transition to the local unit are necessary and sufficient to finish securing and holding the fire in its' current footprint until fire containment is reached.
Same As Above
72 hours: Same As Above
Anticipated after 72 hours: Same As Above
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
1) critical resource needs identified above,
2) the Incident Action Plan and management objectives and targets,
3) anticipated results.
Explain major problems and concerns such as operational challenges, incident management problems, and social,
political, economic, or environmental concerns or impacts.
In alignment with the Sawtooth National Forest Plan and WFDSS direction for the Badger Fire, implement

Incident: Badger

a 100 percent full suppression strategy to meet incident objectives.

41. Planned Actions for Next Operational Period:

DIV B: Resources will mop up, hold, and patrol secured fireline following recent burnout operations.

DIV C: Resources in the southern portion of the division near the B/C break will hold secured fire line following recent burnout operations. Northern portion of the division suppression repair has continues. Continued mop up and patrolling of fireline from Sagehen Flats through to Buck Brush Flats and south from Buck Brush Flats to Magpie Basin along Rock Creek Road.

DIV K: Resources are holding and patrolling secured fireline and continuing suppression repair from the DIV F/K break to the K/O break.

DIV F: Resources are patrolling secured fireline from the C/F break to the F/K break.

DIV O: Resources are patroling fire line from the K/O break to the O/A break.

DIV A and Z: The two divisions are being patrolled by air.

Repair Group: The repair group will continue snagging roads and campgrounds and stabilizing dozer line.

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): **91,000**

43. Anticipated Incident Containment or Completion Date: 10/23/2020

44. Projected Significant Resource Demobilization Start Date: 10/01/2020

45. Estimated Incident Costs to Date: **\$13,700,000.00**

46. Projected Final Incident Cost Estimate: **\$17,000,000.00**

47. Remarks (or continuation of any blocks above – list block number in notation):

(7) Burned acres by ownership:
