IRIN Comments on imagery: Good imagery; 1 Pass		Weather at time of flight Clear	Flight Objective: Map heat perimeter, intense, scattered, and isolated heat
Date and Time Imagery Received by Interpreter:		Type of media for final product: pdf map, IR log, KMZ and shapefiles	
Date and Time Products Delivered to Incident:		Digital files sent to: ftp.nifc.gov /incident_specific_data/great_basin/2020_Incidents/2020_Buck/IR and: idbdc@firenet.gov	
Comments /notes on tonight's mission and this interpretation: I began mapping from the previous heat perimeter (9/1/2020). The fire grew by 107 (6%) acres since last night. There was some heat perimeter expansion. The largest expansion was in the southwestern flank where it grew up to 0.25 miles from the previous perimeter. There were pockets of intense heat in the interior of the fire as well as some scattered and isolated heat.
