Incident Fire Weather Forecast

FORECAST NO: 3
FORECAST FOR: Wednesday, October 7
FORECAST ISSUED: October 6, 2020, 1800 MDT

NAME OF FIRE: East Fork and Center Creek Trail
UNIT: USFS – Ashley National Forest
SIGNED: Mark Struthwolf – IMET

WEATHER DISCUSSION: The ridge will basically remain overhead today resulting in nearly identical conditions to those of Tuesday. By Thursday, the ridge will have moved to our east and a southerly flow aloft will develop which will enhance the upslope flow in our major drainages and ridge tops by 3-7 mph.

WEATHER FORECAST FOR TODAY:

WEATHER: Sunny and hazy.

MAX TEMPERATURES (10kft): 59-63°F **MIN HUMIDITY (10kft):** 11-15% **HAINES:** 6 High

20 FT WINDS:

RIDGETOP - Granddaddy Basin/Lake Fork Mountain - WNW 3-5 mph with gusts to 9 mph in the morning becoming SW at 6-10 mph with gusts 20 mph after 1100 MDT.

SLOPE/VALLEY - West Fork Rock Creek - NW drainage winds at 2-5 mph with gusts to 10 mph until 1100 MDT, shifting to SSE at 6-11 mph with gusts to 20 mph. Upper Hells Canyon – NW drainage winds at 3-6 mph with gusts to 10 mph, shifting to SE at 6-9 mph with gusts to 17 mph after 1100 MDT.

Inversion: Just above the valley floor up to 10,000 MSL

LAL: 1

OUTLOOK FOR TONIGHT:

WEATHER: Clear.

MIN TEMPERATURES (10kft): 42-46°F **MAX HUMIDITY (10kft):** 16-21% **HAINES:** 5 Moderate

20 FT WINDS:

RIDGETOP - SW wind 6-9 mph with gusts near 16 mph.

SLOPE/VALLEY - West Fork Rock Creek and Hells Canyon – Becoming down slope 3-6 mph with gusts to 10 mph in Hells Canyon and to 15 mph in West Fork after 1900.

Inversion: Thermal belt between 9500 ft. and 10,500 ft.

LAL: 1

OUTLOOK FOR THURSDAY:

WEATHER: Partly cloudy.

MAX TEMPERATURES (10kft): 57-61°F **MIN HUMIDITY (10kft):** 13-18% **HAINES:** 6 High

20 FT WINDS:

RIDGETOP - SW wind 3-6 mph with gusts to 9 mph until 1100, then southerly at 7-11 mph with gusts to 20 mph.

SLOPE/VALLEY - West Fork Rock Creek and Hells Canyon - Down drainage winds at 3-6 mph with gusts to 14 mph until 1100, then upslope at 7-11 mph with gusts to 20 mph.

EXTENDED FORECAST: The southerly flow aloft will become more southwest and weaken some on Friday but become more southerly and strengthen Saturday ahead of the approaching storm system. RH values will be gradually increasing Thursday evening through Saturday night. There is still some uncertainty on the strength of the trough but we will have a cold frontal passage on Sunday with gusty northwest winds and widespread snow above about 7000 ft. Accumulations and rain amounts are questionable at this time, but 0.20-0.60 of an inch looks reasonable.

Please bring in, or send pictures of weather observations to 240-778-5282. Thanks

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 3	TYPE OF FIRE: Wildland Fire
FIRE NAME: East Fork and Center Creek Fires	OPERATIONAL PERIOD: Oct. 7, 0700 – Oct. 8, 0700
DATE ISSUED: October 6, 2020	TIME ISSUED: 1900
UNIT: Ashley National Forest	SIGNED: /s/ Ken Larson, FBAN

INPUTS

WEATHER SUMMARY: ***See attached Fire Weather Forecast***

Discussion: Ridge will remain overhead bringing mainly terrain driven winds.

Weather: Sunny and hazy.

Max Temp: 59-63°

Min RH: 11-15%

Winds (20 foot):

Ridgetop: WNW 3-5 mph gusts to 9 in the morning becoming SW 6-10 mph gusts to 20 after 1100.

Slope/Valley: West Fk. Rock Creek NW drainage wind 2-5 mph gusts to 10 until 1100, then SSE 6-11 mph gusts 20.
Upper Hells Canyon NW drainage wind 3-6 mph gusts to 10, then SE 6-9 mph gusts to 17 after 1100.

FIRE BEHAVIOR

GENERAL

The fire is burning primarily through mixed conifer stands with a shrub understory and timber/broadleaf stands with a litter understory. Many of these stands have an extremely high mortality rate with a 50% or more standing snag component.

Energy Release Component for the Ashley FDRA for 10/06 is above the 97th percentile and a new record value (90).

SPECIFIC FIRE BEHAVIOR

Mixed conifer stands with shrub understory: potential head rate of spread 15-30 chains per hour with flame length 6-10 feet. Expect single and group tree torching; occasional short- to moderate-duration crown runs are possible during the afternoon. Maximum spotting distance ¼-½ mile, Probability of Ignition 80%. **Nighttime:** backing/flanking spread to 2-5 chains per hour. Torchling likely due to extremely dry conditions. Short range spotting likely.

Timber/Broadleaf litter stands: rate of spread 4-6 chains per hour, flame length 2-3 feet.

Critical areas of concern:

Stillwater Reservoir area: fire will continue to spread toward the reservoir and dam and also westerly in the Granddaddy Basin.

Hells Canyon area: potential for spotting and becoming established on the east side of Hells Canyon. Afternoon upcanyon winds may increase today due to southerly flow aloft which could increase fire activity in the upper end of the canyon.

AIR OPERATIONS

Air operations may be impacted by smoke in various locations during the day.

Sunrise: Wednesday, 10/07 07:24

Sunset: Wednesday, 10/07 18:53

Sunrise: Thursday, 10/08 07:25

SAFETY

The **Energy Release Component (ERC)** is a number related to the available energy (BTU) per unit area (square foot) within the flaming front at the head of a fire. Daily variations in ERC are due to changes in moisture content of the various fuels present, both live and dead. It may also be considered a composite fuel moisture value as it reflects the contribution that all live and dead fuels have to potential fire intensity. The ERC is a cumulative or "build-up" type of index. As live fuels cure and dead fuels dry, the ERC values get higher, thus providing a good reflection of drought conditions.

Assess mission complexity and the benefit/risk of the mission.
 All GPS DATA TO BE COLLECTED IN DEGREES.MINUTES.DECIMAL.MINUTES.FORMAT.
 Be aware of cross contaminating water sources. Sanitize buckets upon arrival to incident and after dipping in or below Upper Stillwater Reservoir or Moon Lake before dipping from any upper water sources. Keep reservoir (or below) water out of "upper" stream channels including South Fork of Rock Creek and upper lakes. Only use sanitized buckets in upper lake water sources; however, reservoir water may be used when dropping on upper terrain if more than 150' from any waterways. Report any deviations to Air Ops. Include location, original water source, number of gallons.

INCIDENT RISK ANALYSIS (ICS 215A) East Fork Fire 10/7-8/2020 Day/Night Shift

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
All	Fire Behavior	<ul style="list-style-type: none"> • Anticipate active fire behavior and rapid rates of spread. • Establish and maintain LCES. • Expect increased spot fires. • Allow for adequate time to escape routes and safety zones. • ERC's above 90th %.
All	Hazard Trees/ High Tree Mortality	<ul style="list-style-type: none"> • Large amount of tree mortality (>50%). • Follow "Hazard Tree Safety" guidelines, IRPG pgs. 22- 23. • Post lookouts, road guards, spotters in areas where mop up is happening. • Establish trigger points for disengagement during high wind events. • Limit exposure to work area as much as possible.
All	Driving	<ul style="list-style-type: none"> • Long drive to work areas. • Practice Defensive Driving Techniques. • Be aware of livestock and wildlife on or near roads. • Use spotters when backing. • Always use headlights. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits.
All	Rough and Narrow Roads	<ul style="list-style-type: none"> • Narrow, steep, unforgiving native surfaced roads within the fire area. • Roads not maintained regularly, look for holes, dips and road sluff offs. • One-way roads. Scout for access and egress. • Have a plan for if you have traffic coming towards you.
B,C,W, Night H/C, B/W	Point Protection	<ul style="list-style-type: none"> • Review WUI Firefighting in IRPG pgs. 12-16. • Do not commit to stay in areas without adequate safety zones. • Ensure you have adequate access and egress. • Look for propane tanks and other hazardous materials. • Structures may have generators that may be putting power back into the lines.
All	Fatigue	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor new resources for level of fatigue.
All	Steep Terrain/ Rolling Material	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Don't work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
All	Air Operations	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 46, IRPG. • Don't plan on air resources for medical transport or resupply. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
H,C, Night H/C	Firing Operations	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Qualified personnel for all assignments. Trainees to have qualified trainers. • Required PPE to be worn by all personnel involved. • Establish LCES prior to implementing burning operations.
All	COVID	<ul style="list-style-type: none"> • Maintain 6' foot distance whenever possible. • Utilize masks, frequent handwashing/sanitizing, disinfect common surfaces. • Follow County Public Health guidelines. Monitor for symptoms.
All	Public in area	<ul style="list-style-type: none"> • Hunting season, be aware of public in fire area, • Educate and advise public of fire area closure. • Use chain of command to request Law Enforcement if needed.
All	Altitude Sickness	<ul style="list-style-type: none"> • Can happen as low as 8000 ft in elevation. Will be worse if you come from lower elevations (i.e. sea level vs 5000 ft) normal work area. • Symptoms: shortness of breath, dizziness, lack of physical output. • Treatment: high flow oxygen, move to lower elevation, provide adequate hydration.
H,C	Heavy Equipment Operations	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment.

EAST FORK FIRE

Operation Period: Day 10/7-8/2020 Day/Night

SAFETY MESSAGE

WHAT IS THE PROBABILITY OF SUCCESS?

- When you are developing your tactical plan honestly weigh the probability of successfully completing your objectives.
- Do you have the time, resources, logistical support, and supervision needed for the assignment?
- Do you have all elements of your safety plan in place?
- Are the risks associated with the assignment worth the gain?
- When your probability of success falls below 75% it should be a red flag to consider an alternative plan.

MAJOR HAZARDS AND RISKS

Point Protection Driving Communications	Fire Behavior Steep Terrain Hazard Trees	Fatigue Drought Conditions Wildlife/Livestock
---	--	---

Be sure all elements of your safety plan are in place prior to engagement

Cumulative Fatigue

- Maintaining peak performance requires that you take good care of your body.
- Get the appropriate amount of rest. Manage your off time to get as much sleep as possible.
- Proper Nutrition and hydration is critical to managing fatigue.

Altitude Sickness

- **Why It Happens:** The pressure of the air that surrounds you is called barometric pressure. When you go to higher altitudes, this pressure drops and there is less oxygen available.
- **Initial Symptoms:** Shortness of breath, dizziness, fatigue/ loss of energy, headache, nausea.
- **Treatment:** High flow oxygen, keep warm, provide adequate liquids. Move down in elevation at least 1500 to 2000 feet, limit exertion until symptoms go away. If symptoms do not go away in 24 - 48 hours seek medical attention.

CIIMT 10 Safety Officers: Frank Pingiczer, Chuck Frank, Robert Hilfer(t)

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
 - o Cough, more than expected
 - o Shortness of breath or difficulty breathing
 - o New loss of taste or smell
 - o Fever o Chills
 - o Sore throat o Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
 - o Radios, phones, doors, pumps, fuel cans, etc.

Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

Communications

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your crew, and your camp!

Find more information: <https://www.nwccg.gov/coronavirus>

WILDLAND FIRE COVID-19 SCREENING TOOL

Have you in the past 14 days, had contact with a person known to be infected with the Coronavirus (COVID-19)?

Today or in the past 24 hours, have you had any of the following symptoms?

- + Cough more than expected?
- + Shortness of breath or difficulty breathing?
- + Fever? Chills?
- + Sore throat?
- + Nausea or vomiting?
- + Diarrhea?
- + New loss of taste or smell?
- + Fatigue, outside your normal for firefighting?
- + Headache, outside your normal for firefighting?
- + Congestion or runny nose, outside your normal for firefighting?
- + Muscle pain, outside your normal for firefighting?

A TNSP is assigned to this incident and will be performing majority of duties "virtually".

To receive documented credit for your assignment, scan the QR Code below to access and complete the Trainee Registration Form. Once registered you will receive additional instructions and updates via text and email. For training related questions, call Brad Smith (TNSP) at 209-770-4809 or email bradley_smith@firenet.gov

East Fork Fire - Trainee Registration Form

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. <i>(WGS84)</i>		
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>		
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Agency Affiliation: (NO NAMES OR CREW NAMES) Federal Contractor Local Government					
Assessment: Age: Weight: Chief Complaint:					
(If Pertinent to Injury) Skin Signs: Level of Consciousness: B/P: HR: RR:					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
