## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> – 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> – 3<sup>o</sup> burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND

**3. REMARKS (Safety Notes, Hazards)**  
 - Give extra scrutiny to mission plans involving landings at elevations over 10,000'  
 - Report any UAS sightings to Helibase or Air Ops after informing the pilot of the TFR.  
 - Get prior approval for all wilderness landings through Air Operations  
 - Report both the number of drops and gallons by source to Air Operations daily  
 - Sanitize buckets after initial incident arrival, and after dipping in or below Upper Stillwater Reservoir or Moon Lake before dipping from upper lakes. **Don't** put reservoir (or below) water into "upper" stream channels (including the South Fork of Rock Creek above Helibase) or lakes. **Use** upper lake water after bucket sanitation near upper water; however reservoir water **may** be used when dropping on upper terrain when more than 150' from water. **Report** any deviations from this protocol to Air Ops.

## READ Message

- Continue to add suppression repair needs into Collector or report to Resource Advisors (dozerlines, handlines, cut fences, road damage, etc.)
- Reminder: Wilderness intrusions need prior approval from Agency Administrators (aircraft landing, chainsaw work, repeaters, etc.)
- Cheatgrass and several other weed species are present in the area. Please wash vehicles after assignment. Car washes are available locally.
- Please do not remove or disturb artifacts and/or cultural sites. GPS and report.
- Keep Resource Advisors or Operations informed of any cows seen on the forest.
- ATV/UTVs are acceptable on trails and roads on BIA administered lands.
- Utilize designated water draft sites indicated with a W inside a circle on the map. Trash pumps are available at the sites.
- South Fork, Rock Creek and Hells Canyon Creek contain pure populations of native cutthroat. Please avoid introducing water from other sources into these creeks. Bucket work taking place in these drainages should avoid dropping directly into creek (at least 150' away).

Thanks for all your good work. Call with any questions:

## **”Be Safe”**

We tell each other at the end of conversations or briefings to “Be Safe” but what does that mean to you?

- As a single fire fighter
- As a squad boss or crew leader?
- As a Supervisor/leader?

Pause and consider what “Be Safe” means in order for you to safely do your job and meet the objectives of your assignment.
