Comments /notes on tonight's mission and this interpretation:

Began interp with NIFS Daily Fire Perimeter 20200817_Muldoon_DailyFirePerimeter_0307AM – this was an arbitrary perimeter for space holder in NIFS

This is an Initial IR Fire perimeter.

Isolated heat source approx. 1.6 miles northwest of fire perimeter @ -113.942 43.767 (possible campfire) near Broad Canyon Rec Area.

Intense heat along the West/Southwest border. With small are on the north border near Copper Basin and the west moving toward Muldoon Canyon Rd.

Scattered heat throughout the interior with some isolated heat as well.

If you have questions you may contact me at the phone number above or via email.
