3. Objective(s):		
Course of Action: Full Suppression		
Core Values: Ensure all actions reflect a commitment to incident response personnel and public safety through the development of tactical operations that are commensurate with the values at risk and the probability of success. Ensure mitigation measures, such as social distancing, wearing face masks, and effective sanitation are utilized to reduce the spread of COVID-19. Ensure prompt and accurate communication that foster discussion and encourage interaction with hosting agencies. Focus public information actions to enhance relationships with landowners, cooperators and the public.		
Incident Objectives: Support Initial attack, as needed, in coordination with Central Nevada Dispatch Prevent Further Damage to: - Structures and energy infrastructure - Intact sagebrush systems due to their high value sage grouse and bighorn sheep habitat Minimize suppression impacts to wilderness study areas and known cultural resources Conduct all fire management activities giving preference to using strategies and tactics that cause the least alteration of the landscape.		
Desired End State: The fire is suppressed and values at risk protected using the appropriate resources to implement tactics in locations with reasonable probabilities of success. When the incident management team leaves, there will have been no serious accidents or injuries, suppression damage will be documented, and cooperator and the public relationships will have been enhanced.

FIRE BEHAVIOR

OUTPUTS

GENERAL:

Minimal fire behavior expected with isolated smoldering taking place however if there are any new starts expect rates of spread and flame lengths below with slope and wind alignment they can be greater.

ERC's and BI's above the 90th percentile

Grass fuel Loadings for the season are 120-160% of normal.

Live Foliar Moistures: Sage Brush- 70-105%, Juniper- 100-120%

Fuel types

Grass dominant/old burn areas: Head fire ROS (64-143 ch/hr) Flame lengths: 7-9 ft.

Grass Shrub mix: Head Fire ROS (40-85 ch/hr) Flame Lengths: 7-10 ft.

Moderate-Heavy Shrub: Head Fire ROS (117-228 ch/hr) Flame Lengths: 20-27 ft.

SPECIFIC:

DIVS A: Minimal smoldering of heavy fuels confined to juniper dominated stands

DIVS M/T: Continued smoldering and potential creeping in the juniper stands and heavier shrub fuels.

DIVS V: Minimal smoldering expected with most of the potential in juniper stands.

DIVS Z: Minimal smoldering expected as the majority of heavy fuels have consumed.

AIR OPERATIONS:

Weak morning inversion breaking around 1000-1100.

SAFETY

Common denominators of Fire Behavior on Tragedy Fires:

- 1) On relatively small fires or deceptively quiet areas of large fires
- 2) In relatively light fuels, such as grass, herbs, and light brush
- 3) When there is an unexpected shift in wind direction or in wind speed
- 4) When fire responds to topographic conditions and runs uphill
- 5) Critical burn period between 1400 & 1700.

Transition

Ensure you keep your head on straight and stay focused.
 Make sure you and your crew know the new command structure.
 Continue to maintain good communications with all of your personnel.
 Remain flexible, look out for each other and continue to adhere to
Lookouts; Communication; Escape Routes; Safety Zones.

Medical Emergencies and Transport

- Review and brief all personnel on the new Medical Plan.
- Know where the closest medical personnel and equipment are.
- Ask yourself; how long will it take to stabilize and package an injured person?
- Ask yourself; how long will it take to move them to the closest medevac site or care facility?
- Ask yourself; how many people will it take to carry them out, are they available?
- Ask yourself; is the risk worth the gain?

Communications

- **Review the Communications Plan**
- **Ensure all of your radios are correctly programmed**
- **Test the frequencies to ensure adequate coverage**
- **If coverage is not adequate ensure mitigations are in place before committing to assignment**
- **Give good feedback to ensure problem areas can be addressed**

Take care of yourselves and those around you. Ensure you are using the COVID-19 Screening Tool every morning and follow the CDC recommendations.

Incident Replacement Guidelines

Prior to release from the incident, personnel may request replacement of standard equipment and supplies (**NFES**) that were damaged, lost, consumed, or worn out during the incident. Personnel need to document the request on the most applicable form – Incident Replacement Requisition (OF-315), Saw Parts Order, or General Message (OF-213). This request should include a description of the use on the incident and/or why the item(s) need to be replaced. Requests need to be signed by the **Division Supervisor** then approved by the **Operations Section Chief** prior to taking to Supply. Worn out or damaged property **will be turned into the Supply Unit**.

Approval for replacement of non-standard items (**Non NFES**) may need to be approved by the Incident Business Advisor (IBA). You should initiate this process at least two days prior to demob.

Personnel who need to replace/repair damaged property will document the request on an OF-289, Property Loss or Damage Report. This form requires Incident Supervisor recommendation as well as Subject Matter Expert determination, if appropriate. The form will then need to be turned into the Comp/Claims Unit Leader, who will track the claim and facilitate approval by the Finance Section Chief. Additional documentation may be required by the FSC. The FSC will make a decision, or recommendation to the IBA, as to whether or not the items can be replaced or repaired with incident funds. After approval, Supply/Ordering will issue S numbers.

Items originally provided through use of preparedness funds which need to be replaced due to **normal wear and tear** (e.g. worn out tire tread, worn out chain saw bar, 5yr old GPS that stops working, etc.) should be accomplished using home unit funds, not incident funds. If government property was damaged on the incident due to a specific event, (e.g. wind event destroys a tent) the incident could, upon receipt of required documentation and proof of damage, authorize replacement. **Replacement of non standard items that are worn out is the responsibility of the home unit.**

Please feel free to visit Finance, Logistics, or Operations if you have any questions.
