Confine													
Point Zone Protection	100												
Full Suppression	0												
12. Prepared By: Print Name: Rob Frisk Date/Time Prepared: 09/13/2021 1400 MDT		13. Approved By: Print Name: Scott Robison Signature: .											
14. Date/Time Submitted: 09/13/2021 1745 MDT		15. Primary Location, Organization, or Agency Sent To: GBCC											
16. State: ID	17. County / Parish / Borough: Valley		18. City: Stanley, Idaho										
19. Unit or Other:	20. Incident Jurisdiction: ID-SCF	21. Incident Location Ownership (if different than jurisdiction): ID-SCF											
22. Latitude/Longitude: Latitude: 44° 31' 54" Longitude: 115° 19' 43"		23. US National Grid Reference: Grid Zone: 11TPK x-Coordinate: 44 y-Coordinate: 113		24. Legal Description: Principal Meridian: Boise Township: 14N Range: 9E Section: 23 1/4 Sec: of 1/4 Sec:									
25. Short Location or Area Description (list all affected areas or a reference point): 24 Miles Northwest of Stanley, Idaho				26. UTM Coordinates: Zone: 11 Easting: 632800 Northing: 4932285									
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): All GIS data and products are available at: https://ftp.nifc.gov/public/incident_specific_data/great_basin/2021_Incidents/2021_Boundary/													
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Minimal Creeping													

Incident Status Summary (ICS-209)

Incident: **Boundary**

**Backing
Torching**

Narrative:
Majority of heat is located in the Rapid River/Seafoam bubble area and along the southern and northeast perimeter.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Grass and Understory)
Short Grass (1 foot)
Brush (2 feet)**

Narrative:

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

Threatened structures are located at: Sulfur Creek Ranch, Ruffneck Lookout, Greyhound Mine, Seafoam GS and Lodge, Cabin Creek, Float Creek Bridge, and Ramshorn Bridge.

Destroyed structures include: Historic Morgan Cabin was destroyed 8/29. Morehead Lookout was confirmed destroyed 9/7.

Protection successful and defended: Josephus Campground, Morgan Ranch, Boundary Creek Boat Launch and Campground, Fall Cr. Bridge, Dagger Creek, and Mtn. King Mine.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	0	0	0
F. Multiple Residences	0	0	0
G. Mixed Commercial / Residential	22	0	0
H. Nonresidential Commercial Property	7	0	1
I. Other Minor Structures	15	0	1

31. Public Status Summary:
C. Indicate the Number of Civilians (Public) Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to-date
D. Fatalities	0		0
E. With Injuries/Illness	0		0
F. Trapped/In Need of Rescue	0		0
G. Missing	0		0
H. Evacuated	15	0	15
I. Sheltering in Place	0		0
J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0

<p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p>	<p>(Overnight) Seafoam Group: Continued burning in the northern portion of the Seafoam area, mainly into Greyhound, Sulfur Creek 2, and in the Seafoam bubble. Fire has crossed Rapid river and established in sheep creek toward the north and is impacting Mountain King Mine to the south. Fire is established in Sulphur Creek 2 in Rapid River and has moved past Josephus Campground.</p> <p>12 hours: Sulphur Group: South-southeast progression towards Middle Fork River on the south side of the fire. Anticipated spread south past Dagger Creek and Blue Bunch Mountain. Flanking fire in Blue Moon Cr. impacting Sulphur Cr. Ranch with north and east spread around the Honeymoon and Prospect fire scars.</p> <p>24 hours: (Tuesday) Dry conditions will continue to support fire spread in continuous fuels and areas of heavy fuel loading.</p> <p>48 hours: (Wednesday) Potential for increased fire behavior when slope and winds align with an incoming low pressure system bringing increased winds and drying before a chance of precipitation.</p> <p>72 hours: (Thursday) Continued gusty winds may increase rates of spread in dry, continuous fuels.</p> <p>Anticipated after 72 hours: (Friday and beyond) The potential for precipitation increases.</p>
--	--

Incident Status Summary (ICS-209)

Incident: **Boundary**

37. Strategic Objectives (define planned end-state for incident): Maintain structure protection at Sulphur Cr. Ranch, Fur Farm, and Seafoam Lodge and Guard Station. Use air support as needed to protect Ruffneck Lookout. Monitor fire progression. Trigger points established and implement point protection.	
38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:	
12 hours:	Socio-economic political issues. Impact to multiple residence at Sulfur remain the same. Impacts continue to Greyhound mine.
24 hours:	Socio-economic political issues continue. Impact to multiple residences at Sulfur remain the same. Impacts continue to Greyhound mine. New threat to Ruffneck Peak and possibly Seafoam Guard Station and Lodge. Seafoam Guard Station and Lodge and Greyhound Mine will be the likely primary threats at this time.
48 hours:	Socio-economic political issues. Impact to multiple residence at Sulfur remain the same. Impacts continue to Cabin Cr. Cabin, Greyhound mine, and possibly Seafoam Guard Station and Lodge. Possible threat to Joe Bump Cabin and Cabin Cr. Cabin. Seafoam Guard Station and Lodge and Greyhound Mine will be the likely primary threats at this time.
72 hours:	Same As Above
Anticipated after 72 hours: Same As Above	
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:	
12 hours:	Safety Officer (SOFR 1/2/3). The incident is flexible on level and trainee status. Need to maintain current staffing levels.
24 hours:	Safety Officer (SOFR 1/2/3). The incident is flexible on level and trainee status. Need to maintain current staffing levels.
48 hours:	Safety Officer (SOFR 1/2/3). The incident is flexible on level and trainee status. Need to maintain current staffing levels.
72 hours:	Safety Officer (SOFR 1/2/3). The incident is flexible on level and trainee status. Need to maintain current staffing levels.
Anticipated after 72 hours: Safety Officer (SOFR 1/2/3). The incident is flexible on level and trainee status. Need to maintain current staffing levels.	
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. We are focused on minimizing the potential for fire to impact private property and forest infrastructure such as Sulphur Cr. Ranch and structures associated with Seafoam Guard Station, Seafoam Lodge, Greyhound Mine. We are also focused on planning and minimizing future potential threats such as Fur Farm. Working closely with the community and partners to ensure they understand fire behavior, suppression, and structure protection progress, and have information necessary to make timely decisions. Revisit area, permitted river, road, and trail closures as appropriate. Prevent disturbance to ESA listed Salmon. To meet our strategic objectives and targets it is imperative we keep this minimally staffed large acreage fire's staffing needs met and maintained as described in our critical resource needs.	
41. Planned Actions for Next Operational Period: Continue to assess values at risk for point and structure protection.	

Incident Status Summary (ICS-209)

Incident: **Boundary**

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):										
43. Anticipated Incident Containment or Completion Date: 10/30/2021										
44. Projected Significant Resource Demobilization Start Date:										
45. Estimated Incident Costs to Date: \$3,124,469.00										
46. Projected Final Incident Cost Estimate:										
47. Remarks (or continuation of any blocks above – list block number in notation): The Scarface Fire 209 will be closed out tonight 9/13 and all operational resources, acreage, and associated fire cost will be reflected on the Boundary Fire 209 starting tomorrow 9/13.										
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
