<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):</p> <p><b>Cold front passage tomorrow breezy conditions all day with gust around 20-25 mph out of the SSW could increase fire behavior. ---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## **Incident Status Summary (ICS-209)**

Incident: **Boundary**

**Scarface Group:** Continued fire activity near the tributaries of Md. Fk. Salmon River and Little Soldier Creek and Marble Creek with fire spread northwest. Backing fire into Thomas Creek and Little Creek towards the Md. Fk. Salmon River potentially impacting Sater Cabin and Thomas Creek Airport.

**Seafoam Group:** Continued burning in the eastern portion of the Seafoam area with active fire in Corduroy spreading northeast. Fire continues to impact the Mountain King Mine vicinity. Active fire will continue in Seafoam Creek.

**Sulphur Group:** Potential for backing and flanking south of Sulfur Creek and east of Silver Moon Creek impacting Sulphur Cr. Ranch. Active backing into the wind in the Blue Bunch Mtn. southwest towards the Blue Bunch/Bear Valley creek and Boundary creek. Fire will spread in Md. Fk. Salmon drainage.

**Pistol Group:** Fire continues to back west and southwest, down slope from the headwaters of Cabin Creek drainage towards Rapid River drainage.  
(Wednesday)

**Predicted increase in fire behavior with the forecasted winds.**

**Scarface Group:** Fire in Little Creek may be pushed further north east by predicted winds. Fire in Little Soldier Lookout area will be directed back into the main fire.

24 hours: **Seafoam Group:** Continued burning/smoldering in the eastern portion of the Sheep Mtn. Mine and Sheep Mtn. Road area will continue. Fire movement could align with fuels and topography, moving the fire updrainage towards the Seafoam GS.

**Sulphur Group:** Southwest winds will direct fire spread further south and east. Movement will be minimized by backing fire due to predicted southwest winds.

**Pistol Group:** Fire continues to back west and southwest, down slope from the headwaters of Cabin Creek drainage towards Rapid River drainage. Fire could make alignment with slope and fuels to make short uphill runs in Cabin Creek drainage.

(Thursday)

48 hours: **All Groups:** Warming and drying expected to increase fire behavior. Isolated torching and group torching is expected with possible short runs due to drying trend and alignment with terrain.

(Friday)

72 hours: **Drying trend with rising temperatures and a drop in RH over the fire area. Fire established in the areas of each group identified in the 12-hour timeframe may result in increased fire behavior and ROS.**

(Saturday and beyond)

Anticipated after 72 hours: **Drying trend continues with rising temperatures and a drop in RH over the fire area. Fire established in the areas of each group identified in the 12-hour timeframe may result in increased fire behavior and ROS. Predicted increase of winds due to approaching cold front.**

37. Strategic Objectives (define planned end-state for incident):

## Incident Status Summary (ICS-209)

Incident: **Boundary**

<p><b>Maintain structure protection at Sulphur Cr. Ranch, Fur Farm, Seafoam Lodge and Guard Station, and Thomas Creek Ranch. Use air support as needed to protect Ruffneck Lookout. Assess fire progression and continue to develop. Begin implementation of structure protection for Indian Creek GS and Pistol Creek Ranch. Trigger points established and implement point protection. Continue to identify and triage values at risk.</b></p>	
<p>38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:</p>	
12 hours:	<p><b>(Overnight)</b>  <b>Socio-economic and continuity of operations impacts to community and commercial stability with the beginning of hunting season and ending of rafting season. Several heritage sites and infrastructure exist. Significant impacts to ESA listed Salmon and wildlife and fish habitat. Private and commercial property concerns. Potential for fire to cross jurisdictional boundaries. Impact to multiple residences at Sulfur remain. Impacts continue to Greyhound mine. Threat to Ruffneck Peak and possibly Seafoam Guard Station and Lodge. Primary threat to Seafoam Guard Station and Lodge and Greyhound Mine.</b></p>

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**In alignment with the Salmon Challis National Forest Plan and WFDSS direction for the Boundary Fire, implement a modified suppression strategy (point protection) to meet incident objectives. Critical Resource Needs are necessary to meet incident objectives and fulfill the Delegation of Authority.**

41. Planned Actions for Next Operational Period:

**Structure protection and preparatory work will begin in Pistol Creek and Indian Creek GS. Preparatory work will continue on the FS 579 Road. Continue to assess values at risk for point and structure protection. Continue to locate and triage values at risk not previously identified. Continue consultation and development of PACE plan with Boise NF for coordination in the event the Boundary Fire crosses jurisdictional boundaries.**

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):

43. Anticipated Incident Containment or Completion Date: **10/30/2021**

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$6,200,000.00**

46. Projected Final Incident Cost Estimate:
