Seafoam GS 2019 Shady Fire

Boundary Fire: [ftp.wildfire.gov](ftp://wildfire.gov) link

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Boundary	2. Operational Period: Date From: 09/07/2021 Date To: 09/07/2021 Time From: 0600 Time To: 2200			
3. Objective(s): Incident Objectives: <ol style="list-style-type: none"> 1. Minimize the potential for fire to impact private lands and Forest infrastructure such as Sulphur Creek Ranch, Morgan Ranch, Morehead / Ruffneck Lookouts and structures associated with the Boundary Creek Launch Site, Seafoam Guard Station, Greyhound Mine, and Mountain King Mine. 2. Work closely with the community and partners to ensure they understand fire behavior, suppression/structure protection progress, and have information necessary to make timely decisions. 3. Revisit area, river, road, and trail closures as appropriate. 4. Avoid bucket dips from Middle Fork of Salmon River to prevent disturbance of ESA listed Chinook Salmon. Use Morehead Lake, Lincoln Creek Lake or other alpine lakes for dipping. 				
1. Operational Expectations: <ul style="list-style-type: none"> • Risk management process will be applied to all actions and objectives to provide for public and firefighter safety. • Continue to mitigate COVID exposure within crews, ICP, and spike camp. • We expect the highest degree of ethical conduct from everyone while on these fires, in fire camp, and in town. 				
General Situational Awareness: Boundary Fire is large acreage fire being managed by a type III organization. Operations on fire is broken up into groups instead of divisions based on the needs of the point protection strategy. The remote nature of certain locations and spike camps dictates a radio briefing need for many resources.				
General Weather: Low humidity, including poor overnight recovery, will persist into Thursday. Gusty winds will subside later this evening but will return Wednesday afternoon and evening. Haines of 5 or 6 will continue until later in the week as well. Showers and thunderstorms are expected to return starting Thursday night or Friday and increase through next weekend.				
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plan(s) Located at:				
6. Incident Action Plan (the items checked below are included in this Incident Action Plan): <table style="width: 100%; border: none;"> <tr> <td style="width: 33%; vertical-align: top;"> <input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 206 <input checked="" type="checkbox"/> ICS 203 <input type="checkbox"/> ICS 207 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> Map/Chart <input type="checkbox"/> ICS 205A <input type="checkbox"/> Weather Forecast/Tides/Currents </td> <td style="width: 33%; vertical-align: top;"> Other Attachments: <input checked="" type="checkbox"/> <u>ICS 220 – Air Ops Summary</u> <input checked="" type="checkbox"/> <u>ICS 215A Safety Analysis</u> <input type="checkbox"/> _____ <input type="checkbox"/> _____ </td> <td style="width: 33%;"></td> </tr> </table>		<input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 206 <input checked="" type="checkbox"/> ICS 203 <input type="checkbox"/> ICS 207 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> Map/Chart <input type="checkbox"/> ICS 205A <input type="checkbox"/> Weather Forecast/Tides/Currents	Other Attachments: <input checked="" type="checkbox"/> <u>ICS 220 – Air Ops Summary</u> <input checked="" type="checkbox"/> <u>ICS 215A Safety Analysis</u> <input type="checkbox"/> _____ <input type="checkbox"/> _____

Spot Forecast for Boundary...Central Idaho Dispatch

National Weather Service Boise ID

417 AM MDT Tue Sep 7 2021

Forecast is based on forecast start time of 0700 MDT on September 07.
If conditions become unrepresentative...contact the National Weather
Service.

...DRY WITH GUSTY WINDS ON WEDNESDAY...

.DISCUSSION...

High pressure will keep dry conditions over the burn site through Thursday. Temperatures will be above normal with low afternoon relative humidity and poor overnight recoveries. Southwest winds aloft will increase on Wednesday, bringing gusty winds in the afternoon, especially along mid-slopes and ridgelines. Thursday night and Friday will bring a slight chance of showers and thunderstorms as a low pressure system moves into the region.

.TODAY...

Sky/weather.....Mostly sunny.
Max temperature.....78 to 85.
Min humidity.....12 to 17 percent.
CWR /0.10 inch/.....0 percent.
LAL.....1.
Wind - eye level....Southwest 3 to 8 mph.
Haines Index.....5 moderate.

.TONIGHT...

Sky/weather.....Mostly clear.
Min temperature.....43 to 55.
Max humidity.....20 to 27 percent.
CWR /0.10 inch/.....0 percent.
LAL.....1.
Wind - eye level....Downslope around 4 mph.
Haines Index.....5 moderate.

.WEDNESDAY...

Sky/weather.....Sunny.
Max temperature.....78 to 85.
Min humidity.....10 to 15 percent.
CWR /0.10 inch/.....0 percent.
LAL.....1.
Wind - eye level....Southwest 7 to 11 mph with gusts up to
19 mph in the afternoon. Along mid-slopes
and ridgelines southwest 9 to 15 mph with
gusts up to 24 mph in the afternoon.
Haines Index.....6 high.

Safety Message/Plan (ICS 208)

1. Incident Name: Boundary	2. Operational Period:	Date From: 9/7 Time From: 0600	Date To: 9/7 Time To: 2200
-----------------------------------	-------------------------------	-----------------------------------	-------------------------------

3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

Fire and COVID-19 Briefing Checklist:

- Focus on daily self-checks
- If you have one or more of these: fever over 101.4° F, cough, shortness of breath, or loss of taste or smell; or if you have two or more of these: fatigue, headache, muscle/joint aches, sore throat, diarrhea
- Notify your supervisor ASAP, isolate, and get tested

Driving:

- Travel to, and within the fire area will continue to be hazardous
- Take your time driving to and from the incident and utilize seat belts
- Ensure your vehicle is in good operating condition including a clean windshield
- Drive defensively and give yourself extra space on forest roads

Snags:

- Snags will be a persistent threat throughout your assignment
- Follow snag safety protocols
- Don't assume any tree is safe

4. Site Safety Plan Required? Yes No

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications / dispatch / command.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Example: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Example: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care	Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment:
(See IRPG page 106)

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

Resource Advisor's Guidance Message

Questions regarding this guidance should be directed to the assigned READ during planning, prior to implementation.

Main concerns for the incident at this point include:

WEED PREVENTION

- Vehicles and equipment should be washed **upon check-in** and demob.
- The Forest has a Hotsee system available at the District office.
- Vehicles should remain on authorized routes and in established parking areas.
- Avoid driving across meadows or other cross-country travel.

FIRELINE REPAIR

- Please complete repair tasks as divisions move through mop-up phase.
- Please continue to map all constructed firelines, safety zones, access routes, helispots, etc. so they can be timely added to the next iteration of the repair plan.

AQUATIC INVASIVE SPECIES (AIS) PREVENTION

- Due to disposal issues, minimize the use of chemical sanitation (Quat) and to follow good prevention and non-chemical sanitation methods.
- For aircraft, use hotsies on buckets and snorkels (non-chemical sanitation). Alternate method is to Allow for complete drying out in the sun before using again.
- Do not cross-contaminate water sources. If switching water sources is absolutely necessary before decontamination, move from higher elevation to lower.
- For engine/tender filling situations, use pumpkins to fill equipment, rather than filling from the stream or other water body. This eliminates the need to sanitize multiple pieces of equipment and reduces impacts to riparian areas. This also allows for a greater number of drafting sites. Ensure the pump used to fill the pumpkin is sanitized and properly screened. All that come out of the GB Cache are sanitized; however, if pumps move around the incident they may need sanitation.
- NO water is to be dumped into a live water source.

THREATENED AND ENDANGERED FISH CONSIDERATIONS

- Most streams in the planning area provide spawning habitat for threatened steelhead, salmon and bull trout. Chinook and Bull Trout are actively spawning at this time.
- Retardant will not be used within 300' of any stream, river, or wet area unless life or property are threatened. **Permission for retardant must be given by READ/A.A.** Use water as an alternative where possible. PLAN AHEAD
- One method to avoid impacts to fish is to use fold-a-tanks and heliwells (see above). Pump and intake sites should be cleared by the READ to avoid disturbing spawning fish.
- Ensure that all equipment used to draft water is properly screened.
- All fuel must be contained. Ensure all fuel cans, tenders etc. have proper fuel containment and spill mitigation. Store excess fuel away from riparian areas.
- Any ground-disturbing activity (**including vegetation removal**) within a Riparian Habitat Conservation Area (RHCA), which is defined as within 300' of a perennial stream, except during IA and emergency actions should be cleared by a READ. All potentially ground-disturbing activities in RHCAs (regardless if IA or emergency) must be reported to the READ.

HERITAGE & CULTURAL RESOURCES

- There is an archeologist providing information for this incident. There are several sites to be protected from fire. Where possible care should be taken to avoid damage to structures or artifacts with suppression strategies. Other sites may be deemed “no action” or “avoid”. Consult READ
- All ground-disturbances (e.g. dozer lines and hand lines) should be pre-cleared by READ.

MECHANICAL FIRELINES

- The use of **mechanical fireline is often unsuccessful on the SCNF and causes many resource impacts. All Mechanical line or use of heavy equipment off road must be approved by READ**
- See above for ARCH clearance needs on mechanical lines.
- Locations of mechanical firelines should be documented in real time (or at least daily), mapped, and reported to the READ.

WHITE BARK PINE

- Whitebark pine is a sensitive species in USFS Region 4
- Avoid excessive felling of 5-needle pine trees whenever possible during suppression actions such as fireline and helispot construction
- In our area, cutting many of another species is usually preferable to cutting a few WBP

FRANK CHURCH-RIVER OF NO RETURN WILDERNESS

- The Boundary Fire is active in the FCRONRW. Minimum Impact Suppression Techniques (MIST) must be utilized as much as possible.
- **Motorized/mechanized intrusions in wilderness must be requested and approved by the Forest Supervisor or Regional Forester.**
- Wilderness Intrusions: Each instance of mechanized and/or motorized intrusion into the Frank Church- River of No Return Wilderness is to be documented and kept by I.C. Intrusions may include, but not be limited to: smoke jumper landings, para-cargo drops, helicopter landings, long-line deliveries, water dips, heli-tanker drafting, chainsaw use, and use of portable pumps.
- After completion of initial/extended attack and mop-up operations, unless imminent danger threatens public or firefighter safety, a separate authorization would be required prior to demobilizing firefighters, equipment, materials, etc. by motorized and/or mechanized means of transport.

Demobilization Procedures

1. Keep Supervisor informed of your expected last workday (LWD)
2. At least 48 hours prior to demobilization, provide any information to incident supervisor or Plans on any special travel needs or arrangements regarding demobilization.
3. Return any accountable property during demobilization.
4. Check-out with Finance, Tina Finley. When available, call her at 208-589-9089 to make arrangements to complete check-out and complete OF-288. You may need to in person complete finance checkout at Challis-Yankee Fork District Office: 311 N US HWY 93, Challis, ID 83226. Email may be an option at *christina_finley@firenet.gov*
5. When complete with finance, notify Plans, Jeff Hunteman. Text at 208-315-5029 or email *jeff.hunteman@usda.gov*.
