		Posted to: • <u>ftp.wildfire.gov/incident_specific_data/great_basin/2021_I</u> <u>ncidents/2021_Boundary/IR</u> • NIFS	

Comments / notes on tonight's mission and this interpretation:

I began mapping from the previous IR perimeter. There is no SITL for this fire and the NIFS Daily Wildfire Perimeter has not been updated since Sept. 26th.

The heat perimeter increased by 221 acres since last night.

There were small pockets of intense hea tin the expansion zones.

There were several pockets of interior scattered heat along the southern and northwestern flanks.

Additionally there was interior isolated heat...mostly in proximity to the perimeter.
