

IAP Broad Canyon (06/14/2021)

UT-SLD-260 PD N2P3 (1522)

OBJECTIVES

- Provide for firefighter and public safety
- Monitor fire line and patrol for heat in the fire perimeter
- Utilize Engines for water delivery where appropriate
- Mop up standards: 60 feet along fire line, 100% on interior islands
- Remove all water handling equipment on the fire
- **MANAGE RISK AND LIMIT EXPOSURE DURING HEAT OF THE DAY**

SAFETY HAZARDS

- Stay hydrated
- Fire and regular traffic - use care on blind corners, and slow down
- Weather, be prepared for hot and dry conditions, temps at or above 100 degrees
- High risk terrain and fuels, wear approved footwear and gloves in case of tripping, and hard hats for overhead hazards
- UTV operators need to be trained and carded, do not drive recklessly
- Mitigate any possible Covid 19 Exposure

MEDICAL PLAN-

Notify IC immediately. Refer to IRPG Medical Incident Report Page 118 and incident within an incident protocol. Identify closest medical trained personnel, Initiate MIR response and go direct with Dispatch via command.
